AMERICAN ALMANAC

AND

REPOSITORY

OF

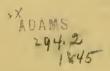

USEFUL KNOWLEDGE,

FOR THE YEAR

1845.

 $\begin{array}{c} \text{BOSTON:} \\ \text{PUBLISHED BY JAMES MUNROE & Co.} \\ 1844. \end{array}$

1/

Entered according to act of Congress, in the year 1844,

BY FRANCIS BOWEN,
in the Clerk's office of the District Court of the District of Massachusetts.

BOSTON:
PRINTED BY S. N. DICKINSON,
WASHINGTON STREET.

PREFACE.

GREAT pains have been taken with the present volume of the American Almanac to sustain that reputation for fulness and accuracy of information by which the work has been distinguished during the sixteen years of its existence. By the kindness of the officers of the departments at Washington, and of numerous correspondents in every part of the United States, returns and corrections are obtained up to the latest hour, so as to render the Almanac as perfect a contemporaneous record as is possible of the government, the judiciary, the finances, and the statistics of the country. Amid the vast amount of materials that are collected for use, the difficulty of selection is great; but the editors have always considered that accuracy was a point of more importance than variety or quantity, and they have endeavored to make the work a continuous register of those statistical and miscellaneous facts only which may be depended upon, and which are most valuable for present use, and for reference in future years. An article, in this volume, upon the mistakes committed in taking the census for 1840, shows how easy it is to get together a great body of supposed facts, which shall be almost worthless, from the inaccuracies with which they abound, and from the impossibility of separating truth from error.

The astronomical calculations have been made, as in former years, by Mr. Benjamin Peirce, Perkins Professor of Astronomy in Harvard University; they are very full, and are believed to be worthy, in every respect, of his high reputation as a mathematician. The lists of officers, and the particulars respecting every department of the general government, the judiciary, army, navy, post office, public lands, revenue, and expenditure of the United States, are given in the most condensed form, and with even greater minuteness than on former occasions. Each volume of the American Almanac is intended to be an original and independent work, not a page in it being copied from one in a former volume, without numerous additions and corrections, and far the larger portion of the matter being entirely new. The last volume, for instance, contained hardly any particulars respecting the commerce of the country; in the present volume, there is more copious information respecting this subject, drawn from the official records at Washington, than was probably ever before

iv PREFACE.

published in a single work. It is given in a series of tables, presenting comparative views of the articles of import and export, tonnage, duties collected, costs of collection, drawbacks, bounties, &c., for a period of 22 years. The materials for these tables, being taken from the custom-house returns, are deserving of full credit for accuracy and completeness. An article commenced last year is continued in the present volume, giving the titles and abstracts of all the public laws passed at the last session of Congress. The subject will be resumed in each successive year, so that the series of volumes will give a full view, in the shortest compass, of the general legislation of the country. The register of colleges, theological, medical, and law schools, &c., has been revised and corrected with great care, and is quite complete. The presiding officers of these institutions will confer a favor upon the editor and the public, by forwarding to him a copy of their annual catalogue.

Under the head of the Individual States will be found a very full view of their debts and finances, and many interesting details respecting the common schools, internal improvements, and charitable establishments. The American Obituary for the year is the only full record of the kind preserved in the country, and great care is taken to render it complete and accurate. The information respecting the States of Europe, especially Great Britain, is derived from the latest authorities, and is complete

enough for all common purposes of reference.

The editor again offers his best thanks to the correspondents of the work, and respectfully solicits a continuation of their kindness. Any person who may notice errors in any part of the Almanac is earnestly requested to communicate them to the editor, for correction in the subsequent volume. But information to be used in the work for the next year must be received by him before the 1st of August.

Cambridge, Mass.

October 1, 1844.

PUBLISHER'S ADVERTISEMENT.— This number contains 10 printed sheets; the postage, under 100 miles, is 15 cents; over that distance, 25 cents. The work will be sent by mail to any person who will remit \$1 to the publisher at Boston. If the remittance be made without expense to the publisher, either by discount or postage, the Almanac will be sent by mail, postage paid.

THE

AMERICAN ALMANAC,

FOR

1845.

PART I.

AMERICAN ALMANAC,

FOR THE YEAR

1845,

Being the latter part of the 69th, and the beginning of the 70th, year of the Independence of the United States of America;

the 6558th year of the Julian Period; 66

- " the latter part of the 5605th and the beginning of the 5606th, year since the creation of the world, according to the Jews:
- " the 2598th year (according to Varro) since the foundation of Rome;
- 46 the 2592d year since the era of Nabonassar, which has been assigned to Wednesday, the 26th of February of the 3967th year of the Julian Period, which corresponds, according to the chronologists, to the 747th, and, according to the astronomers, to the 746th year, before the birth of Christ;
- " the 2621st year of the Olympiads, or the first year of the 656th Olympiad, beginning in July, 1843, if we fix the era of the Olympiads at 7752 years before Christ, or at or about the beginning of July of the year 3938 of the Julian Period;
- " the latter part of the 1260th, and the beginning of the 1261st year (of twelve lunations) since the Hegira, or flight of Mahomet, which, as is generally supposed, took place on the 16th of July, in the year 662 of the Christian era.

The Jewish year generally contains 354 days, or 12 lunations of the Moon, but, in a cycle of 19 years, an intercalary month (Veadar) is 7 times introduced, for the purpose of rendering the average duration of the year quite or nearly correct.

The Mahometan Era dates from the flight of Mahomet to Medina, July 16th, A. D. 662.

The Mahometan year is purely lunar; it consists of 12 synodical periods of the Moon, or of 354 days, 19 times in a cycle of 30 years, and 11 times of 355 days. The average length of this year is therefore $354\frac{1}{20}$ days, which differs only thirty-three seconds from the truth; a degree of exactness that only could have been attained by a long series of observations. But as no allowance is made for the excess of 11 days in the length of a tropical year over the time of 12 revolutions of the Moon, it is obvious that in about 33 years, the above months will correspond to every season and every part of the Gregorian year.

HEIGHT OF THE GREATEST OR SPRING TIDES IN 1845.

Computed by the formula of Laplace (Mécanique Céleste, Vol. II. pp. 289 Paris ed., and [2858] Bowd. ed.)

The unit of altitude at any place, is the height at that place of that tide which arrives about a day and a half after the time of New or Full Moon, when the Sun and Moon at the moment of conjunction or opposition are at their mean distance from the Earth, and in the plane of the celestial equator.

This unit of altitude, which must be derived from observation for each place, multiplied by the quantities in the above table, gives the height of the spring tides at that place during the present year.

By the above table it appears, that the highest tides of 1845 will be

those of February S, August 19, and September 17.

The actual rise of the tide, however, depends so much upon the strength and direction of the wind, that it not unfrequently happens that a tide, which would, independently of these, have been small, is higher than another, otherwise much greater. But when a tide, which arrives when the Sun and Moon are in a favorable position for producing a great elevation, is still further increased by a very strong wind, the rise of the water will be uncommonly great, sufficient perhaps to cause damage.

The formula, from which these tides were computed, is, however, strictly true only for Brest and its vicinity, and must be regarded as a

very uncertain approximation for the coast of the United States.

The following table contains the Unit of Altitude of several ports and places on the coast of America, according to the best authorities.

The unit of altitude of the several places in the Bay of Fundy was ascertained by recent observations.

TIDE TABLE.

The following Table contains the difference between the time of high water at Boston, and at a large number of places on the American coast, by which the time at any of them may be easily ascertained, by subtracting the difference at the place in question from the time at Boston, when the sign — is prefixed to it; and by adding it, when the sign is +.

The time of high water, in the calendar pages, is of that tide which

immediately precedes the southing of the Moon.

DARKNESS OF THE NIGHTS DURING THE YEAR 1845.

For Roston, New York, Philadelphia, Washington, &c.

The number of hours at the top of the page denotes the average time for the month from the end of evening twilight to the beginning of morning twilight.

The dots in the table denote the hours of entire darkness, when there is neither sun, moon, nor twilight, and their disposition denotes the hours before or after midnight.

ECLIPSES IN 1845, and TRANSIT OF MERCURY.

In the year 1845, there will be four eclipses; two of the Sun, and two of the Moon, and a Transit of Mercury. One of the solar eclipses will be partly visible in the United States, one of the lunar eclipses, and the transit of Mercury.

I. Tuesday, May 6th. An annular Eclipse of the Sun, partially visible in the United States.

Beginning of the general eclipse at 2h. 41.1m. M. [Mean Time at Washington,] in latitude 27° 13′ North, and longitude 36° 55′ West of Greenwich.

Beginning of the annular eclipse at 4h. 49.5m. M. in latitude 60° 43' N. and longitude 103° 39' W. of Greenwich.

End of the annular eclipse at 5h. 12.1m. M. in latitude 72° 39′ N., and longitude 136° 58′ W. of Greenwich.

End of the general Eclipse at 7h. 20.6m, M. in latitude 48° 6′ N., and longitude 101° 9′ E. of Greenwich.

This eclipse will be visible throughout the greater part of Europe, the Northern part of Asia, the North Polar Sea, the North Atlantic Ocean, Greenland, Canada, New England, New York, New Jersey, Delaware, the North-eastern portion of Pennsylvania, and the North-eastern corner of Maryland. Being visible at the same time in Europe and America, it will be peculiarly valuable for determining the relative longitudes of places in the two continents.

The phases of the eclipse for all places in the United States may be determined with sufficient accuracy by means of the following tables.*

The Sun's semi-diameter and horizontal parallax are the same as at conjunction, and may be taken from the following table:

^{*} This Transit was calculated by Lieut. Davis.

III. Wednesday, May 21. A total eclipse of the Moon, invisible in the United States.

	n. m.	
Beginning of the eclipse,	9 9.0M	
Beginning of the total eclipse,	10 23.2M	Mean Time
Middle of the eclipse,	10 45.8	at
End of the total eclipse,	11 8.4	Washington.
End of the Eclipse,	0 22.6 A	

Digits eclipsed, 13° 8' on the Southern limb.

Angle of the first point of contact from the Moon's N. point, 121° E.

Angle of the last point of contact from the North point, 108° W.

This eclipse will be visible in the Pacific Ocean, Asia, New Holland, Africa, and the East of Europe.

IV. Thursday, Oct. 30. An annular eclipse of the Sun, invisible in the United States.

Beginning of the eclipse on the Earth, at 4h. 23.5m. A. [Mean Time at Washington,] in latitude 19° 37' South, and longitude 117° 59' East of Greenwich.

Beginning of the annular eclipse at 5h. 47.0m. A. in latitude 43° 54' S. and longitude 88° 22' East.

Central eclipse at Noon, at 7h. 4.8m. A. in latitude 75° 39' South, and longitude 172° 42' East.

End of central eclipse at 7h. 38.8m. A. in latitude 67° 37′ South, and longitude 68° 48′ West.

End of the eclipse on the Earth at 9h. 2.3m. A. in latitude 45° 17' South, and longitude 112° 10' West.

This eclipse will be visible in the Southern Ocean, Australia, New Zealand, and South Victoria.

V. Thursday, Nov. 13. A partial eclipse of the Moon, visible in the United States, as follows:

73	18.2	36.4	90	10.2	28.4
74	14.2	32.4	91	6.2	24.4
75	10.2	28.4	92	2.2	20.4
76	6.2	24.4	93	4 58.2	16.4
77	2.2	20.4	94	54.2 .	12.4
78	5 58.2	16.4	95	50.2	8.4
79	54.2	12.4	96	46.2	4.4
80	50.2	8.4	97	. 42.2	0.4
81	46.2	4.4	98	38.2	7 56.4
82	42.2	0.4	99	34.2	52.4
83	38.2	8 56.4	100	30.2	48.4

The digits eclipsed are 11° 2' on the Moon's North limb.

The first contact with the shadow occurs at 51° from the North point of the Moon's limb towards the East; the last contact at 70° towards the West.

OCCULTATIONS.

Elements for facilitating the calculation of Occultations which may be visible in the United States, in 1845.

"	31	35.26	-	9.11		12.4		14	57.8	1		34.5

a denotes the semitransverse axis of the rings.

b " " semiconjugate axis of the rings, positive when their northern surface is visible, negative when their southern.

p denotes the inclination of the Northern semiconjugate axis of the rings to the circle of declination; + when East, - when West.

" angle of elevation of the Earth above the plane of the rings, as seen from Saturn; + when North, - when South.

" " elevation of the Sun above the plane of the rings, as seen from Saturn; + when North, — when South.

The Conjunction of Saturn will take place on the 22d of February, and the Opposition on the 8th of August. The Right Ascension of this planet will not during the year differ much from 21h., and its declination will not be less than 16° South, so that it will not rise to a great height even when in the meridian.

A Table showing the Illuminated Portion of the Discs of Venus and Mars.

The numbers in this table are the versed sines of that portion of the Discs, which, to an observer on the Earth, will appear to be illuminated, the apparent diameter of the planet at the time being considered as unity.

To a spectator on the Earth, Venus appears most brilliant when her elongation is about 45°, and she is approaching her inferior conjunction, or receding from it; in which positions she will not be this year. Mars is most brilliant about the time of his opposition to the Sun, being then also nearest to the Earth, in which position he will be this year on the 18th of August.

The correction for an increase of altitude of one inch in the barometer, or for a depression of one degree in the thermometer, is to be *added* to the tabular refraction; but when the barometer is lower than 30 inches, or the thermometer higher than 47 degrees, the correction becomes *subtractive*.

When great accuracy is required, 0,003 inch should be deducted from the observed height of the barometer, for each degree that the thermometer near it is above 50 degrees, and the same quantity added for an equal depression.

*The figures in this column express the difference between the two preceding columns.

The greatest range of the barometer, in 24 hours, was on the 12th and 13th of February, =1.260 inches.

The barometer was

Lowest, February 13th, at 9 A. M.=29.044,—attached thermometer, 50° Highest, April 2d, at 9, A. M.,=30.826,— " " 35°

Extreme range during the year, 1.782.

The mean height of the barometric column, at the hours specified above, during the year, was 29.968; its cistern being 44 feet above the mean level of high water, Charles River, at Brighton Bridge.

for the year, 45.80 of the Spring mo's. 45.57 Mean Tempera. at Summer 67.77 M. of Sum. & Win. 45.02. the hours mentioned Autumn 47.40 M. of Spr. & Aut. 46.48. Winter 22.27 Mean of Summer's heat, at 3, P. M. 76.87 Maximum heat, June 24-27, July 22, +91.0Minimum Jan. 12, - 9.0 Range of thermometer during the year, 100.0

The external thermometer, Fahrenheit's scale, has entire exposure on the north side of the building; the sun never shines directly upon it, and it is affected by reflected heat only occasionally, at the 3 P.M. observation, and this probably to a small amount; it is fixed on a bracket projecting six inches from the wall, and is six feet above the surface of the ground. The barometric observations have been corrected for capillary action, and reduced to the temperature of 32° Fahrenheit, but not for elevation. The rain gauge is a cubical box of zinc, 10 inches by the side, and rests on the surface of the ground.

The hours of observation adopted in these tables, are those generally used by observers in England. The mode of notation for the winds and clouds also deserves notice. In the former case, 0 denotes a perfect calm, and 6 the greatest violence of the wind. In the latter case, 0 denotes a sky without any clouds, and 10 a sky completely overcast. As uniformity in these tables is very desirable, it is to be wished that this method should be adopted by observers throughout the country.

Mean,	1.32	1.93	1.48	1.58	4.50	4.52	4.62	4.55	31.575

Maximum heat, September 4, 1843, $+90^{\circ}$ Range, 108°. Minimum heat, January 28, 1844, -18°

The vapor from the falls of Saco river (which are near the place of observation) causes an average increase of temperature, in very cold weather, of about six degrees. On the morning of Jan 28, the thermometer, at the distance of half a mile from the falls, was —28°.

Number of falls of snow, 24; aggregate depth of snow, 7 feet. River closed by ice, December 1st; river opened, March 28.

XVI. FLOWERING OF PLANTS AT MARIETTA, OH10,

For the Year 1843. By S. P. Hildreth, M. D.

April 1st, crocus in bloom; 2d, crown imperial, two inches high; 3d, snow fell two inches deep; 4th, blackbird and martin appear; 8th, snowdrop in bloom; 14th, Hepatica triloba; 19th, early hyacinth; 20th, Aronia botryapium, or Juneberry; 21st, crown imperial; 22d, Sanguinaria Canadensis; 23d, hyacinth; 24th, peach tree begins to open its flowers on the sunny side of hills, but not in low grounds; 25th, wood anemone; 26th, fumitory and birthwort; 27th, peach in bloom generally—last year it opened on the 19th of March, a difference of thirty-eight days; 29th, plum in bloom. On the morning of the 25th, there was a frost, but not so hard as to injure the blossoms of the peach.

May 1st, pear and cherry in bloom; 5th, apple in blossom—last year it was open on the 2d of April, a difference of thirty-three days; a few tulips of the early varieties open; 6th, red-bud in bloom—this fine flowering tree usually opens at the same time with the apple; 7th, Cornus florida; 8th, white oak putting out its leaves—the old Indian rule for planting their corn, which was probably founded on ancient observation, that before that period, the earth was not sufficiently warmed for the corn to vegetate in a healthy manner; 9th, apple shedding its blossoms; 13th, quince tree in bloom; 16th, purple mulberry; 17th, Calceolaria lutea; 18th, hickory; 19th, black walnut shedding its aments; 22d, Ribes villosus; 24th, Acacia robinia—this is a very cautious tree, and never puts out its bloom till all danger from late frosts is past; 25th, Prunus Virginianus; 27th, rose Acacia, in gardens; 30th, white Chinese peony.

The mean temperature for the summer months was 71°-15, which is 3°-71 above the summer of 1842. The amount of rain in these months, was only 7.45 inches, while in the former year it was 15.75 inches. June 2d, there was a smart frost in the morning, but not so hard as to destroy the young and tender fruit of pears, apples, &c., it being protected by the shelter, and by the radiation of caloric from the leaves. 7th, Osage orange in bloom; 8th, peas fit for the table—in ordinary years they are ready by the 20th of May. 9th, strawberries ripe; 11th, various hardy roses in bloom; 18th, Franklinia; 23d, cucumbers ready for eating—grown in the open air, but protected when small by a box, like a hand glass; 26th, Sambucus in bloom; 27th, purple mulberry ripe; 29th, red Antwerp raspberry and currant; July 1st, Catalpa in bloom. The ripening of the early summer fruits is not so much retarded by the action of a cold spring, as the blooming of flowers.

THE

AMERICAN ALMANAC,

FOR

1845.

PART II.

UNITED STATES.

I. EXECUTIVE GOVERNMENT.

The 14th Presidential term of four years, since the establishment of the government of the United States, under the Constitution, began on the 4th of March, 1841; and it will expire on the 3d of March, 1845.

JOHN TYLER, of Virginia,	President,	\$25,000
Vacancy,	Vice President.	5,000

General William Henry Harrison, of Ohio, having been elected by a majority of 174 of the electoral votes, was, on the 4th of March, 1841, inaugurated President of the United States, in the city of Washington, and died on the 4th of the succeeding April. In consequence of this event, the duties of the office have devolved on John Tyler, of Virginia, who had been elected by the same majority Vice President; in accordance with the provision of the Constitution of the United States, which says: "In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of said office, the same shall devolve on the Vice President."

THE CABINET.

The following are the principal officers in the executive department of the government, who form the Cabinet, and who hold their offices at the will of the President.

John C. Calhoun,	South Carolina,	Secretary of State,	\$6,000
George M. Bibb,	Kentucky,	Secretary of the Treasury,	6,000
William Wilkins,	Pennsylvania,	Secretary of War,	6,000
John Y. Mason,	Virginia,	Secretary of the Navy,	6,000
Charles A. Wickliffe,	Kentucky,	Postmaster General,	6,000
John Nelson,	Maryland,	Attorney General,	4,000

VOTES FOR PRESIDENTS AND VICE PRESIDENTS FROM 1789 TO 1841.

RECAPITULATION AND REMARKS.

1st Term, 1789. Electors 69, and 69 votes for G. Washington. J. Adams had 34; John Jay (N. J. 5, Del. 3, Va. 1) 9; R. H. Harrison (Md. 6) 6; J. Rutledge (S. C. 6) 6; J. Hancock (Pa. 2, Va. 1, S. C. 1) 4; G. Clinton (Va. 3) 3; S. Huntington (Ct. 2) 2; John Milton (Ga. 2) 2; J. Armstrong (Ga. 1) 1; Ed. Telfair (Ga. 1) 1; B. Lincoln (Ga. 1) 1:—total 69. Rhode Island, New York, and North Carolina did not assent to the Constitution in season to vote for President in 1789.

2d, 1793. Electors 135. 132 votes for G. Washington, and 3 (Md. 2, S. C. 1) vacancies. J. Adams received 77 votes; G. Clinton 50; T. Jefferson (Ky. 4) 4; A. Burr (S. C. 1) 1:—total, 132.

3d, 1797. Electors 138. J. Adams received 71 votes; T. Jefferson 68; T. Pinckney 59; A. Burr 30; S. Adams (Va. 15) 15; Ol. Ellsworth (N. H. 6, Mass. 1, R. I. 4) 11; G. Clinton (Va. 3, Ga. 4) 7; John Jay (Ct. 5) 5; James Iredell (N. C. 3) 3; G. Washington (Va. 1, N. C. 1) 2; J. Henry (Md. 2) 2; S. Johnson (Mass. 2) 2; Ch. C. Pinckney (N. C. 1) 1.

4th, 1801. Electors 138. T. Jefferson received 73 votes; A. Burr 73; J. Adams 65; Ch. Pinckney 64; John Jay (R. I. 1) 1. The election was carried to the House of Representatives, and Mr. Jefferson was, on the 36th ballot, chosen President by the votes of N. Y., N. J., Pa., Md., Va., N. C., Ga., Tenn., and Ky; and Mr. Burr, Vice President. After this, the Constitution was altered, so as to require the President and Vice President to be separately voted for.

5th, 1805. For a full view of the votes, see Table.

6th, 1809. For *President*; J. Madison 122 votes; C. C. Pinckney 47; G. Clinton (N. Y. 6) 6; 1 vacancy (Ky.): — total 176. For *Vice President*; G. Clinton 113 votes; Rufus King 47; J. Langdon (Vt. 6, Ohio 3) 9; J. Madison (N. Y. 3) 3; J. Monroe (N. Y. 3) 3; 1 vacancy (Ky.) — total 176.

7th, 1813. See Table. One vacancy in Ohio.

Sth, 1817. For President; J. Monroe 183 votes; Rufus King 34; 4 vacancies (Del. 1, Md. 3) 4:—total 221. For Vice President; Daniel D. Tompkins 183 votes; John E. Howard (Mass. 22) 22; James Ross (Ct. 5) 5; J. Marshall (Ct. 5) 5; R. G. Harper (Del. 3) 3; 4 vacancies (Del. 1, Md. 3):—total 221.

9th, 1821. For President; J. Monroe 231; J. Q. Adams (Mass. 1) 1:—total 232. For Vice President; D. D. Tompkins 218; R. Stockton (Mass. 8) 8; D. Rodney (Del. 4) 4; R. Rush (N. H. 1) 1; R. G. Harper (Md. 1) 1:—total 232.

10th, 1825. For President; A. Jackson 99 votes; J. Q. Adams 84; Wm. H. Crawford 41; Henry Clay 37:—total 261. Mr. Adams was elected by the House of Representatives. See Table. For Vice President; J. C. Calhoun 182; N. Sanford 30; N. Macon (Va. 24) 24; A. Jackson (N. H. 1, Ct. 8, Md. 1, Mo. 3) 13; M. Van Buren (Ga. 9) 9; Henry Clay (Del. 2) 2; 1 vacancy (R. I.):—total 261.

11th, 1829. See Table.

12th, 1833. For President; A. Jackson 219 votes; Henry Clay 49; J. Floyd (S. C. 11) 11; W. Wirt (Vt. 7) 7; 2 vacancies (Md.):—total 286. For Vice President; M. Van Buren 189; John Sergeant 49; Wm. Wilkins (Pa. 30) 30; Henry Lee (S. C. 11) 11; Amos Ellmaker (Vt. 7) 7:—total 286.

13th, 1837. For President; M. Van Buren 170; Wm. H. Harrison 73; Hu. L. White 26; Daniel Webster 14; W. P. Mangum 11:—total 294. For Vice President; R. M. Johnson 144; Francis Granger 77; John Tyler 47; Wm. Smith 23:—total 294.

14th, 1841. For President; W. H. Harrison 234; M. Van Buren 60:—total 294. For Vice President; John Tyler 234; R. M. Johnson 48; L. W. Tazewell 11; J. Polk 1:—total 294.

POPULAR VOTE; 1837 AND 1841.

II. CONGRESS.

1. Table of Population and Apportionment For the 28th Congress.

STATES.	Total population, of descriptions.	Total slaves, two-fifths to be deducted.	Population to be represented,	Fractions: those which are represented being marked R.	No. of Representatives in 28th Congress.	Number of Electors of President.
Maine,	501,793	_	501,793	7,033	7	9
New Hampshire, .	284,574	1	284,573	1,853	. 4	6
Massachusetts, .	737,699		737,699		10	12
Rhode Island,	108,830	5		38,148 R.	2	4
Connecticut,	309,978	17	309,971		4	6
Vermont,	291,948	_	291,948		4	6
New York,	2,428,921	4	2,428,919	25,799	34	36
New Jersey,	373,306	674	373,036	19,636	5	7
Pennsylvania,	1,724,033		1,724,007	27,687	24	26
Delaware,	78,085		77,043	6,363	1	3
Maryland,	470,019	89,737	434,124	10,044	6	8
Virginia,	1,239,797	448,987	1,060,202	2	15	17
North Carolina, .		245,817			9 7	11
South Carolina, .		327,038	403,382	39,502 R.		9 10
Georgia,	500 556	280,944	579,014	65 069 D	8 7	9
	275 651	253,532 195,211	297,566	65,263 R.	4	6
Mississippi, Louisiana,		168,452			4	6
Tennessee,		183,059		49,186 R.		13
Kentucky,		182,258	706,924	124	10	12
Ohio,	1,519,457	3		35 185	21	23
Indiana,	685,866	3	685.864	49,744 R.		12
Illinois,	476,183	331		51,970 R		9
Missouri,	383,702	58,240			5	7
Arkansas,	97,574				1	3
Michigan,	212,267		212,267		3	3 5
	, , , , ,		,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,		223	275

The following table shows the total number of members by the different ratios since the adoption of the Constitution:

Year	1789,	Fixed by the	Co	nstitution,	65	members.
**	1793,	Ratio	of	33,000,	105	46
46	1803,			33,000,	141	66
"	1813,	"		35,000,	181	_ "
66	1823,	"		40,000,	212	"
66	1833,	"		47,700,	242	* "
**	1843,	"		70,680,	223	"

^{*} Including Michigan and Arkansas, admitted into the Union in 1836.

2. Congress.

THE Congress of the United States consists of a Senate and House of Representatives, and must assemble at least once every year, on the 1st Monday of December, unless it is otherwise provided by law.

The Senate is composed of two members from each State; and of course, the regular number is now 52. They are chosen by the legislatures of the several States, for the term of six years, one third of them being elected biennially.

The Vice President of the United States is the President of the Senate, in which body he has only a casting vote, which is given in case of an equal division of the votes of the Senators. In his absence a President, pro tempore, is chosen by the Senate.

The House of Representatives is composed of members from the several States, elected by the people, for the term of two years. The Representatives are apportioned among the different States, according to population. The 28th Congress is chosen according to the act of Congress of 1842, the ratio being "one Representative for every 70,680 persons in each State, and of one additional Representative for each State having a fraction greater than one moiety of the said ratio, computed according to the rule prescribed by the Constitution of the United States." The law of 1842 also requires, that the Representatives of each State "shall be elected by districts composed of a contiguous territory equal in number to the number of Representatives to which said State may be entitled, no one district electing more than one Representative." The present number is 223 Representatives, and 3 Delegates.

Since the 4th of March, 1807, the compensation of each member of the Senate and House of Representatives has been \$8 a day, during the period of his attendance in Congress, without deduction in case of sickness; and \$8 for every twenty miles' travel, in the usual road, in going to and returning from the seat of government. The compensation of the President of the Senate, pro tempore, and of the Speaker of the House of Representatives, is \$16 a day.

TWENTY-EIGHTH CONGRESS. THE SENATE.

WILLIE P. MANGUM, of North Carolina, President pro tempore.

^{*} Corrected at the Department of State, July 20, 1844.

h do.

Mr. Justice Mc Kinley.

CIRCUIT COURTS.

The United States are divided into the following nine judicial circuits, in ach of which a Circuit Court is held twice every year, for each State within he circuit, by a Justice of the Supreme Court, assigned to the circuit, and by the District Judge of the State or District in which the Court sits.

Presiding Judge. st Circuit, Maine, New Hampshire, Mass. and R. I., Mr. Justice Story. d do. Vermont, Connecticut, and New York. d New Jersey and Pennsylvania. do. Delaware, Maryland, and Virginia, Mr. Chief Just. Taney. th do. th Alabama and Louisiana, Mr. Justice Daniels. do. N. Carolina, S. Carolina, and Georgia, Mr. Justice Wayne. th do. Ohio, Indiana, Illinois, and Michigan, Mr. Justice McLean. h do. Kentucky, Tennessee, and Missouri, Mr. Justice Catron. th do.

There is a local Circuit Court held by three Judges in the District of Columia, specially appointed for that purpose. The Chief Justice of that Court sits so as District Judge of that District.

MILITARY GEOGRAPHICAL DEPARTMENTS.

The order districting the United States into nine military departments is rescinded, and the country is hereby divided into two military geographical divisions, the boundaries of which will be the same as those established at the reduction of the army in 1821, with the exception of the present 4th and 9th military departments, which will not be included in either division.

Western Division. — The country west of a line drawn from Fond du Lac, Lake Superior, to Cape Sable, Florida, and embracing the part of Wisconsin Territory west of said line, lowa Territory, the States of Illinois, Missouri, Kentucky, Tennessee, Arkansas, Louisiana, Mississippi and Alabama, West Florida, and the Indian country West of the Mississippi river

Eastern Division. — The States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, and Georgia.

4th Military Department. - The States of Ohio, Indiana, and Michigan, and that part of Wisconsin Territory not included in the Western Division.

9th Military Department. - East and Middle Florida.

Until otherwise directed, the present arrangement of Military Departments Nos. 1, 2, 3, 5, 6, 7, and 8, | See Almanac for 1844, page 129, | will be continued, and the senior officer in each will report to and receive instructions from the commanders of divisions.

Brevet Major General Gaines is assigned to the command of the Western, and Brigadier General Wool to the command of the Eastern division, and will, for the present, establish their head quarters, respectively, at New Orleans, La., and Troy, N. Y.

The head quarters of departments will remain as now established, except the head quarters of the 5th department, which will be at Fort Columbus, N. Y.

The regular force, as now authorized by law, consists of 716 commissioned officers, 17 storekeepers, 40 sergeants, 250 enlisted men for the ordnance service, and 7,590 non-commissioned officers, musicians, artificers, and privates; making an aggregate of 6,613 men.

West Point Academy.

A statement transmitted to Congress shows, that the number of cadets admitted into the institution since its establishment, is 2,942 Of which have graduated, 1,206 Disbanded, or dismissed, 33 Resigned before graduation, 61 Killed in service, 11 6 Died in service, Declined commissions, 147 323 Now in service, Resigned, 542

Of those now in service, there are 4 colonels, 6 lieutenant colonels, 13 majors, 173 captains, 170 first lieutenants, 131 second lieutenants, 70 brevet second lieutenants, 5 paymasters, and 1 military storekeeper.

The amount appropriated for the institution, since its establishment, for buildings, l.brary, apparatus, &c., is, \$711,399 88 For salaries, pay, subsistence, &c,

Total,	142,295	11,146,229	18,414,174	5,692,402	35,252,805	2,947,319
Cost,		\$602,064	\$1,611,568	\$733,687	\$2,947,319	

Additional expenses of mail agencies incident to the railroad and steamboat mails, and payable under the head of transportation, \$28,965.(c)

A change has been adopted in the preparation of this table, to make it conform to the mode of keeping the accounts in the Auditor's office, and occasional reports furnished from time to time. The entire service and pay of the route is set down to the State under which it is numbered, though extending into other States, instead of being divided among the States in which each portion of it lies. This change is necessary to prevent the seeming discrepancies that must appear in every instance, and are liable to be taken as evidence of gross error in the statement.

 ⁽a) The steamboat route on Lake Champlain is under a New York number.
 (b) The Baltimore, Wilmington & Philadelphia railroad is under a Maryland number.
 (c) The other expenditures incident to transportation, such as amounts paid for ship, steamboat, and way letters, locks, &c., are not included in this table, because they are the subjects of separate appropriation and account.

From a report transmitted to the Senate by the Postmaster General, of the number of paid and unpaid letters, free letters, drop letters for delivery; regular newspapers subject to postage; do. free of postage; do. occasional or irregular; pamphlets and magazines, periodical; do. not periodical, which passed through the post offices in the United States during the month of October, 1843, and an estimate for the year based thereon, with other information in the possession of the Department, we have compiled the following abstract:

	In October.	The Year.
Number of letters subject to postage,	2,022,296	24,267,552
Number of free letters,	234,641	3,015,692
Number of drop letters for delivery,	85,542	1,026,504
Regular newspapers subject to postage,	3,027,879	36,334,548
" free,	596,760	7,161,120
Occasional or irregular, Pamphlets and magazines, periodical,	518,676 134,646	6,224,112
" " not periodical,	24,588	295,056

^{*} The Revenue of the Post-Office Department is derived chiefly from postage; a trifling amount is received from penalties for violations of the post-office laws. The Expenditures of the Department consist of the items for compensation of postmasters, transportation of the mail, and certain other miscellaneous expenses.

4. RATES OF POSTAGE.

On a Single Letter, composed of one piece of paper.

For any distance, not exceeding	30 miles,	6 cents
Over 30, and not exceeding	80 "	10 "
Over 80, and not exceeding	150 "	121/2 "
Over 150, and not exceeding	400 "	183/4 "
Over 400,		25 "

A Letter composed of two pieces of paper, is charged with double these rates; of three pieces, with triple; and of four pieces, with quadruple. "One or more pieces of paper, mailed as a letter, and weighing one ounce, shall be charged with quadruple postage; and at the same rate, should the weight be greater." "Letter postage is to be charged on all hand-bills, printed or written; prices current, sealed or unsealed; prospectuses, proposals for new publications, circulars, lottery-bills and advertisements, blank forms, sheets of music, deeds, law processes, policies of insurance, and manuscript copy for publication. You will also charge letter postage on all packets that are closely enveloped and sealed, so that what they contain cannot be known." Instructions of the Postmaster General.

Newspaper Postage.

For each Newspaper, not carried out of the State in which it is published, or, if carried out of the State, not carried over 100 miles, 1 cent. Over 100 miles, and out of the State in which it is published, 1½ cents.

Magazines and Pamphlets.

If published periodically, dist. not exceeding 100 miles, 1½ cts. p. sheet.

Do. do. distance over 100 " 2½ " "

If not pub. periodically, dist. not exceeding 100 " 4 " "

Do. do. distance over 100 " 6 " "

"Every Printed Pamphlet or Magazine which contains more than twenty-four pages, on a royal sheet, or any sheet of less dimensions, shall be charged by the sheet; and small pamphlets, printed on a half or quarter sheet, of royal or less size, shall be charged with half the amount of postage charged on a full sheet." "A pamphlet is a small unbound printed book. A magazine is a pamphlet published periodically in numbers, containing articles on science, literature, politics, news, &c. You will charge periodical pamphlet postage on magazines, almanacs, college catalogues, and annual reports or minutes of societies." Instructions of the Postmaster General.

The postage on Ship Letters, if delivered at the office where the vessel arrives, is six cents; if conveyed by post, two cents in addition to the ordinary postage.

5. PRIVILEGE OF FRANKING.

Letters and packets to and from the following officers of the government are by law received and conveyed by post, free of postage;

The President and Vice President of the United States; Secretaries of State, Treasury, War, and Navy; Attorney General, Postmaster General, and Assistant Postmaster General; Comptrollers, Auditors, Register, and Solicitor of the Treasury; Treasurer; Commissioner of the General Land Office; Commissioners of the Navy Board, Commissary General; Inspectors General; Quartermaster General; Paymaster General; Superintendent of the Patent Office; Speaker and Clerk of the House of Representatives; President and Secretary of the Senate; and any individual who shall have been, or may hereafter be, President of the United States; and each may receive newspapers by post, free of postage.

Each member of the Senate, and each member and delegate of the House of Representatives, may send and receive, free of postage, newspapers, letters, and packets, weighing not more than two ounces, (in case of excess of weight, the excess alone to be paid for,) and all documents printed by order of either House, from the period of sixty days before he takes his seat in Congress, till the next meeting of the next Congress.

Postmasters may send and receive, free of postage, letters and packets, not exceeding half an ounce in weight; and they may receive one daily newspaper each, or what is equivalent thereto.

Printers of newspapers may send one paper to each and every other printer of newspapers within the United States, free of postage, under such regulations as the Postmaster General may provide.

IX. PUBLIC LANDS.

1. Quantities, Surveys, Sales, Reservations, &c., of the Public Lands.

[From a Report made by the Treasury Department to Congress, in 1843.]

Estimated quantity of land yet to be sold, including the unceded territory south of latitude 49°, - - - 1,084,064,993

Deduct reservations, - - - - - - - 7,526,779

Leaving - - - - - - - - - - - 1,076,538,214

987,852,332

Acres.
Value, at \$1 25 per acre, \$1,345,672,767 50
Of the above quantity, the Indian title is
extinguished to 367,947,165
Unextinguished, 716,117,828
Surveyed, 272,646,356
Unsurveyed, 811,418,637
Of the Public Lands there have been sold
107,796,536 acres, bringing \$170,940,942 62
Paid for Indian title, Florida and Louis-
iana purchase, including interest, - \$68,524,991 32
Paid for surveying and selling, including
pay of salaries and fees, 9,966,610 14
WO 401 401 401
Balance, being the net funds derived 78,491,601 46
from the public lands, \$92,449,341 16
In addition to lands sold, there have been granted for internal improve.
ment, education, military services, reservations, &c., 33,756,559 acres.
Acres.
Of the Public Lands, Virginia, New York, Massachusetts,
and Connecticut, ceded 169,609,819
Georgia ceded 58,898,522
North and South Carolina ceded 26,432,000
Tior and Country Courses

Total,	1,838,273 26

No. 1. An Act to supply a deficiency in the appropriation for the fiscal year ending June 30, 1844, for the relief and protection of American Seamen. See abstract on page 144. Jan. 22, 1844.

No. 2. An Act to authorize the President of the United States to direct transfers of appropriations in the Naval service, under certain circumstances. From unexpended appropriations for the naval service, \$200,000 may be transferred to the appropriation for the increase, repairs, armament, &c., of the navy; provided, that balances be not taken from the appropriations for navy yards, nor any transfer be made which will afterwards require another appropriation to supply the deficiency. Feb. 23, 1844.

No. 3. An Act changing the time of holding the Courts at Clarksburg and at Wheeling, in the Western District of Virginia, and the Circuit Court of the United States for the District of Arkansas. See pp. 105, 108. March 4, 1844.

No. 4. An Act to repeal the Act entitled "An Act to amend the Act of March 10, 1838, entitled 'An Act to change the time of holding the Circuit and District Courts in the District of Ohio." See pp. 105, 109. March 4, 1844.

No. 5. An Act to amend the Act entitled "An Act to establish branches of the Mint of the United States." The oath required may be taken before the judge of any court of record in the State where the branch is situated. April 2, 1844.

No. 6. An Act directing the disposition of certain unclaimed goods, wares. or merchandise, seized for being illegally imported into the United States. The collector shall make a list in duplicate of goods that are seized, describing them, and shall cause them to be appraised by two sworn appraisers, who shall receive \$1.50 a day each. If the value appraised be \$100 or less. the collector shall advertise the goods for three weeks, requiring the owners to appear and claim them within ninety days. The claimants may give a bond to the United States for \$250, with two sureties, providing that, in case of condemnation, they will pay costs and expenses, and the bond shall be given to the District Attorney, who shall proceed thereon. If no claim be made, or no bond given, within the time specified, the collector shall give twenty days notice of sale, and at the end of that time shall sell the goods, and deposit the proceeds to the credit of the Treasury. Within one year after the sale, the claimant may apply for a remission of forfeiture, if he can show that he was in such circumstances as not to know of the seizure, and that the forfeiture was made without

negligence on his part; and the Secretary of the Treasury, upon satisfactory proof, may grant this application, and restore the proceeds of the sale. If no such application be made within a year, the proceeds shall be distributed according to law. April 2, 1844.

No. 7. An Act requiring one of the Judges of the Circuit Court for the District of Columbia, hereafter to reside in Alexandria. When a vacancy shall occur in this Court, the Judge to be appointed shall reside in Alexandria, and afterwards one shall always reside there. The Judges may exchange residences, if they see fit. April 4, 1844.

No. 8. An Act to repeal so much of the Act approved Aug. 23, 1842, as requires the second regiment of dragoons to be converted into a regiment of riflemen, after March 4, 1843. The riflemen are to be remounted, and called the second regiment of dragoons. April 4, 1844.

No. 9. An Act to change the time of holding the Spring term of the District Court of the United States for the Eastern District of Virginia, and of the Circuit Court of Alabama. See pp. 105, 108. April 12, 1844.

No. 10. An Act making appropriations for the support of the Military Academy for the fiscal year ending, June 30th, 1845. See abstract on page 144. April 4, 1844.

No. 11. An Act making an appropriation of certain moneys in the Treasury for the naval service. See abstract, (sales of condemned naval stores,) page 144. April 22, 1844.

No. 12. Appropriations for pensions. See abstract on page 144. April 30, 1844.

No. 13. An Act giving the assent of Congress to the holding of an extra session of the Legislative Assembly of the Territory of Iowa. An extra session may be held in June, 1844, but the expenses of it shall not be paid by the United States. April 30, 1844.

No. 14. An Act for the relief of citizens of towns upon the lands of the United States, under certain circumstances. When any part of the public lands has been settled as a town site, and therefore not subject to entry under the preëmption laws, the corporate authorities thereof, or the county Judges of its county, may enter at the minimum price the land as settled in trust for the benefit of the occupants thereof, the execution of which trust, as to the disposal of the lots, &c., shall be regulated by the legislative authority of the State or Territory wherein it is situated; but the entry must be made before the public sale of the land, and shall include only such land as is actually occupied, and be made according to the act of April 24, 1820, and shall not exceed 320 acres. The authorities of the town of Weston, in the State of Missouri, shall be allowed a year from the passage of this act to enter their lands. May 23, 1844.

No. 15. An Act to authorize the transfer of the names of pensioners from the agencies in the State of Kentucky to the agency in Cincinnati, in the State of

Ohio. Such transfers may be made on the application of the pensioners. May 23, 1844.

No. 16. An Act relating to the Port of entry in the District of Passamaquoddy, in the State of Maine. The port constituted under the act of March 3, 1803, shall also be a port of entry for vessels arriving from the Cape of Good Hope, and from places beyond. May 31, 1844.

No. 17. An Act to amend the Judiciary Act passed September 24, 1789. Final judgments in any circuit court in any civil action brought by the United States, for the enforcement of the revenue laws, may be reëxamined in the U. S. Supreme Court, upon writ of error, as in other cases, without regard to the sum in controversy, at the instance of either party. May 31, 1844.

No. 18. Appropriations for fortifications. See abstract on page 144.

No. 19. An Act directing a disposition of the maps and charts of the survey of the coast. The Secretary of the Treasury may dispose of them at such prices as he shall see fit. Copies of each sheet, not exceeding 300, may be given to such foreign governments, departments of our own governments, and literary and scientific associations, as he shall direct. June 3, 1844.

No. 20. An Act to alter the places of holding the District Court of the United States for the District of New Jersey. See page 108. June 4, 1844.

No. 21. An Act relating to bonds to be given by Custom House Officers. The bonds required must be given before they are qualified to enter on the performance of their duties. June 4, 1844.

No. 22. Appropriations for the improvement of harbors and rivers. See abstract on page 144. June 11, 1844.

No. 23. An Act to amend an Act entitled "An Act to reorganize the General Land Office." The office of Solicitor of the Land Office is abolished; the duties formerly required of him shall be performed by the Recorder of the Land Office, or by such other persons as the Land Commissioner shall direct. June 12, 1844.

No. 24. An Act to establish a port of delivery at the city of Lafayette, in the State of Louisiana. The city shall be a port of delivery, and a surveyor shall be appointed there; vessels bound to it shall first make entry at New Orleans, and then may unlade at Lafayette, according to the directions of law and of the Secretary of the Treasury. Vessels about to depart from Lafayette, shall clear out with their cargoes at the customhouse in New Orleans, and depart as from New Orleans. Goods shall be entitled to drawback in the same way as if exported from New Orleans. June 12, 1844.

No. 25. An Act relating to the unlading of foreign merchandise on the right bank of the river Mississippi, opposite New Orleans. Foreign salt may be unladen at any point on the right bank, between the upper and lower limits of the municipalities of New Orleans. June 12, 1844.

No. 26. An Act for repairing the roof of the Court House in Alexandria. \$550, and the proceeds of the sale of the zinc with which it is now covered, are appropriated for covering the roof with tin. June 15, 1844.

No. 27. An Act granting a section of land for the improvement of Grant river, at the town of Potosi, in Wisconsin Territory. Section 34, in township 3 North, in range 3 West, of the fourth principal meridian, is granted for said purpose, the land to be sold under direction of the legislature of the Territory, reserving preëmption rights to actual settlers. The Surveyor general of Wisconsin shall appoint three commissioners to estimate the value of the lots without taking into view the improvements on them; and the occupants may secure their lots by paying said assessed value within one year. The compensation of the commissioners shall not exceed \$120. June 15, 1844.

No. 28. An Act relating to certain collection districts, and for other purposes. Ipswich, Mass., St. Mary's, and Snow Hill, Md., Folly Landing, and East River, Va., and Sunbury, Hardwick, and Brunswick, Ga., are abolished as separate collection districts, and are constituted ports of delivery. They shall be annexed to other districts, as follows: Ipswich to Newburyport, St. Mary's to Annapolis, Snow Hill to Vienna, Folly Landing to Cherrystone, East River to Yorktown, Sunbury and Hardwick to Savannah, and Brunswick to St. Mary's. The following ports of delivery are discontinued: Chester and Nanjemoy, Md., South Quay, Va., Hertford, Murfreesborough, and Swansborough, N. C. The office of assistant collector to reside at Jersey, N. J., is abolished. The port of entry for the district of Pearl river, Miss., shall be at Shieldsborough instead of Pearlington, which is made a port of delivery. The district of Mississippi shall be hereafter called the district of New Orleans. June 15, 1844.

No. 29. An Act to establish a Navy Yard and Depot at or adjacent to the city of Memphis, on the Mississippi river, in the State of Tennessee. \$100,000 are appropriated to purchase the site and erect the buildings; and the President is empowered to purchase the necessary water-rights, and to receive donations of land, water-rights, &c. June 15, 1844.

No. 30. An Act for the relief of the widows and orphans of the officers, seamen, and marines of the United States schooner Grampus, and for other purposes. In order to fix the time for the commencement of the pensions, March 20, 1843, shall be deemed the day on which the Grampus was lost, and May 1, 1839, shall be deemed the day on which the Sea Gull was lost. If any of the men shall have left no widow, and there be children under sixteen years of age, the pension to which the widow would have been entitled shall go to the children for a like period of five years. In case, also, of the death or intermarriage of the widow, the pension shall go to the children, and shall cease, if they die before the expiration of the five years. The accounts of James S. Thacher, the purser who was lost in the Grampus, shall be settled, and a credit allowed for whatever sum may

appear to be due from him on the books of the Treasury Department. June 15, 1844.

No. 31. An Act to repeal an Act entitled "An Act directing the survey of the northern line of the reservation for the half-breeds of the Sac and Fox tribes of Indians, by the treaty of August 1824," approved March 3, 1843. The act is repealed, and the northern line, as run and marked by Jenifer S. Sprigg, in 1832 and 1833, is approved and established as the correct northern boundary. June 15, 1844.

No. 32. An Act to authorize the selection of certain school lands in the Territories of Florida, Iowa, and Wisconsin. Wherever the sixteenth sections may be included in private claims held by good titles, other and equivalent lands, in any land district most adjacent, may be selected in lieu thereof, and shall be entered in the register's office as school lands. June 15, 1844.

No. 33. An Act granting to the county of Dubuque certain lots of land in the town of Dubuque. Two lots and a half are thus granted, situated on the corner of Seventh and Locust streets, on which the old county jail now stands. June 15, 1844.

No. 34. An Act to confirm to the city of Fernandina, in Florida, certain lots reserved for public use by the Spanish Government. Lots 5 and 7, of block 2, are thus confirmed and relinquished for such uses as were designed in the original plan of said city. June 15, 1844.

No. 35. Appropriations for (widows') pensions. See abstract on page 144. June 15, 1844.

No. 36. An Act to test the utility of the submarine telescope. The Secretary of the Navy shall cause proper experiments to be made, the expense not to exceed \$2,000. June 15, 1844.

No. 37. An Act making appropriations for certain improvements on the western shore of Lake Michigan. \$12,500 appropriated, to construct a harbor at Southport, in Wisconsin. June 15, 1844.

No. 38. An Act making appropriations to aid in completing the harbor at Racine, on the western shore of Lake Michigan. \$12,500 appropriated to aid in completing the harbor. June 15, 1844.

No. 39. Post-Office Department appropriation bill. See abstract on page 144. June 15, 1844.

No. 40. An Act transferring the execution of a certain act from the Secretary of the Treasury to the Secretary of War. The act for transferring the names of pensioners, approved May 23, 1844, is thus transferred. June 15, 1844.

No. 41. Appropriations for certain (naval) objects of expenditure,—chiefly for arrearages and deficiences. See abstract on page 145. June 15, 1844.

No. 42. An Act to establish certain post roads in the Territory of Florida. Seven new roads established. June 15, 1844.

No. 43. An Act making appropriations for certain improvements in the Territory of Iowa. See abstract on page 145. June 15, 1844.

No. 44. An Act making appropriations for certain improvements in the Territory of Florida. See abstract on page 145. June 15, 1844.

No. 45. An Act to provide for the erection of a marine hospital at Key West, in the Territory of Florida. \$25,000 appropriated. June 15, 1844.

No. 46. An Act to authorize the Legislatures of the several Territories to regulate the apportionment of representation, and for other purposes. They may apportion the representation in the two branches, from time to time, as they see proper; but not so as to increase the number in the two bodies. Justices of the peace and all general officers of the militia, in the Territories, shall be chosen by the people in such manner as the Legislatures may direct. June 15, 1844.

No. 47. An Act to authorize the issuing of patents for certain lands in the St. Augustine land district, in Florida, the sales of which were not regularly reported. Individuals who applied to John C. Cleland, while acting as receiver at St. Augustine, for the entry of lands, and had made payment therefor, while he neglected to make the usual returns thereof, to the General Land Office, shall receive patents for such lands, if they have not been sold; in which case, the money paid shall be applied to the entering of any other land in the district. But this act shall apply only to those cases in which application has already been made to the General Land Office. June 15, 1844.

No. 48. An Act to amend an Act entitled " An Act to provide for the armed occupation and settlement of the unsettled part of the peninsula of Florida." When the location was made on lands afterwards discovered to be liable to overflow, the location may be changed to any other vacant quarter section in the district, if application for change was made before August 4, 1843. When settlements were made on lands not previously surveyed, the settler may, after survey, locate his quarter section in any legal subdivisions of contiguous sections, so as to make up 160 acres, and include his improvements. Settlers under said act may erect their buildings on other than the quarter section described in their permit, if they enter this other land, and pay for it, if in market; or if otherwise, if they enter it within three months after it is offered at public sale: provided also, that the condition of cultivation be complied with. If the title of the United States to the land, or to any part of it not less than 40 acres, be defective, an equally large tract may be located elsewhere upon vacant surveyed lands. After the settler has complied with all the requirements of the act to which this is an amendment, he may perfect his title to the quarter section by paying \$1.25 per acre for it. June 15, 1844.

No. 49. An Act making appropriations for the support of insane persons in the District of Columbia, and for other purposes. \$400,000 appropriated for this purpose, the money paid for each person not to exceed four dollars a

week. The marshal of the District may maintain at Baltimore, or at some other suitable lunatic asylum, all lunatic paupers now chargeable upon the District of Columbia, and pay the expenses of their removal and maintenance in such asylum. The insane hospital, with the adjoining grounds, is granted to the Medical Faculty of Columbia College, for scientific purposes, and for an infirmary for medical instruction; they giving security to keep the building in repair, and to return it in good order to the government when required. June 15, 1944.

No. 50. An Act making appropriation for the payment of horses lost by the Missouri volunteers in the Florida war. \$34,500 appropriated, the value of the horses to be ascertained according to the acts for preventing Indian hostilities, approved March 3, 1839, and for appropriations for the support of the army, approved March 3, 1839. The act to provide for the payment of horses, approved Jan. 18, 1837, is continued in force for a farther period of two years. June 15, 1844.

No. 51. An Act to confirm certain entries of land in the St. Augustine land district, in the Territory of Florida, made under the preemption law of June 22, 1838. Patents shall be issued in all such cases, in spite of any informality in the proof, if the settlers were driven from their homes by Indian hostilities, and thus prevented from making out the proof. June 15, 1844.

No. 52. An Act to provide for the adjustment of land claims within the States of Missouri, Arkansas, and Louisiana, and in those parts of the States of Mississippi and Alabama, south of the 31st degree of North latitude, and between the Mississippi and Perdido rivers. So much of the expired act of May 26, 1824, as related to the State of Missouri, is hereby revived and reënacted for that State, and for the other States above mentioned, the District courts and its judges having the same jurisdiction in each of these States as was given by that act to the Court and Judge of Missouri. June 17, 1844.

No. 53. An Act concerning the Supreme Court of the United States. The sessions of this Court shall commence in future on the first Monday of December. No Justice shall be obliged to attend more than one term of the Circuit Court in any district within one year, or unless he thinks the public interest requires it; and at such term, appeals, and writs of error from the District Court, questions of law reserved by the District Judge, and cases of peculiar interest and difficulty, shall have the precedence in the arrangement of business. June 17, 1844.

No. 54. An Act respecting the northern boundary of the State of Missouri. Three commissioners shall be appointed, one by the Governor of Iowa, one by Missouri, and a third, not a citizen either of Iowa or Missouri, appointed by these two, who shall ascertain and mark out the boundary line. The commissioners may appoint a surveyor, and the necessary assistants to aid them; the compensation of the commissioners and surveyor shall be eight dollars a day; and of the assistants, not more than

two dollars a day. The report of any two of the commissioners shall be final. This act shall not go into force till the Missouri legislature assent to it. \$4,000 are appropriated to carry this act into effect. June 17, 1844.

No. 55. An Act to extend the charters of the District banks. Suits at law now pending against the banks whose charters expire July 4, 1844, shall not be estopped by the expiration of the charter, and all goods which would have become the property of the banks, shall enure to their trustees, assignees, or receivers. Said trustees may institute all necessary suits at law, first giving security for the costs. June 17, 1844.

No. 56. An Act to enable the War Department to apply certain balances of appropriation, and for other purposes. Unexpended balances of appropriations, under the acts of April 29, 1836, June 12, 1838, and March 3, 1839, even if they have been carried to the surplus fund, are re-appropriated, to settle arrearages for the suppression of Indian hostilities, so far as they may be necessary. June 17, 1844.

No. 57. An Act to amend the Act entitled " An Act to incorporate the Alexándria Canal Company," approved May 26, 1830. Any person doing wilful injury to the canal, shall be fined not less than \$5, nor more than \$50, to be recovered with costs before any justice of the peace of the District of Columbia, and be subject also to a suit for damages. No person not employed in navigating the canal, or in the service of the company, shall walk, or drive upon their aqueduct over the Potomac, under a fine of not less than \$1, nor more than \$5. The president and directors may make by-laws for the trade and travel upon the canal, not repugnant to any law of the United States; and any person wilfully offending against any such by-law, after ten days' public notice of it has been given, shall forfeit \$5 to the company. They may prescribe the form, dimensions, and equipments of any boats or floats used on the canal, and if the captain or owner refuse to comply with their regulations, they may order the same to be broken up and removed from the canal. They may charge the customary rates of dockage and wharfage on any pier they may erect in the Potomac, in connection with their canal, not interfering with the corporate rights of Alexandria. June 17, 1844.

No. 58. An Act supplementary to an Act entitled "An Act to regulate arrests on mesne process in the District of Columbia," approved Aug. 1, 1842. No person shall be held to bail, if the debt, exclusive of interest and cost, be less than \$50, and in cases where he may be held to bail under the act to which this is a supplement. But if the plaintiff, after obtaining judgment, shall make oath that the defendant has conveyed away his property, or is about to move it out of the District, with intent to hinder payment of his debts, the clerk of the county court may issue a capias ad satisfaciendum, and on the defendant's arrest under it, he may be brought by habeas corpus before the county court, or one of its justices, to whom

the plaintiff must show cause why the defendant should not be released; either party may then demand a trial by jury, and if they find for the plaintiff, the defendant may be remanded to prison. But females shall not be kept in custody, nor non-residents for debts contracted out of the District. Processes already in the hands of the marshal shall be executed. June 17, 1844.

No. 59. An Act concerning conveyances or devises of places of public worship in the District of Columbia. Land conveyed to trustees for the use of a congregation as a place for public worship, shall be held by the trustees for the purpose of the trust, and not otherwise. If any such conveyance or devise has been or shall be made, it shall not be voided from the want of trustees to hold it, but the Circuit Court of the District shall appoint trustees, either originally, when there are none, or to fill vacancies from death, refusal, &c., and the legal title shall be exclusively vested in the whole number of trustees. A majority of the trustees may sue and be sued, without abatement by the death of any, or the substitution of others. They shall not hold in this way a tract of more than 50 acres in the county, or 3 acres in any incorporated town; nor for any other purpose than public worship, religious or other instruction, burial-ground, or residence of their minister. June 17, 1844.

No. 60. An Act to continue the pensions of certain widows. The act of March 3, 1843, granting pensions to certain widows, is extended for a further term of four years. Widows admitted by special acts to the benefit of the pension act of July 7, 1838, or of the act hereby extended, shall be entitled to the benefit of this act.

No. 61. An Act supplementary to the Act entitled "An Act to regulate trade and intercourse with the Indian tribes, and to preserve peace on the frontiers," passed June 30, 1834. The U.S. Courts in the District of Arkansas shall have the same jurisdiction over crimes committed in the Indian country, as they had before the Territory was changed into the State of Arkansas; and the Indian country is annexed to the State of Arkansas, for the sole purpose of carrying this Act into effect. June 17, 1844.

No. 62. An Act explanatory of the treaty made with the Chippewa Indians at Saginaw, Jan. 23, 1838. The first and second articles of this treaty shall be so construed, that, after Sept. 1, 1843, the minimum price of the lands ceded by it shall be \$2.50 an acre. June 17, 1844.

No. 63. Civil and Diplomatic appropriation bill. See abstract on page 144. June 17, 1844.

No. 64. Army appropriation bill. See abstract on page 144. June 17, 1844.

No. 65. Navy appropriation bill. See abstract on page 144. June 17, 1844.

No. 66. Indian Department appropriation bill. See abstract on page 144. June 17, 1844.

XII. MISTAKES IN THE CENSUS OF 1840.

THE last three volumes of the American Almanac contain copious abstracts of the information collected in the course of taking the sixth census. It was deemed proper to insert them, as the document was of high official authority, containing information that had been collected with great labor and expense, and which, if it had been correct, or even a tolerable approximation to the truth, would have been of vast importance. The returns showed the results of an attempt, made under the natronage and direction of the General Government, to give a complete statistical survey of the United States. As such, great reliance was placed upon them, and arguments and deductions have been drawn from them in support of legislative and diplomatic proceedings of great moment. It is not too much to say, that this confidence was wholly misplaced, and that subsequent examination has shown the returns to be so very inaccurate, that any conclusions founded upon them are entirely unsafe. In respect to the mere enumeration of the inhabitants, perhaps, they may be trusted; though, even in this respect, in the case of a single county in Maryland, that of Montgomery, a reëxamination ordered by Congress showed an error of 800 in a population of 15,000, or more than five per cent.

In publishing the statistics of the census in the American Almanac for 1843, before any of the blunders had been publicly exposed, we stated, that "the information here given can be considered only as an approximation to the truth," that "there were some errors and deficiencies in the plan, and unavoidable mistakes and defects in carrying it into execution." Later scrutiny of the returns has shown the truth of these remarks in a greater degree even than we had anticipated. The scheme for taking the census and collecting the statistics was very unskilfully prepared; questions were propounded to individuals, that they could not, or would not, answer; replies were given at random; culpable negligence was shown by the marshals and their subordinates in committing these answers to paper; and, to crown the whole, the returns were printed by the official printers at Washington in such a manner, that the typographical errors probably outnumbered the mistakes in the original papers. And these erroneous results have been embodied in a great number of publications, have been copied and commented upon in Europe, and have had a sensible influence on the legislation and diplomacy of this country. Blunders committed by high authority, are apt to produce very wide and injurious effects.

The general scheme of the census was faulty, as it involved the hopeless attempt to collect information of immense extent, variety, and minuteness. It was proposed to ascertain "the aggregate value and produce of the mines, agriculture, commerce, and manufactures of the country, and the number of persons employed in them," and thereby to exhibit "a full view of the pursuits, industry, and resources of the several States and

Territories." No European government ever attempted to execute so broad a plan as this, for the obvious reason, that its execution, with an ordinary degree of correctness, is impossible. In our volume for 1843, we remarked, that "all persons are not willing to make a full disclosure of their private concerns, their annual profits and amount of capital invested, especially when an undefined apprehension exists, that the facts thus obtained will be made the basis of future taxation. In certain respects, concealment is impossible, and the returns are probably very accurate. The number of manufactories and machines, of persons employed, and, in many cases, the quantity of annual products, may be ascertained with great correctness. But the valuation of these articles must be quite arbitrary, and the statements of the amount of capital invested deserve little or no credence. In future attempts, it will be well to confine the inquiries to those points, on which individuals are able and willing to give full and precise information."

On the other hand, the plan was a very defective one, as it did not provide for collecting many kinds of information, that are quite accessible, which might be obtained with great accuracy, and which would have been of vast importance. In a country like this, it is very desirable to know the extent and direction of the great streams of immigration. The inhabitants should have been divided into those of native and of foreign origin, specifying in the latter case the countries whence they had emigrated. Other classes might be formed of those who were born in the State where they resided, and those who had removed into it from other parts of the United States. The number of buildings used as places of residence can easily be counted, and they should be divided into those constructed of brick, stone, framed work, and logs. The number of buildings used for purposes of public worship can easily be ascertained, and the religious denominations specified, to which they respectively belong. On these, and a great variety of other topics, precise information can be had, and it would be of great use.

In a former article upon the subject, we stated, that "government might do much for the progress of statistical knowledge, if it would organize and support a Statistical Bureau, connected with one of the Departments at Washington, whose duty it should be, not only to contrive the plan and superintend the business of taking the census every tenth year, but at all periods to collect information relative to the great interests of the country, and to digest and publish it in the most convenient form. The salaries of a Superintendent and a few clerks would be the only expense, and it is quite probable that an equal sum would be saved from the printing of the bulky and confused documents, which would be superseded by the well-arranged, succinct, and far more accurate returns, prepared by men practised in the work, and devoting their whole attention to collecting the various materials. The legislative bodies are continu-

ally making calls upon the several Departments for information upon particular subjects, and the demand is hurriedly answered by throwing together, in a loose form, whatever materials may be at hand, while it is confessed, that more complete and accurate returns might be obtained, and put into a shorter compass and a more convenient shape, if time and labor could be spared for the work. Most European governments have organized statistical offices of the kind here mentioned, and the reports which they publish, from time to time, are very valuable." Congress has since acted upon this suggestion, and established a Statistical Bureau, consisting of a Superintendent and two clerks. If competent persons are appointed to these offices, much good may be effected.

It is not necessary to search far for illustrations of the errors committed in taking the last census. Many are apparent on the very face of the returns. Thus, the number of tons of hemp and flax, raised in one year in Kentucky, probably the largest hemp-growing State in the Union, is stated at 9,9921/4; while the quantity for Virginia, where but little comparatively is raised, is made to be 25,5941/4 tons. The quantity of bituminous coal mined annually in New Hampshire is stated at 29,920 bushels; and for Connecticut, at 38,000 bushels. We never heard, that a hituminous coal-mine was worked in either of these States. The number of slaves in Connecticut is said to be 17; in New Jersey, 674; in Pennsylvania, 64; though in each of these States, slavery has long since ceased to exist. The number of commercial houses engaged in foreign trade, in Boston, is said to be 142; in New Orleans, only 8 are given; in Louisville, Ky., only 1 is put down; while in Richmond, Va., there are said to be 17, and in Troy, N. Y., 44. In Salem, Mass., according to the census, there is not a dollar of capital invested either in foreign trade or commission business; nor is there a lumber-yard or a butcher in the whole city. No inquiry is necessary to show the falsity of these statements.

The "American Statistical Association," established in Boston, Mass., sent a memorial to Congress during the past winter, drawn up by Messrs. William Brigham, Edward Jarvis, and J. W. Thornton, in which, though they "confined their investigations to the reports respecting education and nosology," they exposed an extraordinary mass of errors in the census. We can find room only for a few extracts from this memorial.

"According to the census of 1840, there are in the United States 173 Universities, or Colleges, containing 16,233 students. There is good reason to suppose, that the number of colleges given is almost twice as large as the true number, and that the number of students is exaggerated nearly as much. Four colleges, for example, are put down to Maine, which has two. Four to Massachusetts, which has three. Four to Connecticut, which has three." &c.

"In many of the States, common schools are supported by a public

tax, or by funds provided by the public, for the education of all the children within the respective States. All the children, therefore, who are educated at these schools, are educated, so far as instruction is concerned, 'at the public charge.' In relation to Massachusetts, it is stated, that there are '160,257 scholars in common schools,' and '158,351 at public charge;' and in relation to New Hampshire, where schools are supported in a similar manner, it is stated, that there are '83,632 scholars in common schools,' and only '7,715 at public charge.' The instance of Connecticut might also be adduced, where the munificent provision of the school fund reaches every child in the State between the ages of four and sixteen, and is nearly sufficient to defray the cost of their instruction in the common schools. Yet in Connecticut, according to the census, only 10,912 children are taught at public charge, out of the 65,730 in the common schools."

"The most glaring and remarkable errors are found in the statements respecting_nosology, the prevalence of insanity, blindness, deafness, and dumbness among the people of this nation.

"The undersigned have compared these statements with information obtained from other more reliable sources, and have found them widely varying from the truth; and, more than all, they have compared the statements in one part of the census with those in another part, and have found most extraordinary discrepances. They have also examined the original manuscript copy of the census deposited by the Marshal of the District of Massachusetts in the Clerk's office in Boston, and have compared this with the printed editions of both Blair & Rives and Thomas Allen, and found here, too, a variance of statements.

"Your memorialists are aware, that some of these errors in respect to Massachusetts, and perhaps also in respect to other States, were committed by the Marshals. Mr. William H. Williams, Deputy Marshal, states that there were 133 colored pauper lunatics in the family of Samuel B. Woodward, in the town of Worcester; but on another page he states, that there are no colored persons in said Woodward's family. Mr. Benali Blood, Deputy Marshal, states, on one page, that there were 14 colored pauper lunatics and two colored lunatics who were supported at private charge, in the family of Charles E. Parker, in the town of Pepperell, while on another page he states, that there are no colored persons in the family of said Parker. Mr. William M Jackson states, on one page, that there are in the family of Jacob Cushman, in the town of Plympton, four pauper colored lunatics and one colored blind person, while on another page he states that there are no colored persons in the family of said Cushman.

"But, on comparing the manuscript copy of the census at Boston with the printed edition of Blair & Rives, the undersigned are convinced that a large portion of the errors were made by the printers, and that hardly any of the errors of the original document are left out. The original document finds the colored insane in twenty-nine towns, while the printed edition of Blair & Rives places them in thirty-five towns, and each makes them more than tenfold greater than the State returns in regard to the paupers; and one edition has given twenty, and the other twenty-seven, self-supporting lunatics, in towns in which, according to private inquiry, none are to be found. According to the original and manuscript copy of the census, there were in Massachusetts ten deaf and dumb and eight blind colored persons, whereas the printed editions of the same document multiply them into seventeen of the former, and twenty-two of the latter class of unfortunates.

"The printed copy of the census dcclares that there were, in the towns of Hingham and Scituate, nineteen colored persons who were deaf and dumb, blind or insane. On the other hand, the undersigned are informed, by the overseers of the poor and the assessors, who have cognizance of every pauper and tax-payer in the town, that in the last twelve years no such diseased persons have lived in the town of Scituate; and they have equally certain proof, that none such have lived in Hingham. Moreover, the deputy marshals neither found nor made record of such persons.

"The undersigned have carefully compared the number of colored insane and idiots, and of the deaf and dumb and blind, with the whole number of the colored population, as stated in the printed edition of the census in every city, town, and county of the United States, and have found the extraordinary contradictions and improbabilities that are shown in the following tables." [See next page.]

"The errors of the census are as certain, if not as manifest, in regard to the insanity among the whites, as among the colored people. Wherever your memorialists have been able to compare the census with the results of the investigations of the State Governments, of individuals, or societies, they have found that the national enumeration has fallen far short of the more probable amount.

"According to the census, there were in Massachusetts six hundred and twenty-seven lunatics and idiots supported at public charge; according to the returns of the overseers of the poor, there were eight hundred and twenty-seven of this class of paupers.

"The superintendents of the poor of the State of New York report one thousand and fifty-eight pauper lunatics within that State; the census reports only seven hundred and thirty-nine.

"The Government of New Jersey reports seven hundred and one in that State; the census discovers only four hundred and forty-two.

"The Medical Society of Connecticut discovered twice as many lunatics as the census within that State. A similar discrepancy was found in Eastern Pennsylvania, and also in some counties of Virginia.

"Your memorialists deem it needless to go further into detail in this matter. Suffice it to say, that these are but specimens of the errors

that are to be found in the 'sixth census,' in regard to nosology and education, and they suspect also in regard to other matters therein reported.

"In view of these facts, the undersigned, in behalf of said Association, conceive that such documents ought not to have the sanction of Congress, nor ought they to be regarded as containing true statements relative to the condition of the people and the resources of the United States. They believe it would have been far better to have had no census at all, than such an one as has been published; and they respectfully request your honorable body to take such order thereon, and to adopt such measures for the correction of the same, or, if the same cannot be corrected, of discarding and disowning the same, as the good of the country shall require, and as justice and humanity shall demand."

We have room for the tables for only three of the States.

In Merchantmen from whalers, . 6,278 62,986							
	,				165,744		1,908,047

Mr. Grinnell, of New Bedford, Mass., a Memberof Congress during the last session, in a speech upon the tariff, made the following statements:

[&]quot;I have prepared, with great care, a table from authentic sources, to show the consumption of domestic and foreign articles by our whaling fleet, now consisting of 650 ships, barks, brigs, and schooners, tonuaging 200,000 tons; cost at the time of sailing, \$20,000,000; manned by 17,500

officers and seamen, one half of whom are green hands when the vessels sail. By this table it will be seen, that the annual consumption by this fleet is \$3,845,500; only \$400,000 is of foreign articles. This great source of wealth to the nation is dependent mainly on a home market for its products. The value of the annual import of oil and whalebone in a crude state is \$7,000,000; when manufactured, it probably is increased in value to \$8,000,000, or \$9,000,000. The whole amount of exports of oil, whalebone, and sperm candles, is only \$2,000,000, leaving \$6,000,000 or \$7,000,000 to be consumed in this country.

"Although this interest is not directly protected by the tariff of 1842, as sperm oil, whale oil, and whalebone are cheaper in this country than any other, yet those interested in it are decidedly in favor of the protective policy. They have found by experience, that, when the manufacturers and mechanics of this country are actively employed, they could sell the products of the fishery at fair prices; when the duties have been low, and almost without discrimination in favor of such articles as are made in this country, that it has been difficult to make sales even at low prices. They are in favor of this policy, notwithstanding that the duties on each whale ship and outfits of 350 tons amount to \$1,700; they find themselves fully compensated by the home market.

"This fleet of whaling ships is larger than ever pursued the business before. Commercial history furnishes no account of any parallel; our ships now outnumber those of all other nations combined, and the proceeds of its enterprise are in proportion and diffused to every part of our country. The voyages of those engaged in the sperm fishery average three and a half years; they search every sea, and often cruise three and four months with a man at each mast-head on the look-out, without the cheering sight of a whale."

* Acting Governors.

In all the States except Virginia and South Carolina, the Governor is voted for by the people; and if no one has a majority of all the votes, in the States in which such a majority is required, the Legislature elects to the office of Governor one of the candidates voted for by the people.

Remarks.

The Colleges marked (*) are under the direction of the Baptists; thus (†) Episcopalians; thus (‡) Methodists; thus (§) Catholics. With respect to the Colleges which are unmarked, the prevailing religious influence of those that are in the New England States is Congregationalism; of most of the others, Presbyterianism.

By students in the above table, except a few of the Colleges in the Southern and Western States, is meant undergraduates, or members of the four collegiate classes; not including such as are pursuing professional education, or such as are members of a preparatory department.

Some of the Colleges above enumerated, are not in full operation; and scarcely deserve a place in the Table. According to the Census of 1840, there are in the U. States 173 universities or colleges, containing 16,233 students. There are 3,342 academies and grammar schools, containing 164,159 students. It is evident, that the difference between a college and an academy is not very clearly defined, except that the former has the exclusive right of granting degrees.

The column of Libraries includes the number of volumes in the College Libraries and in the Students' Libraries.

The information exhibited in the preceding table has been derived from the official statements contained in the Annual Catalogues of the several Colleges, mostly for the College years of 1842-3 and 1843-4. The sums are to be regarded as the average necessary expenses for the several objects. The college charges, included in the first three columns, are subject to comparatively little variation; but the other expenses are much more liable to change. With respect to several of the colleges, the expenses for washing, wood, and lights, are not mentioned. Other necessary expenses, not specified in the table, are such as relate to text-books, furniture of rooms, clothing, journeying, and pocket money, all of which vary according to circumstances, and the habits of individuals.

XXI. · LAW SCHOOLS.

Place.	Name.	Prof.	Students.
Cambridge, Mass.	Harvard University,	2	154
New Haven, Conn.	Yale College,	3	44
New York City,	Law Department, N. Y. Univ.	3	
Carlisle, Pa.	Dickinson College,	1	5
Williamsburg, Va	William and Mary College,	1	32
Charlottesville, Va.	University of Virginia,	1	72
Lexington, Ky.	Transylvania University,	3	75
Cincinnati, Ohio,	Cincinnati College,	3	25
Bloomington, Ind,	Indiana State University,	1	15

Schools for the study of law are much less frequented than schools for the study of the other professions. The first institution of this nature, of much note, that was established in the United States, was the Law School at Litchfield, in Connecticut, which had, from 1798 to 1827, 730 students; but it is now discontinued.

XXII. RELIGIOUS DENOMINATIONS.

2. ROMAN CATHOLIC CHURCH.

The first Catholic Bishop in the United States (John Carroll, D. D., of Baltimore) was consecrated in 1790. The Catholics increase rapidly, mostly by emigration from Europe. They have now 21 dioceses, 1 archbishop, 17 bishops, 8 bishops elect: and, according to the "Catholic Almanac" for 1844, 611 churches and chapels, 461 stations, 634 clergymen, 19 ecclesiastical seminaries, 261 clerical students, 16 literary institutions for young men, 48 female academies, 60 charitable institutions, and 15 periodical publications "devoted to the cause of Catholicity."

Catholic Ecclesiastical Seminaries, with the number of students, as stated in the "Catholic Almanac":—Philadelphia (30); Baltimore (16); Emmitsburg (25); Charleston (9); Parish of Assumption, La. (8); Vincennes, (20); St. Louis, Mo. (14); St. Mary's, Barrens, Mo. (13); Rose Hill, N. Y. (31); Richmond, Va. (6); Nashville, Tenn. (4).

Statistics of the Roman Catholic Church throughout the World.

[From the Metropolitan Catholic Almanac for 1844.] POPE GREGORY XVI., (MAURO CAPELLARI,)

was born at Belluno, in the Venetian States, 18th September, 1765; reserved "in petto" 21st March, 1825; published Cardinal Priest, by the title of St. Calixtus, 13th March, 1826; elected Pope, 2d February, 1831; consecrated bishop, and crowned, 6th February following, being now 78 years old. The present Pope is the 258th. Of these, one (Adrian IV., 1154-1159) was an Englishman.

The Sacred College consists of the following number of Cardinals:

Created by Pius VII.—Bishops, 2; priests, 2; deacons, 1-5. Leo XII.—Bishops, 4; priests, 5; deacon, 1-10. Gregory XVI.—Priests, 40; deacons, 10-50. Total 65. Vacant hats, 5. Total of the Sacred College, 70.

Of the Cardinals, the oldest is Card. Bussi; the dean, Card. Pacca; and the youngest, the Card. Prince of Schwarzenberg. Of the whole body there are at 80 years of age, and upwards, 5; 70 do., 16; 60 do., 18; 50 do., 14; 40 do., 9.

During the reign of Gregory XVI. the deaths among the Cardinals amounted to 51.

The number of patriarchs in the church is 12; of archbishoprics and bishoprics, 684; of coadjutors, auxiliaries, suffragans, &c., 95, as follows:

3. BAPTISTS.

[From the Baptist Almanac for 1845.]

Statistics of Baptist Sabbath Schools.

The following is a partial sketch of Sabbath Schools. Connected with the New England Sabbath School Union, and throughout the New England States, are

Schools.	Scholars.	Teachers.	Volumes in Libraries.
694	59,359	7,253	121,852

In 9 Associations out of 42 in the State of New York, are returned on their minutes, 198 schools and bible classes, 2,115 teachers, 15,591 scholars, and 22,822 volumes in the libraries.

The churches in the Hudson River Association for 1843, reported 693 teachers, and 377 scholars that professed religion.

East Jersey and New Jersey Associations report 72 schools, 630 teachers, 4,016 scholars, and 9,295 volumes.

In Pennsylvania, 4 Associations report 85 schools and bible classes, 1,062 teachers, 8,617 scholars, and 16,112 volumes. The Philadelphia Association for 1843, reports 108 scholars baptized.

Maryland Union Association has 13 schools, 189 teachers, 1,264 scholars, and 2,492 volumes.

The report of the Virginia Baptist Publication Society gives in that State an aggregate of 105 schools, 1,071 teachers, 5,227 scholars, 7,020 volumes, and 62 conversions.

The Chovan Association reports 10 schools, 110 teachers, and 605 scholars. Sabbath Schools are planted in many of the churches in the Southern States. But very few of the Associations give returns.

Other Baptist Sects in the United States.

Six Principle Baptists.—173d Anniversary, 1843. Churches, 17; Elders, 22; added, chiefly by baptism, 397. Total, 3,055. These Baptists are chiefly in Rhode Island.

Seventh Day Baptists. — These Baptists differ from the regular Baptists in no material feature, except in the strict observance of the seventh day, as we reckon time, instead of the first, or Lord's day. They are to be found chiefly in Rhode Island, New York, New Jersey, and a few churches in Pennsylvania, Virginia, and Ohio. They have a General Conference and four Associations, a Missionary Society, a Tract Society, and publish a weekly paper. Churches, 59; Ministers, 46; Licentiates, 23; added, (by baptisms, and by experience and letter,) 763. Total, 6,077.

Free Will Baptists, 1843.—Yearly Meetings, 22; Quarterly Meetings, 103; Churches, 1,165; Ministers, 771; Licentiates, 150. Baptisms in one year, 5,023. Total, 61,372.

Church of God, (Baptists.) — Churches, 125; Ministers, (ordained or licensed,) 83; Communicants, 10,000; chiefly in Pennsylvania, Maryland, and Ohio.

Reformers, (Campbellite Baptists.) — This class of Baptists have never published statistical tables of their numbers, except in two or three States. One of their order, in the "Original History of the Religious Denominations in the United States," estimates their numbers "but little short of 200,000." On imperfect data, we estimate this class at 2,000 Congregations, 1,500 Bishops, or Elders, and Evangelists, and 175,000 Communicants. Their baptisms in one year probably equal 20,000.

Christian Connection, (Unitarian Baptists,) 1842.— Conferences, 42; Churches, 650, Preachers, 782; baptisms, 4,000. Total, 35,600.

4. SUMMARY OF OTHER RELIGIOUS SECTS IN THE UNITED STATES.

Orthodox Congregationalists, in New England, New York, and the Northwestern States, 1843.—1,420 churches, 1,275 ministers, and 202,250 communicants.

Old School Presbyterians, 1844.—2,156 churches, 1,523 ministers, 12,088 additional in one year, and 166,487 communicants.

New School Presbyterians, 1843. — Churches, 1,494; ministers, 1,263; additions in three years, 20,715; communicants, 120,645.

Cumberland Presbyterians. -- 570 churches, 300 preachers, and 60,000 communicants.

Associate Reformed, Reformed, and all other classes of Presbyterians.—Churches, 530; ministers, 293; communicants, 45,500

Dutch Reformed, 1843. — Churches, 279; ministers, 271; communicants, 31,214.

German Reformed.— Churches, 750; ministers, 191; communicants, 75,000.

Evangelical Lutherans. — Churches, 1,232; ministers, 501; communicants, 146,300.

Protestant Episcopal Church, 1843.—1,254 clergymen, 1,232 churches, 70,000 communicants.

Moravians. - Churches, 22; ministers, 24; members, 6,600.

Methodist Episcopal Church, 1843. — Conferences, 32; travelling preachers, 4,147; local preachers, 8,298; members of society, 1,157,249.

Methodist Protestant Church, 1843. — 22 conferences, 1,300 travelling and local preachers, and 60,000 members.

Reformed Methodist Church. — Conferences, 5; preachers, 75; members, 3,000.

Wesleyan Methodist Church.—6 Conferences, 300 travelling and 300 local preachers, and 20,000 members.

United Brethren, (German Methodists.) — Conferences, 9; bishops, 3; circuits, 120; churches, 1,800; preachers, 500; members, 15,000.

Evangelical Association, (Germans, called Albrights) — 250 preachers, 600 congregations, and 15,000 members.

Mennonites. — 250 ministers, 400 congregations, and 58,000 members.

Reformed Mennonites. — They have a number of churches in Pennsylvania, New York, Ohio, and Indiana, all of which have pastors and deacons. For their numbers, see 2 Samuel, xxiv. 1.

Unitarian Congregationalists.— Churches, 300; ministers, 250; members, 30,000.

Universalists in United States.—1 General Convention, 13 State Conventions, 62 District Associations, 918 Societies, 576 meeting-houses, and about 500 preachers.

New Jerusalem Church, (Swedenborgians.) — 42 churches, 30 ministers, and 5,000 members.

COMMON SCHOOLS.—The whole number of persons in the State, between the ages of 4 and 21 years, as returned to the Secretary of State's office for 1843, is 214,353; and School fund No. 11, as apportioned by the State Treasurer, is at the rate of 13 cents to each child. In addition to this, the several cities, towns, and plantations are required by statute to raise by direct taxation a sum not less than 40 cents for each inhabitant.

MILITIA. — An important change has been recently made in the militia system of this State.

By an Act of the Legislature passed March 22, 1844, the enrolled militia are made subject to no active duty whatever, except for the choice of officers, or in case of insurrection, war, invasion, or to prevent invasion, or other public danger, or emergency; in which case, the governor and commander-in-chief is authorized and required to order out, from time to time, by draft or otherwise, as many of the militia as the necessity of the case may require.

The enrolled militia consists, with the usual exemptions, of all ablebodied white male citizens, from 18 to 45 years of age.

II. NEW HAMPSHIRE.

GOVERNMENT.

For the Year ending on the first Wednesday of June, 1845.

		Salar	y.
JOHN H. STEELE,	of Peterborough,	Governor, \$1,00	00
Thomas P. Treadwell,	of Concord,	Secretary of State, 80	00
Henry S. Rand,	of Portsmouth,	Deputy Sec. of State, Fee	es.
John Atwood,	of Concord,	Treasurer, 60	00
Charles H. Peaslee,	of Concord,	Adjutant General, 40	00

Timothy Hoskins,	of Westmorelan
Harry Hibbard,	of Bath,
Moody Currier,	of Manchester,

of Westmoreland, of Bath.

President of the Senate. Speaker of the House. Clerk of the Senate.

Executive Council.

		Counties.	Councillors.
1st I	District,	{ Rockingham and part } of Merrimack,	Elijah R. Currier, of Newton.
2d	do.	{ Strafford, Belknap, and Carroll, }	Josiah Bartlett, of Lee.
3d	do.	{ Hillsborough and part } of Merrimack, }	William Parker, of Francistown.
4th	do.	Cheshire and Sullivan,	Francis Holbrook, of Surry.
5th	do.	Grafton and Coos,	Caleb Blodgett, of Canaan.

The Governor, Executive Council, Senate, and House of Representatives, are elected annually on the 2d Tuesday of March; the official year commencing on the 1st Wednesday in June. The State is divided into five Districts for the choice of Councillors; and again divided into twelve Districts for the choice of Senators; the number composing these two bodies being limited by the Constitution, while the number of Representatives is unlimited - every town possessing 150 ratable male inhabitants being entitled to one Representative, and one for each additional 300.

JUDICIARY.

The Superior Court of Judicature consists of a chief justice and two associate justices, who hold one term annually in each of the ten counties of the State, for the hearing and determining questions of law, &c. This Court is also vested with Chancery jurisdiction for certain purposes.

The judges of the Superior Court of Judicature are, ex officio, judges of the Court of Common Pleas. This Court, before whom all actions for the recovery of debts and the enforcement of contracts, and all jury trials are brought, consists of one of the justices of the Superior court, who sits as chief justice of the Court of Common Pleas, and of two county judges, generally appointed from among the yeomanry, whose principal duty it is to attend to the ordinary business of the county; its roads, expenses, &c. Terms are held semi-annually, in each of the counties.

Essex,	George E. Holmes, Martin French,	Wm. Heywood, Jr.,	Allen Gould.	

The Judiciary powers are vested in a Supreme Court, consisting of five judges; in County Courts, or Courts of Common Pleas, comprising five circuits, each County Court being composed of one judge of the Supreme Court, who is, ex officio, chief justice of the County Courts of his circuit, and two assistant judges for each county; and in justices of the peace; all the judges and justices being chosen annually by the Legislature.

The Supreme Court sits once, and the County Courts twice, a year in each county. Each judge of the Supreme Court is chancellor of a circuit. The Court of Chancery has two stated sessions annually in each county. An appeal from the decree of the chancellor lies to the Supreme Court.

COMMON SCHOOLS. — There is an accumulating State School Fund of 200,234 95, which is not at present appropriated.

An annual tax is assessed for the support of Common Schools, of nine cents on the dollar, which amounts to about \$70,000. A part of the interest accruing upon the U. S. deposit money, amounting to about \$20,000, also goes to their support. The whole control of the Schools is left to the School Districts, and all expenses are paid by taxes upon their respective inhabitants, with the aid of the above-named tax and deposit money.

VERMONT ASYLUM FOR THE INSANE, BRATTLEBORO.'

William H. Rockwell, M. D., Superintendent and Physician; Doctor Samuel B. Low, Assistant Physician; Mrs. Ann F. Wilkinson, Matron. In the last year, 224 patients have enjoyed the advantages of the institution. Of these, 58 have been discharged, leaving 136 patients on the 1st of October, 1843.

Of the recent cases, 87½ per cent. have recovered, while of the chronic, or old cases, only 33⅓ per cent. have recovered. The terms are fixed at \$2 per week, or \$100 per year, if the patient remain so long.

*\$4,000,000 of this capital is loaned by the State.

† Leased to the Housatonic Railroad Company, who pay for it \$17,500 a year.

‡ In Massachusetts only; in New Hampshire there are 35 miles more.

§ \$500,000 of this is loaned by the State.

Fitchburg Railroad. Amount of capital subscribed, \$921,000; amount paid in, \$440,274.86; amount expended, \$322,537.88. The road is now open to Concord, and will probably be open to Fitchburg before Jan. 1845.

Hartford and Springfield Railroad. Length of the line in Massachusetts 6 miles, and the stock subscribed for building this part of the road is \$60,000. 20 miles more, in Connecticut, are to be built by the Hartford and New Haven Railroad Company.

West Stockbridge Railroad. This road is now used by the Housatonic Railroad Company.

The Worcester Branch Railroad has a capital of \$5,500; the estimated cost of the road is \$5,000.

V. RHODE ISLAND.

GOVERNMENT

For the Year ending the 1st Tuesday in May, 1845.

			Salary.
JAMES FENNER,	of Providence,	Governor,	\$400
Byron Diman,	of Bristol,	Lieutenant Governor,	200
Henry Bowen,	of Providence,	Sec. of State, \$750 a	and fees.
Stephen Cahoone,	of Newport,	General Treasurer,	500
Joseph M. Blake,	of Bristol,	Attorney General,	Fees.

These officers, and the Senators and Representatives, are elected annually, on the 1st Wednesday of April, for the year commencing 1st Tuesday of May.

The Senate consists of the Governor, Lieutenant Governor, and one Senator from each of the thirty-one towns in the State.

The House of Representatives consists of 69 members. The present ratio is one Representative to every 1,530 inhabitants, and fractions of more than half are represented. Each town is to have one, and no town more than 12, Representatives.

The qualifications of electors are as follows: Every male native citizen of the United States, who has resided in the State two years, and in the town where he proposes to vote six months, who has been registered at the town clerk's office at least seven days before the election, and who has paid within one year a tax of one dollar, or has been enrolled in a military company and done military duty at least one day within the preceding year, shall be entitled to vote; likewise, every male citizen (naturalized foreigner) of the United States, who, in addition to the preceding qualifications, possesses real estate in the town or city worth \$134 over all incumbrances, or which rents for \$7 per annum.

JUDICIARY.

Supreme Court.

				Salary.
Job Durfee,	of Tiverton,	Chief Justice,	Entries and	\$650
Levi Haile,	of Warren,	Associate Justice,	do.	550
William R. Staples,	of Providence,	do.	do.	550
George A. Brayton,	of Warwick,	do.	do.	550

The Judges of the Supreme Court hold their offices until they are removed by a resolution passed by both Houses of the Assembly, and voted for by a majority of the members elected to each House. The Court of Common Pleas in each of the five counties consists of a Justice of the Supreme Court, who sits as Chief Justice, and two Associate Justices, who are elected for each county. The Justice of the Supreme Court, who sits in the Common Pleas, does not sit in the Supreme Court on appeals from his own decisions. The Associate Judges of the Common Pleas, Sheriffs, Clerks, &c., are elected annually by the Legislature.

During the past year a new code of laws was prepared and published, and it went into effect in Sept. 1844. It contains many important improvements upon the old laws. The rights of married women are effectually secured to certain sorts of personal property. The laws regulating interest are so modified, that, upon a plea of usury, the plaintiff will notwithstanding recover the principal of his debt, with the legal interest.

PUBLIC SCHOOLS.

By an act of the General Assembly, passed January, 1828, a permanent school fund was commenced, which was invested in bank stock, and now amounts to upwards of \$50,000. The sum of \$25,000 per annum is paid from the State treasury to the school committees of the several towns for the support of public schools. The interest of this State's portion of the deposit of the United States' surplus revenue, and moneys arising from several other sources, are also applied to the support of public schools.

During the past year, Henry Barnard, Esq. has been actively employed, under the direction of the Legislature, in examining the public schools, diffusing information, and endeavoring to improve their condition. A bill is now before the Legislature, which will probably pass, by which the schools will be placed under the care of a superintendent, and will be in many respects materially improved.

Abstract from the Annual Returns of Public Schools, made to the General Assembly in May, 1844:

Number of School Districts, 359 Number of Schools, 428 Do. Male Teachers. 342 Do. Female Teachers, 173 Average number of scholars attending, 14,528 Paid from the State Treasury for Free or Public Schools, \$25,095,74 Paid by the towns for the same, 27,918.83

Since 1838, regular returns have been required. The following is a comparative statement of a portion of these returns:

	Sch	Expended for					
Year.	Male.	Female.	Incidentals.	Instruction.			
1839,	8,112	5,636	\$2,971 50	\$32,383 36			
1840,	10,202	7,550	4,103 80	36,095 98,			
1841,	11,253	9,000	6,312 64	40,516 01			
1842,	12,479	9,372	5,482 00	39,088 43			
1843,	11,960	8,132	5,898 55	42,944 29			
1844,	11,811	10,345	5,405 47	48,335 76			

There is a literary institution at Providence, called the "Providence Athenæum," the library of which contains 10,585 volumes. Another, at Newport, called the "Redwood Library," contains 4,500 volumes.

VI. CONNECTICUT.

GOVERNMENT

For the Yea	r ending on the 1 .	st Wednesday in May, 1845.	
	Ü		Salary.
ROGER S. BALDWIN	, of New Haver	n, Governor,	\$1,100
Reuben Booth,	of Danbury,	Lieut. Gov. and Pres. Senate	, 300
Joseph B. Gilbert,	of Hartford,	Treasurer,	1,000
Daniel P. Tyler,	of Windham,	Secretary, \$84	and fees.
Abijah Carrington,	of Milford,	Comptroller,	1,000
Seth P. Beers,	of Litchfield,	Commiss'r of the School Fund	d, 1,250
Chas. J. Mc Curdy,	of Lyme,	Speaker of the House.	
Lucius G. Peck,		Clerk of the House.	
Nelson L. White,		Clerk of the Senate.	

A plurality of votes elects State senators and members of Congress. For all other officers a majority is necessary.

JUDICIARY.

Supreme and Superior Court.

Thomas S. Williams,	of Hartford,	Chief Justice,	\$1,100
Samuel Church,	of Salisbury,	Associate Justice,	1,050
Henry M. Waite,	of Lyme,	do.	1,050
William L. Storrs,	of Middletown,	do.	1,050
Joel Hinman,	of Waterbury,	do.	1,050
Thomas Day,	of Hartford,	Reporter,	350

A term of the Superior Court is held by one judge twice annually, in each county of the State, and the Supreme Court, constituted of the five judges, meets annually in each county. . The judges of this Court hold their offices until seventy years of age.

County Court. - A County Court is held by one judge three times each year, in the several counties. The judges of this Court are appointed annually by the Legislature.

Counties.	Judges.	Residence.	Attorneys.	Residence.
Hartford, New Haven, New London, Fairfield, Windbam, Litchfield, Middlesex, Tolland,	Samuel Huntington, Noyes Darling, Benj. Pomeroy, Thos. T. Whittlesey, Jared D. Richmond, Wm. M. Burrall, John C. Palmer, Benj. Pinney,	New Haven, Stonington,	Isaac Toucey, R J Ingersoll, John T. Wait, Silas II. Hickok, George S. Catlin, D. C. Samford, Samuel Ingham, Loren P. Waldo,	Hartford, New Haven, Norwich, Danbury, Windham, New Milford, Saybrook, Tolland,

The Superior and County Courts have civil, criminal, and equity jurisdiction, and, to a large extent, concurrent and original jurisdiction. In all civil actions where the damages, or matter in dispute, exceed \$35, the County Court has jurisdiction, and the Superior in all cases where the damages, or matter in dispute, exceed \$70. The County Court has exclusive jurisdiction of breaches of the peace, not cognizable by justices, and concurrent jurisdiction with the Superior Court in all other criminal cases, except where the punishment is death, or imprisonment for life, in which latter cases, the Superior Court has exclusive jurisdiction. In civil cases, appeals lie in all cases from the County to the Superior Court, where the matter in dispute exceeds the sum of \$70.

FINANCES FOR 1843-44.

The State owes no debt, and has, beside the School Fund, productive bank stock amounting to \$400,000.

Deaf and Dumb Asylum at Hartford.—The number of pupils under instruction the past year has been 142. The Institution has existed 27 years, and has educated 619 persons, of whom 50 were beneficiaries of Maine, 71 of New Hampshire, 86 of Vermont, 179 of Massachusetts, and 72 of Connecticut. The annual charge of a pupil is, in consequence of the large funds of the institution, the small sum of \$100.

State Prison. — There are now 203 prisoners in the Connecticut State Prison. The expenses of the institution last year were about \$11,000, and its income, in round numbers, \$18,000.

Bankruptcy. — The final result in Connecticut. — Proceedings under the Bankrupt law of 1842, in the State of Connecticut, have been brought to a close, with some few exceptions. The work has been so far completed, that the following may be deemed nearly correct. There are, however, a few cases still pending in the Circuit Court, and a few in the District Court, still undecided.

The whole number of cases presented is 1537. Of these, 1517 were voluntary cases, and the residue, 20, were compulsory cases.

These cases have been disposed of as follows:		
Withdrawn, rejected, and abandoned,		22
Now pending in the Circuit Court, undecided, .		6
Postponed for cause, in the District Court, about		20
Involuntary cases, where there has been no application fo	r discharge,	19
Discharges decreed,	. 1,	480
	1,	547
Aggregate amount of debts in 1368 cases,	\$10,218,581	00
The remaining 169 cases, where the amount of the debts		
has not been ascertained, may be estimated at	1,262,431	00
Debts whole amount	\$11 481 012	00

Common Schools.

[Compiled from the Annual Report of the Superintendent, Jan 13, 1844.]

The 59 counties of which the State consists, are divided into 897 towns and wards, and these again are subdivided into 10,875 school districts. Of the 59 counties, all, with the single exception of Lewis, have appointed county superintendents. The total number of children between the ages of 5 and 16, residing in the several school districts, exclusive of the city of New York, is returned at 607,996; while the aggregate number of children, of all ages, who have attended school for a longer or shorter period during the year ending January 1, 1843, is reported at 610,354. In the city of New York, it is estimated that there are 75,000 children between the ages of 5 and 16; and of these, 47,428 have attended school for a longer or shorter period during the last year. This swells the grand aggregate of children under instruction in the schools of the State, for the year reported, to 657,782; an increase of 59,000 over the number returned the preceding year.

The number of male teachers in the winter schools is stated at 5,170; of female teachers, 635. In the summer schools, there were 1.024 male, and 5,699 female teachers. During the winter, the average monthly compensation of male teachers, exclusive of board, has been \$14.28; that of the females, \$7. In the summer, the male teachers received, on an average, \$15 per month, the females, \$6.

There are 9,368 school houses in the State; 969 of brick or stone, the remainder of logs, or framed wood. Of these, 3,160 were in good repair; 2,870 in comfortable condition; and the remaining 3,319 "unfit for the reception of man or beast."

The common school fund, on the 30th of September, amounted to \$1,975,093, and there belong to it also 357,824 acres of land, valued at \$178,412. The amount of public money expended in all the school districts in the State, during the year reported, was \$660,727, and the amount contributed by the people in these districts was \$509,376, making in all nearly \$1,100,000 expended in the payment of teachers' wages, and the purchase of books for school libraries. The report furnishes a variety of extracts from the communications made by the different county superintendents, all tending to show a gradual improvement in the schools, and furnishing conclusive evidence of the wisdom and propriety of the laws of 1841 and 1843, intrusting the duties of inspection and supervision to county and town superintendents.

Paupers in New York.

[From the returns of the Superintendents of the Poor in every County.]

In 1843, the number of county paupers relieved or supported was 78,233; number of town do., 4,521. Whole number of regular paupers, 82,754, or about 1 to 30 of every inhabitant in the State. But in addition to these, there were 62,047 paupers temporarily relieved by the public officers, making an aggregate of paupers in the State of New York, of 144,801, or about 1 to every 18 of the inhabitants.

The whole expenditure for the poor during 1843, is	\$592,353.29
but the value of the labor of the paupers, amounting to	58,658.85
must be deducted, and the net expense is - which is raised by annual taxation.	\$533,694.44
During 1842, the expense was	517,738.02
Deduct pauper labor,	57,133.30
	\$460,604.72

This shows an increase of pauper expenses of the year 1843, over those of 1842, of \$72,989.72, or an increase in a single year, of over 15 per cent. in the expenditures.

The average weekly expense of each pauper during the year 1843 was 58 cents and 2 mills; do., during the year 1842, 64 cents and 6 mills.

This shows that the expense of supporting each pauper has decreased 8 per cent., and yet the whole aggregate of expense has increased 15 per cent. This solely arises from an increase in the *number* of paupers. This increase was 21,314 over the preceding year. Yet it is proper to bear in mind, that about one third of this increase occurred in the city of New York.

On the 11th of April, 1842, a law passed, directing the county superintendents of the poor to make detailed returns, not only of the name, age, sex, and native country of every town or county pauper, but also "a statement of the causes, either direct, or indirect, which have operated to render such person a pauper." At the first glance, it will be perceived, that information of this character must be invaluable, as it could be the pioneer to sound and safe legislation upon this complex question.

Under this new law, returns have been received from every county in the State, except Albany, Green, Suffolk, and Warren. Of the 25,624 paupers returned in these special reports, of natives of the United States, there were, males, 8,104; Females, 6,312; total, 14,415. Of natives of Ireland, there were, males, 4,442; females, 2,849; total 7,291. Of natives of England, there were, males, 871; females 533; total 1,404. Of natives of Saotland, there were, males, 178; females, 107; total, 285. Of natives of Germany, there were, males, 461; females, 207; total, 668. Of paupers coming from Canada, there were, males, 220; females, 159; total, 379. Of natives of France, there were, males, 133; females, 63; total 196. 985 paupers were reported without giving their native country.

Comparative Statement of the Imports and Exports of the District of New York, during the first six months of the year 1843, and the first six months of the year 1844.

Imports.	Paying duty, Free,	1843 \$12,886,411 11,944,264	1844 \$32,023,70 2 6,656,260
	Total,	24,830,675	38,679,962
	Duties,	4,646,271	11,421,507
Exports.	Domestic goods, Foreign goods,	8,650,672 2,185,885	14,676,724 2,442,310
	Total,	10,836,557	17,119,034

The annual report of the city inspector shows the number of buildings erected in the city of New York, in 1843, as follows: 842 brick dwellings; 117 wooden dwellings; 156 brick dwellings and stores; 27 brick and granite stores; 48 shops and factories; 12 brick stables: 20 brick stores; 8 brick churches; and 43 other buildings; making, in all, 1273 edifices.

VIII. NEW JERSEY.

GOVERNMENT.

Richard P. Thompso	on, of Salem Co.,	Attorney General,	1846 F	ees& §0

The Judges are appointed by the Governor, with the consent of the Senate, and hold office for seven years.

The Supreme Court holds four terms each year at Trenton; on the last Tuesday in February, 2d in May, 1st in September, and 2d in November; and the judges of this court hold Circuit Courts and Courts of Oyer and Terminer four times a year in each county, except the counties of Atlantic and Cape May, in which two terms only are held. Inferior Courts of Common Pleas are held four times in a year in each county, by judges appointed by the Legislature, for five years, who receive fees, but no salary, and the number of whom is limited to five in each county. The compensation of a judge is not to be diminished during his term.

New Constitution. - A Convention of delegates, chosen by the people, assembled at Trenton, May 14th, 1844, and prepared the draft of a new Constitution, which was submitted to the people on the 13th of August, was accepted by a great majority, and went into operation Sept. 2, 1844.

The right of suffrage is given to every white male citizen of the United States, who has resided in the State one year, and in the county where he claims to vote five months; paupers, idiots, insane persons, and criminals, being excluded.

Members of the Senate and of the General Assembly are elected yearly, on the second Tuesday of October, and meet on the second Tuesday in the next January, when the legislative year commences. The Senate consists of one Senator from each county, elected for three years, one third going out each year. The General Assembly shall consist of not more than 60, chosen annually, by apportionment under the census.

The Legislature shall not create any debts or liabilities, which shall singly, or in the aggregate with any previous debts, exceed one hundred thousand dollars, except for purposes of war, or to repel invasion, or to suppress insurrection, unless the same shall be authorized by a law, for some single object, or work, to be distinctly specified therein; which law shall provide the ways and means, exclusive of loans, to pay the interest of such debt, and also to pay and discharge the principal of such debt or liability within thirty-five years from the time of the contracting thereof, and shall be irrepealable until such debt be fully paid; and no such law shall take effect until it shall have been submitted to the people. and have received a majority of all the votes cast for and against it; and all money to be so raised shall be applied only to the specific object stated, and to the payment of the debt created.

The fund for the support of free schools, and all money added to it, shall remain a permanent fund, and shall not be used for any other purpose.

Charters for banks and money corporations require the assent of three fifths of the members of each House, and are limited to twenty years.

The Governor holds office for three years, and receives a salary not to be altered during his continuance in office. He has a veto on the laws, but a majority of both houses may pass the law again, after reconsideration, and it shall go into effect, in spite of the veto. In case of his death, resignation, or removal, the President of the Senate takes his place.

Amendments to the Constitution must be passed by two Legislatures in succession, and then be referred to the people, and if accepted by a majority of the people, shall go into effect. But amendments shall not be proposed oftener than once in five years.

CONGRESSIONAL DISTRICTS.

- Cumberland, Gloucester, Atlantic, Salem, and Cape May counties.
 Burlington and Monmouth.
- Hunterdon, Mercer, Somerset, and Middlesex.
 Warren, Sussex, and Morris.
 Essex, Hudson, Bergen, and Passaic.

The Tax Bill which passed both houses of the Legislature, in 1844, has received the signature of Gov. Porter, and has consequently become a law. It levies a tax of three mills on every dollar of the valuation of real and personal property in the State, which it is estimated will exceed \$600,000,000. The tax, of course, will amount to over \$1,800,000. The revenue derived from other taxes will amount to \$400,000, and the net income of the public works, is estimated, at the minimum, at \$550,000, making an annual revenue, in all, of \$2,750,000. The interest on the public debt of every description, is about \$2,000,000, and the expenses of government, including appropriations to the public schools, less than \$600,000. Ample provision is therefore made to enable the State hereafter to meet its engagements, and for the restoration of the public credit.

In the 1st school district, embracing the city and county of Philadelphia, the number of schools is 215; of which, 1 is the High School, 40 Grammar Schools, 18 Secondary, 76 Primary, and 80 not classified. The whole number of teachers, including the professors of the High School, is 499; 87 males, and 412 females. The aggregate amount of salaries is \$136,843; average to each, \$274.23. The number of pupils is 33,384, exhibiting an increase of 5,222 since the last report. A number of schools for colored children are embraced in the above summary, which is taken from an abstract from the semi-annual returns. The expenses of the Board of Control for all purposes, except the erection and fitting up of school houses, have been \$288,766.66 for a year and a half; or an average of \$192,511.18 per annum. This includes cost of tuition, fuel, books, stationary, and supplies of every description; also, the expenses of the Secretary of the Board and the Comptroller, repairing school houses, and all the other items which are included by the Auditors under the head of general expenses. Divide this sum by 33,384, (the total number of scholars,) and it will be seen that the annual average expense of each pupil for all the purposes above stated, has been \$5,76. The total amount of expenditure in 1842 was \$255,852.92. The expenditure from January 1st to June 30th, 1843, was \$118,028.76.

STATISTICS OF THE CHARITABLE INSTITUTIONS IN THE STATE.

Philadelphia House of Refuge, incorporated March 23, 1827, for the reformation of Juvenile Delinquents. The ground and buildings have cost \$83,381.81, and are incumbered with a debt of \$27,000. No boy can be retained after the age of 21, and no girl after the age of 18. The pupils receive a good education, and some suitable trade. At any time during their stay in the institution, the managers may, if they think them worthy, bind them out, with their consent, as apprentices. In 1843, 74 boys and 34 girls were admitted, and 56 boys and 34 girls were discharged; and there remained in the institution, on the 31st of December, 1843, 110 boys and 58 girls. 87 were committed by magistrates, 15 by courts, and 6 returned after having left the House. 37 boys and 23 girls were sent at the request of parents or near relatives. The average age of the boys was 13¾ years, of the girls 14½; average number of inmates, 152.

The Pennsylvania Institution for the Deaf and Dumb was incorporated and endowed Feb. 8, 1821. The neighboring States of New Jersey, Delaware, and Maryland, have passed laws appropriating certain sums of money annually towards the support of their own deaf and dumb citizens in this institution. The purpose of the institution is the instruction of this unfortunate class of the community. During the year 1843, 24 pupils were admitted into, and 14 left, the institution; and there remained on the 31st of December, 1842, 66 males, and 55 females; total 121. Of this number, 83 are supported by Pennsylvania, 7 by New Jersey, 12 by Maryland, 3 by Delaware, and 16 by their friends, or the institution.

MARYLAND.

The State is divided into six judicial districts, each comprising two, three, or four counties. For each district there are a chief judge and two associates, who constitute the County Courts for the respective counties in the district. These are the common law courts of original jurisdiction in the State; and they have jurisdiction of all claims for fifty dollars and upwards, appellate jurisdiction from the judgment of justices of the peace, and equity jurisdiction within the counties coextensive with the chancellor. The six chief judges constitute the Court of Appeals for the State, which has appellate jurisdiction of cases at law and in equity, originating in the County Courts, the Orphans' Courts, (of which there is one in each county,) and the Court of Chancery.

FINANCES.

Total amount expended in 1843,	. \$665,969.9	
Principal items of Expenditure.	Chief sources of Income.	

Salaries of civil officers, \$11,794.50 Salaries of the Judiciary, 39,176.42 Direct taxes, 367,232.51 Expenses of Legislature, 56,702.74 Auction duties, 29,169.83 Interest on the State debt, 273,376.32 Baltimore & Ohio R.R. Co., 56,496.73 Loans of 1841, 131,524.18 Common Schools, 77,717.67 Charitable Establishments, 20,000.00 Miscellaneous, 7,000.00 Courts, 79,011.10 Tobacco inspection in Bal-

Whole amount of State debt, . . . \$12,004,784.98 Annual interest on this debt, 656,021.16

Public Debt.—A report to the Legislature, made Feb. 13, 1844, gives the following particulars respecting the public debt.

The funded debt of the State is . \$15,204,784.98

The amount held by the Baltimore and Ohio Railroad Co.,
which is not a charge upon the Treasury is

3,200,000.00

stock, consists of the following: In the stock of the Baltimore and Washington Railroad

Company, the State holds \$550,000 — worth, at the market price, \$75 per hundred, 412,500.00 In the Baltimore and Ohio Railroad Company,

\$500,000 — worth \$39 per hundred, And other stocks worth about . 195,000.00

617,500.00

apital and credits, at present unproductive, but which must, nevertheless, in the course of a period not very remote, become of considerable value.

Much the largest portion of this capital consists of the bonds and stock of the Chesapeake and Ohio Canal Company - of the Baltimore and Susquehanna Railroad Company - and the Susquehanna and Tide Water Canal Company.

The committee suppose that, under the most unfavorable circumstances, the capital and credits of the State, which are at this time unproductive, would, if so applied, pay \$5,000,000. The debt of the State, then, deducting her productive capital, at present market prices, is, as we have seen, \$11,387,284.98

She holds unproductive capital, and credits, which would pay at this time, at least, 5,000,000.00 Leaving only the sum of \$6,387,284.98

And of this balance, there belongs to the sinking fund, 1,160,075.09 Actual debt. \$5,227,209.89

 Talbot, Dorchester, Somerset, and Worcester. Population, 62,185.

MARYLAND PENITENTIARY.

The total gain by the labor of the convicts, and the commercial operations of the institution, during the year ending on the 30th of November, 1843, was \$30,275.29. The expenses during the same period, including the salaries of officers, and charges of every description, amounted to \$29,791.63, leaving an excess, or net profit for the year, of \$483.66.

The average number of prisoners in confinement during the year was 290; eight more than the average of 1842.

The number received during the year was 97. Of this number, 86 were males, and 11 females; 62 whites, and 35 blacks; 74 Americans, and 23 foreigners, viz: 15 natives of Germany, 1 of Turkey, 1 of Prussia, 1 of Russia, 4 of Ireland, and 1 of France. Of the whole number, 97, 32 were convicted in the courts of Baltimore.

There were discharged during the year—by expiration of their sentences, 67; by pardons, 12; by death, 21; in all 100. There remained in confinement on the 30th of November, 287.

COMMON SCHOOLS.

Each of the counties has for some years been entitled to receive \$800 per annum, or more, out of the school fund; but it is variously distributed, and some counties get more. St. Mary's and Charles counties give their share to one institution—the Charlotte Hall Academy, or school. In other cases, the portion of a county is divided between two or more academies or schools, and in some counties it is distributed to the primary schools. Attempts have been made to procure a law to distribute the whole of the school fund to these schools, but, as yet, no such law has been passed.

By an act of the General Assembly, passed Feb. 28, 1826, entitled "An Act to provide for the public instruction of youth, in primary schools, throughout this State," provision was made for the establishment of primary schools in every county of the State in which, at the then ensuing election for delegates to the General Assembly, a majority of the voters should express their will in favor of the system.

A few of the counties adopted it; and, under various provisions of law, there are primary or common schools in most of the counties.

From a report on the draft of a code for the support of common schools, made to the General Assembly in 1843, we gather some facts illustrative of the condition of public schools in this State. Eight of the counties have made no returns. The following is a part of the information furnished by the other counties:

"In Anne Arundel county, there are twenty-eight primary school districts, of which number twenty-two are in operation. The cost of school houses is about \$300 each. There are twenty-three teachers employed. The lowest sum paid to any teacher is \$200; the highest \$500; the gross

amount of salary paid to all the teachers is \$7,065. The number of scholars in all the schools is 525. The amount levied by the county for the support of primary schools is \$2,400. The sum levied by the several districts amounts to \$3,005.62. The amount received from the State, for the year 1842, was \$2,167.82.

"In the Howard district, there are twenty primary schools. The cost of the buildings in which the schools are held, would average \$200 each. There are twenty teachers, with an average salary of \$300 each. The schools are kept open an average of nine hours. The average number of scholars in attendance on all the schools is 526. The amount levied by the district is \$1,800; that received from the State, \$1,500.

"In Alleghany county, there are eighty-eight common schools. The supposed cost of the houses in which the schools are held is \$25. The teachers of eighty-two of the schools receive from the State \$50 each, and those of the six other schools \$25 each. In addition to this, the teachers charge \$2 per quarter for each scholar, which is paid by the parents. The average number of scholars in attendance upon each school is about 20. There is no levy made by the county for the support of schools; the amount received from the State is about \$1,000.

In Caroline county, there are 24 common schools. The average number of scholars in attendance upon each, is 12. The amount received from the State is about 3,441. The county makes no levy for the schools.

"In Charles county, there are twenty-nine primary schools. The average cost of the buildings in which the schools are held is \$300. There are twenty-nine teachers with salaries averaging from \$200 to \$450 each. The schools are kept open about eight hours per day. The county is by law required to levy \$3,000 annually upon the property within its limits. The amount annually received from the State is about \$3,200. There are taught in the schools of this county between 700 and 800 scholars.

"In Cecil county, there are no primary schools. One third of the schools are kept in private houses and in churches. The cost of houses built expressly for schools is, on an average, \$75, and they are built by subscription. There are about forty teachers in the county, who receive from \$2.50 to \$3 per quarter for each scholar. The county makes no levy for the support of schools. The amount received from the State is about \$3,000 per annum. This fund is paid to the orphan's court, and by it is distributed to the several election districts.

"In Dorchester county, there are forty-four primary schools. They are generally held in churches and private buildings, erected prior to the adoption of the primary school system in the county. Where houses have been erected, the cost has been from \$150 to \$200 each. There are usually about forty-four teachers in the county, independently of those engaged in the three academies in the county. The sum paid to teachers is from \$150 to \$200; and where there is a good teacher, the parents, by subscription, increase the allowance of the county. As to the number of

hours the schools are kept open, our informant says, 'no mortal man can answer the inquiry. It is intended they should be open in the forenoon from 8 to 12, and in the afternoon, from 2 to 5 o'clock; but in some of the districts, I am informed, they are not open over two hours in the day, and in several of the schools, not over one or two days in the week; yet they (the teachers) receive their draft, and obtain their money.' Some of the schools have in attendance forty scholars, others ten, average about twenty. The amount levied upon the county is \$4,000; that received from the State, about \$3,000. The clerk of the commissioners of the county, speaking of the want of qualification on the part of some of the teachers, observes, 'I have receipts from some (of them) that a Philadelphia lawyer could not read.'

"In Frederick county, there are eighty school districts. The cost of school houses, from \$450 to \$500; the two buildings in Frederick city cost—the one, \$1,400, the other, \$1,700. There are seventy-four teachers in the county, who receive from \$60 to \$100 per annum each. The number of scholars is from 2,500 to 3,000. The total number of scholars in the county is estimated at 9,000. The amount received from the State was, in 1841, \$2,840.57, in 1842, \$2,314.95. Amount levied by county has been, heretofore, \$8,000."

The public schools in the city of Baltimore are popular, and in a flour-ishing condition. Each scholar pays one dollar a quarter for tuition. The amount required from the city treasury, for the support of these schools, in 1844, was \$29,372.79. The amount of tuition fees received in 1843, was \$9,725.13. The whole number of public schools in the city was 24, and the number of scholars, 3,455.

John A. North,	of Lewisburg,	Clerk of the Wes	tern Circuit	1,000

The judges are entitled to receive, in addition to their salaries, 25 cents a mile for necessary travel. The Court of Appeals holds two sessions annually; one at *Lewisburg*, Greenbriar county, for the counties lying west of the Blue Ridge, commencing on the 2d Monday in July, and continuing 90 days, unless the business shall be sooner despatched; the other at *Richmond*, for the counties lying east of the Blue Ridge, commencing at such times as the Court may from time to time appoint.

General Court.

The State is divided into ten Judicial Districts, and each District into two Circuits, except the 4th, which comprises three. The third Circuit of the 4th District is the 21st District of the State, containing but a single Court, called the "Circuit Superior Court of Law and Chancery for the county of Henrico and city of Richmond." In this Court, there are two judges; one on the law side, with a salary of \$1,800; the other on the chancery side, with a salary of \$2,000. On the death, resignation, or removal of either of the two judges now attached to this court, his duties are to devolve on the other, without any increase of salary. In all the other circuits, the chancery and common law jurisdictions are blended in the same judges, each of whom has a salary of \$1,500, and \$4 for every 20 miles of necessary travelling.

A Circuit Superior Court of Law and Chancery is held twice every year in each county and in some corporations.

The judges who hold the Circuit Courts, are also required to hold, every year, two terms of the General Court in the Capitol at Richmond. It is the duty of fifteen of the judges to attend this Court, eleven being necessary to form a quorum. One term begins on the last Monday in June; the other, on the 1st Monday of December. The judges are required to arrange themselves into four classes, of five judges each, one of which is exempt, in rotation, from attending the court.

The General Court has appellate jurisdiction in the last resort in criminal cases; also, original jurisdiction of probates and administrations, and some claims of the Commonwealth. Its judges, or a portion of them, sit as a special Court of Appeals, in cases in which the judges of the Court of Appeals proper are disqualified by interest or otherwise.

County Courts. - A Court sits in each County every month, held by four or more Justices of the Peace. These Courts, formed of plain farmers or country gentlemen, are invested with a jurisdiction wider than that of any other Court in the State, covering almost the whole field of cognizance, civil, criminal, legal, and equitable. Any one Justice can hold a Court with jurisdiction over all causes in which the value does not exceed \$20. At the monthly and quarterly sessions, which are held by four or more Justices, deeds and wills may be proved, and chancery matters and suits at common law be heard and determined, with a right of appeal to a Superior Court. These Courts, exclusively, try slaves for all offences; and they examine free persons charged with felony, previously to their trial in the Circuit Court. Free Negroes and Indians are on the same footing with slaves.

FINANCES.

The Fund of Internal Improvement, and the Literary Fund, are State corporations, each having its own resources and expenditures. The resources of each, in part, come from the public treasury. Thus, in the Fund for Internal Improvement, the greater part of the State debt is reg. istered, and the interest payable on the same comes through the warrant of the second Auditor. Should the revenue of this fund be insufficient, the deficiency is paid out of the Treasury.

Edm R Freeman		Clerk.		-

The Supreme Court holds two sessions in each year, in the City of Raleigh; to wit, on the second Monday in June and the last Monday in December; and continues to sit at each term until all the business on the docket is determined, or continued upon good cause shown. It has power to hear and determine all questions at law, brought before it by appeal from a Superior Court of Law, and to hear and determine all cases in equity, brought before it by appeal from a Court of Equity, or removed there by the parties thereto. It has original and exclusive jurisdiction in repealing letters patent, and also has power to issue writs of certiorari, scire facias, habeas corpus, mandamus, and all other writs which may be proper and necessary for the exercise of its jurisdiction.

The Judges of the Supreme and the Superior Courts are elected by joint ballot of both houses of the General Assembly, hold their offices during good behavior, and, under a provision in the amendments to the constitution of the State, their salaries cannot be diminished during their

continuance in office.

Spier Whitaker, of Halifax Co., Attorney General.

Salary of a Solicitor — \$20 for each Court which he attends, besides fees for conviction. The Attorney General receives, in addition, \$100 for each term of the Supreme Court which he attends.

The Superior Courts of law and the Courts of equity are holden in each and every county of the State, twice in each year, by the Judges thereof. For this purpose, the State is divided into seven circuits, each of which comprises about ten counties, and the Judges ride these circuits alternately, according to an arrangement agreed upon among themselves, the only restriction imposed upon them in making the arrangements being, that no Judge shall ride the same circuit twice in succession. As Judges of the Superior Courts of Law, they have jurisdiction of all pleas, real, personal, and mixed; of all suits and demands relative to legacies, filial portions, and estates of intestates; and also, of all pleas of the State and criminal matters of what nature, degree, or denomination soever, whether brought before them by original or mesne process, or by certiorari, writs of error, appeal from any inferior Court, or by any other way or means whatsoever. As Judges of the Courts of Equity, they have all the jurisdiction and powers appertaining to Courts of Chancery.

By a law passed at the last session of the Legislature, judges can hold office only up to the age of sixty-five years.

Courts of appeals in Law and Equity for hearing and determining all appeals, and motions in arrest of judgment, and for a new trial, are held in *Columbia*, on the first Monday in May, and on the fourth Monday in November, in every year. A similar Court sits in Charleston, on the

1st Monday in January, for cases brought up from the Courts in the Districts of Georgetown, Horry, Beaufort, Colleton, and Charleston.

The Courts for the correction of Errors, consisting of all the Chancellors, and Judges of the Courts of Law, are held at such time during the sitting of the Courts of Appeal, as the Chancellors and Judges may appoint. Alexander Herbemont, Clerk of the Court of Appeals.

\$1,051,422.00 — Amount of Surplus Revenue deposited with the State. 2,000,000.00 — Amount of Loan to the L. C. & C. Railroad, guarantied by the State.

"It is highly probable," says Governor Hammond, "the State will never be called on to refund the Surplus Revenue, though her liability for it should never be forgotten, in an estimate of her debt. It is to be hoped that her guaranty of the Railroad bonds is only nominal, and that in due season they will be discharged by the Railroad Company. I therefore deduct these items, in stating the Public Debt, for which certain and early provision must be made, at three millions and a half."

The receipts into the State Treasury in 1843 were \$299,196.16, and the expenditures \$277,833.77. The balance in the treasury, including an unexpended balance of previous appropriations, was about \$57,000.

COMMON SCHOOLS.

A Free School Fund exists in this State, but it has done little good, and Governor Hammond recommends, that it should be applied to the support of Academies in the several districts; he remarks, "The Free School system has failed. This fact has been announced by several of my predecessors, and there is scarcely an intelligent person in the State, who doubts that its benefits are perfectly insignificant, in comparison with the expenditure. Its failure is owing to the fact, that it does not suit our people or our government, and it can never be remedied. The

paupers, for whose children it is intended, but slightly appreciate the advantages of education; their pride revolts at the idea of sending their children to school as 'poor scholars'; and besides, they need them at home to work. These sentiments and wants can, in the main, only be countervailed by force. In other countries, where similar systems exist, force is liberally applied. It is contrary to the principles of our institutions to apply it here, and the Free School system is a failure. The sum which is annually appropriated for the support of free schools, if equally divided for one year among the twenty-eight districts of the State, giving two portions to Charleston district, will be sufficient to build in each a good Academy. If thereafter, one thousand dollars a year was appropriated to each academy, a teacher of the highest qualifications might be secured for every one, and a saving of about eight thousand dollars per annum effected by the State. If, in addition to this salary, the profits of his school were also given to the teacher, the rates of tuition could be reduced, to the advantage of the tax-payers, and he might be required to instruct, free of charge, such poor scholars as should be sent to him."

XV. GEORGIA.

GOVERNMENT.

	Salary.
GEORGE W. CRAWFORD, of Richmond	Co. Governor,
(term of office expires	s, November, 1845,) \$3,000
Nathan C. Barnet, of Clark Co.	Secretary of State, 1,600

Inferior Court.—An Inferior Court is held in each county, composed of five justices, elected by the people every four years. These Courts

possess the powers of Courts of Probate. The justices have no salary. RAILROADS.

[From the last Report of the Engineer of the Central Railroad.]

"The road being now completed, and in successful operation throughout its whole extent, it is proper that I should present a report of its entire cost, its present condition, and the result of its operations since the date of my last report.

"The track was extended to the depot at Macon, and a train passed over the whole line on the 13th of October, 1843; the Macon depot was open for regular business on the 1st of November. The trains have passed over the whole line every day since that period, Sundays excepted.

"The whole length of the road from depot to depot, is 190 miles, 1600 feet and the whole cost is \$2,581,723, of which \$168,343 is for motive power and cars; and \$68,000 damage by the freshet of 1841. Average cost of the road per mile, \$12,702. Average annual cost of repairs per mile, \$317." The Company has now 14 engines, and about 100 burden cars.

The Western and Atlantic Railroad, according to the Governor's report, Nov. 22, 1843, had cost \$2,915,008. The grading is nearly completed. with the exception of the tunnel, which is 500 yards in length. The wooden superstructure is completed 52 miles, and the iron has been procured for that distance, and 33 miles of it have been laid down. The engineer believes, that \$500,000 will be sufficient to finish the road, and put on it the necessary equipments of motive power and cars.

FINANCES.

XVL ALABAMA.

GOVERNMENT.

Salary. BENJAMIN FITZPATRICK, Governor, (term of office expires on the 1st Monday in December, 1845,) \$2,500 William Garrett, Secretary of State, Fees and 1,000 Jefferson C. Vandyke, Comptroller of Public Accounts, Fees and 1,000 Samuel G. Frierson, Fees and 1,000 State Treasurer. Thomas D. Clarke, of Talladega Co., Attorney General, Fees and 425 The Secretary of State is elected for two years; and the Comptroller and Treasurer annually; all by a joint vote of the two Houses of the General Assembly.

The Senate consists of 33 members, elected for three years, one third annually; the House of Representatives, of 100 members, elected annually. The pay of the members of both houses is \$4 a day each.

Nathaniel Terry, President of the Senate.
A. B. Moore, Speaker of the House.

JUDICIARY.

Supreme Court.

			Salary.
Henry W. Collier,	of Tuscaloosa,	Chief Justice,	\$2,250
Henry Goldthwaite,	of Mobile,	Associate Justice,	2,250
John J. Ormond.	of Tuscaloosa,	. do.	2,250

The judges of the Supreme and Circuit Courts, and also the Chancellors, are elected by a joint vote of the two Houses of the General Assembly, for six years. The judges are the reporters of their own decisions, and are allowed to print, at their own expense, any number, not exceeding 500, of their reports, to be circulated out of the State.

The Supreme Court has appellate jurisdiction only, — and only upon points of law, taken up from the Circuit or County Courts, by writ of error. This Court sits at Tuscaloosa, the seat of government, on the 1st Mondays of January and June.

Court of Chancery; - established in 1839, and remodelled in 1841.

\$1,500

Southern Division, Anderson Crenshaw, of Greenville, Butler Co., Chancellor,

This division includes the counties of Mobile, Baldwin, Washington, Clarke, Sumter, Marengo, Monroe, Conecuh, Covington, Butler, Dale, Coffee, Henry, Barbour, Pike, Montgomery, Lowndes, and Wilcox.

Middle Division, Joshua L. Martin, of Tuscaloosa, Chancellor, \$1,500
This division includes the counties of Russell, Chambers, Randolph,
Macon, Tallapoosa, Coosa, Autauga, Dallas, Perry, Greene, Tuscaloosa,
Pickens, Fayette, Marion, Walker, Jefferson, Bibb, and Shelby.

Northern Division, Alexander Bowie, of Talladega, Chancellor, 1,500
This division includes the counties of Lauderdale, Franklin, Lawrence, Limestone, Madison, Morgan, Blount, St. Clair, Marshall, Jackson, DeKalb, Cherokee, Benton, and Talladega.

One session of the Court is held annually in each Division, and the Chancellors are required to alternate with each other, so that neither may preside twice in succession in either Division. A Chancery Court is held in Montgomery, on the 1st Monday in July in each year.

CIRCUIT COURTS.

T			1		1
Judges.	Residence.	Circuit.	Salary.	Attorneys.	Residence.
John D. Phelan,	Marion,	1st,	\$2,000	William M. Brooks,	Linden.
	Selma,	2d,		Nathaniel Cook,	Hayneville.
W. K. Baylor,	,	3d,			Tuscalonsa.
	Athens,	4th,		Edward A. O'Niel,	Florence.
George W. Lane,	Huntsville,	5th,	2,000		Huntsville.
John Bragg,	Mobile,	6th,	1,500		Mobile.
Samuel Chapman,		7th,			Livingston.
Abraham Martin,	Montgomery,	8th,		Sampson W. Harris,	
Geo. W. Stone,		9th,	1,500	Thomas G. Garrett,	Talladega.

The Circuit Court has original jurisdiction in all civil and criminal causes in the State; and appellate jurisdiction in all appeals and certioraris brought up from inferior tribunals. All Circuit Court judges and chancellors elected after the passage of an Act approved Dec. 29th, 1842, are to receive a salary of \$1,500. This accounts for the inequality in the salaries mentioned above. The attorneys receive \$250 and fees.

Two Criminal Courts are held in the city of Mobile, by the judge and solicitor of the sixth Circuit, on the 4th Mondays of February and June.

FINANCES.

The total amount of outstanding bonds of the State of Alabama, on the 1st day of Nov. 1842, was \$9,834,555. This amount has not been increased.

The legislature, at its session in 1843, passed an act laying a tax of 20 cents per hundred dollars on real estate, and specific taxes upon other species of property, sales at auction, &c. The taxes assessed under this act amount to \$234,429, exclusive of the counties of Franklin and Randolph, which will yield \$3,000 more. Mobile paid \$39,010.26; Montgomery \$13,346.90. The circulation of the State banks is \$4,319,858.

A rough statement of the Treasurer's operations in 1843:

CrPayment for valueless 16th se	ection	ns for	184	2,		\$200.000
Do. for previous years, .				· .		151,000
Expenses of government,						100,000
Expenses of banks,						90,000
Interest of State bonds,						500,000
University and school funds,						80,000

\$1,121,000 900,000

Dr.—Interest on debts due, rents, real estate, taxes,

The deficit has been paid from the capitals of the banks. The expenses of the year 1844 will be diminished. No money will be payable on account of valueless 14th sections. The expenses of the banks and government will be diminished, and we presume the interest on the schools and university funds will be reduced to six per cent. This will make a reduction of above \$400,000.

XVII. MISSISSIPPI.

GOVERNMENT.

ALBERT G. BROWN,	Governor, (term of office from January,	Salary.
1844, to J	January 8, 1846,)	\$3,000
Wilson Hemingway,	Secretary of State, (term ends Nov. 1845,)	\$3,000
William Clark,	State Treasurer, do.	2,000
James E. Matthews,	Auditor of Public Accounts,	2,000
Jesse Speight,	President of the Senate.	
J. L. Totten,	Speaker of the House.	

JUDICIARY.

High Court of Errors and Appeals.

	9	2.2		
			Term ends.	Salary.
William L. Sharkey,	of Vicksburg,	Presiding Judge,	Nov. 1847,	\$3,000

John M. Duffield,	do.	Clerk.		Fees.
This Court which !	has no invisdict	ion avant what	proporly hal	on ma to

This Court, which has no jurisdiction except what properly belongs to a Court of Errors and Appeals, holds its sessions annually at Jackson, commencing on the 1st Mondays in January and November.

Superior Court of Chancery.

Robert H. Buckner, of Hinds Co.,	Chancellor,	Term ends. Nov. 1849,	Salary. \$4,000
R. L. Dixon, of Jackson,	Clerk.		, -,
H. Dickinson,	Vice Chancellor,	Nov. 1847.	
J. C. Alderson,	Clerk.		

This Court, which has jurisdiction over all matters, pleas, and complaints whatsoever, belonging to, or cognizable in, a Court of Equity, holds two sessions annually, at the city of Jackson, on the 1st Mondays of December and June, and continuing as long as business requires. It also holds two sessions a year, at Columbus and Pontotoc.

District Chancery Court.

			Salary.
Joseph W. Chalmers,	Vice Char	ncellor,	\$3,000
M. Mc Carthy,	Clerk,	at Columbus,	Fees.
M. N. W. Smith,	do.	at Fulton,	do.
Jas. C. Alderson,	do.	at Holly Springs,	do.
W. Hemingway,	do.	at Carrollton.	do.

Time of holding Court.

For the counties of Lowndes, Winston, Octibbeha, Kemper, Noxubee, and Neshoba, 1st Monday in May and November. For the counties of Itawamba, Pontotoc, Monroe, Chickasaw, and Tishamingo, 3d Monday in May and November. For the counties of Marshall, Coahoma, Tippah, De Soto, Ponola, Lafayette, and Tunica, 1st Monday in January and July. For the counties of Carroll, Choctaw, Holmes, Yalabusha, and Tallahatchie, 3d Monday in June and December.

This Court has concurrent power and jurisdiction within the district with the Superior Court of Chancery, when the amount in controversy does not exceed \$500,000. The Vice Chancellor is elected for the term of 4 years; appoints the Clerks, who hold their office for 4 years; he must be at least 30 years of age. Appeals may be made to the Superior Court of Chancery, unless by consent of both parties, when the same may be taken directly to the High Court of Errors and Appeals.

District or Circuit Courts.

The Judicial divisions were reorganized in 1840, and formed into 11 Districts, or Circuits. The salary of the Judges is \$2,000 each.

1. George Coalter, Elbridge G. Walker, Warren, Claiborne, Washin livar. 2. B. F. Caruthers, G. F. Neill, Yalabusha, Carroll, Chocta hatchie.	-

10. M. L. Fitch, Robert C. Perry, Yazoo, Holmes, Attala, and	Leake.
11. V. T. Crawford, John T. Lamkin, Hancock, Marion, Pike, A Lawrence, and Covington.	mite, Franklin,

A Circuit Court is holden in each county twice a year. This Court has original jurisdiction, in civil cases, in which the principal of the sum in controversy exceeds \$50. It has chancery jurisdiction in all cases under \$500; and has power to foreclose mortgages, without limit as to sum. It has also exclusive criminal jurisdiction.

Judges of the High Court of Errors and Appeals, and the Chancellor, are chosen by the electors for six years; the Judges of the Circuit Courts. Attorney General, and District Attorneys, as well as all military officers, are chosen by the electors for four years; all other officers, for two years.

FINANCES.

During the Fiscal Year ending March 1, 1843.

Isaac T. Preston,	of Jefferson,	Attorney General,	3,000
Raphael Toledano,		Auditor of Auction Account	s, 2,500
Martin G. Penn,	of Covington,	State Engineer,	3,500
Felix Garcia,	of German Coas	t Co., Pres. of the Senate,	\$4 a day.
Charles Derbigny,	of Jefferson,		\$4 a day.

The Senate consists of 17 members, elected one half biennially, for the term of 4 years. The House of Representatives has 60 members, elected biennially. The legislature meets annually, and the members of both branches receive \$4 a day during the session, which usually lasts 90 or 100 days. The Secretary of State, and State Treasurer, are exofficio members, and form the Board of Currency, with an additional salary of \$1,200.

JUDICIARY.

Supreme Court.

			Salary.
Francois X. Martin,	of New Orleans,	Judge,	\$5,000

These Courts, except in the 1st District, hold two terms annually. They exercise criminal jurisdiction, except in the 1st District, where it is transferred to the Criminal Court.

New Orleans Courts.

	Salary.
Parish Court. — Charles Maurian, Parish Judge,	\$3,000
Commercial Court. — Charles Watts, Judge,	4,000
Court of Probate Joachim Bermudez, Judge,	3,500
City Court. — Thomas W. Collens, Presiding Judge,	3,000
Criminal Court. — 1st District, John Francois Canonge, Judge,	3,000

These Courts, and that of the 1st District, hold sessions for 8 months in the year. The City Court is required to be open every day, except Sundays and holydays, in the year.

Court of Errors and Appeals in Criminal Cases.

					Salary.
Thomas C. Nichols, Isaac Johnson, George R. King	(Judge o	of 2d D	istrict,))	
Isaac Johnson,	(do.	3d	do.)	} Judges,	\$500
George R King	i do	5th	do 1	1 ,	

The legislature has lately provided "a Court of Errors and Appeals in Criminal cases," to be composed of three of the District Judges, with an additional salary of \$500 per annum. The law says, "this Court shall have appellate jurisdiction only, with power to review questions of law; which questions shall be presented by bills of exceptions taken to the opinion of the Judges of the lower Court, or by assignment of errors apparent on the face of the record, taken and made in the manner and form as is now provided by law for appeals in civil cases." This court is required to hold two sessions annually in New Orleans, commencing the first Monday of February and July of each year.

FINANCES.

[From a Report to the Legislature, February 23, 1844.]

The receipts from Jan. 1, 1843, to Dec. 31, 1843,	\$746,797.64
Expenditures during the same year,	652,560.43

Balance, Jan. 1, 1844, \$94,237.21 Of this balance, 42,157.14 are in notes and bonds at present unavailable. There was, however, at this date, a balance of interest due on bonds issued by the State for her own benefit, other than those issued to the property banks, amounting to

And appropriations due to schools,

\$142,515.42

Making amount due Jan. 1, 1844,

\$231,005.50

The State is responsible on the various bonds issued by her, and on deposits made with her, for a sum amounting to \$21,433,523.03, exclusive of interest.

From this should be deducted -

1st, The amount of the surplus revenue of the federal government, deposited

with the State, \$477,910.14 2d, The amount deposited for vacant estates, 27,692.89

\$505,602.03

3d, The amount of bonds issued to municipalities Nos. 2 and 3.

529 920 00

\$1,035,523.03

Which leave a balance of State liabilities for

\$20,398,000,00

These liabilities consist of two distinct and separate classes:

First, Such as were incurred by the State for administration purposes; for the purpose of sustaining and carrying on the government of the State; for the furtherance and prosecution of enterprises undertaken for the advantage of the citizens; or for objects which seemed to promise pecuniary profits to the State. These, excluding interest, amount to \$3.898,000.00.

Second, Such as were incurred by the State for the purpose of furnishing different corporate institutions with capital to be employed in banking

These consist of the following, viz:

For the Union Bank, .		\$7,000,000
For the Citizen's Bank, .		7,120,000
For the Consolidated Association,		2,380,000
Making, exclusive of interest,		 \$16,500,000

The Union Bank has thus far faithfully paid the amount due on the bonds issued to her by the State. The two other institutions have failed, and gone into liquidation; but they hold notes, secured by mortgages of real estate, from which, it is believed, enough will ultimately be obtained

to pay off all the bonds issued to them.

The State owns property which is thought to be abundantly sufficient for the redemption of the bonds issued for her own proper use and benefit. This property consists, first, of bank stock, (Bank of Louisiana, \$2,000,000; Mechanics' and Traders' Bank, \$150,000; Louisiana State Bank, \$60,000, amounting to \$2,210,000. Secondly, the right to select 500,000 acres from the unappropriated U. S. lands remaining in the State, worth at least \$4 an acre. The value of these lands then is \$2,000,000. Thirdly, various lands and public improvements, estimated at \$650,000. The whole available property, then, is \$4,860,000. It is proposed to sell this property as fast as it can be done without materially depreciating its value, and with the proceeds to pay off the State's own proper debt

XIX. ARKANSAS.

The Supreme Court has appellate jurisdiction only, except in particular cases pointed out by the constitution. The judges are elected by the General Assembly, by a joint vote of both Houses, for eight years.

The Circuit Court has original jurisdiction over all criminal cases, which are not otherwise provided for by law; and exclusive original jurisdiction of all crimes amounting to felony at the common law; and original jurisdiction of all civil cases which are not cognizable before Justices of the Peace, until otherwise directed by the General Assembly; and original jurisdiction in all matters of contract, where the sum in controversy is over one hundred dollars. The Judges are elected by the General Assembly, for a term of 4 years.

Do. do. 1,000,000 pays 6. Do.

The fiscal year is from the first Monday of October to the first Monday of October, including the former, and excluding the latter; and the above "items of expenditure" represent the sums paid in that period in 1842-3, on the several specified accounts, but do not truly set forth the actual expenditures of the whole year 1843. Thus, the sum of \$22,018.88, "pay of the Legislature," is the pay of that body at its session of 1842, which commenced on the day of the beginning of the fiscal year, 1842-3. The pay of the Legislature for 1843, will be shown in the Almanac for 1845. The total value of taxable property in Tennessee is as follows:—

Land, \$69,298.493| White polls, 85,284 Town lots. 8,404,498 Carriages, 390,158 Negroes, 42,631,238 \$120,809,671

The University of Nashville has a permanent fund of about \$45,000, which bears interest at 6 per cent., out of which interest and the tuition fees, the expenses of the institution are borne. Besides this, there is due to it about \$15,000. These constitute the sum total of its endowments; and when we remember, that the first of these sums was derived from certain lands which Congress, by its act of 1806, ch. 31, required the State to appropriate to the use of two Colleges, one in East and one in West Tennessee, we are reduced to the mortifying necessity of admitting, that the institution owes nothing to the munificence of the State. The same remark is applicable to the University of East Tennessee, and, indeed, to every literary institution in the State.

The same act of Congress required the State to appropriate 100,000 acres of land in one body for the use of Academies, one in each county in the State. By the act of the Legislature of 1837, c. 107, § 8, the Legislature appropriated the annual sum of \$18,000 to the Academies, on condition that they should relinquish to the State all claims to those lands. This relinquishment was made, and in consideration of it, the faith of the State is pledged to the annual payment of the \$18,000 to those institutions.

COMMON SCHOOLS.

I. The first provision made by law for the creation of a Common School Fund in Tennessee was by an act passed in the year 1823. It established offices for receiving entries of vacant lands north and east of a certain line, which passes across the State, called the Congressional Reservation Line. These lands were to be entered at 12½ cents per acre; and the moneys received were to be paid by the entry-takers, every three months, to the Agents of the Bank of the State of Tennessee in their respective counties, except Davidson and Knox, in which counties they were to be paid to the principal banks. All these moneys were to be lent out by the banks and their agents, and the principal was to "remain and constitute a perpetual and exclusive fund for the establishment and promotion of Common Schools in each and every county in the State."

II. The taxes on those lands were also to constitute a part of the perpetual fund, and the tax collectors were to keep them separate, and pay them over to the bank and its agents, who were to make a semi-annual distribution of the interest upon the proceeds of those lands and taxes, among the School Commissioners created by the same law.

III. By an act passed in 1827, the following funds were "appropriated to the encouragement and support of Common Schools forever." 1. All the capital of the new State Bank, except the one half of the sum already received, and the interest on that capital. This capital was a million of dollars, "in bills emitted on the credit and security of the borrowers, the whole to be warranted by the State on the proceeds of the sales of its unappropriated lands." 2. The proceeds of the sales of the Hiwassee lands. 3. All lands previously appropriated in the State to the use of schools. 4. All the vacant and unappropriated land in the State, to which the State had, or might have, title. 5. All the rents and mesne profits of School lands, accrued and not already appropriated, or to accrue. 6. All the funds denominated school, or common school funds, in the act of 1823, not already otherwise disposed of. 7. The donation made to the State by Mason Lee, of South Carolina, with a certain exception. 8. The donation of John Rice, of 5,000 acres of land. 9. All other donations that had been, or might be, made to the State, unless for some other specific purpose. 10. All the stock owned by the State in the old bank of the State, at Knoxville, amounting to 400 shares of the stock of that bank, together with the dividends due thereon. 11. Escheated lands. 12. All the personal effects of intestates having no kindred entitled by the laws of distribution to the

IV. By the amended Constitution of 1834, art. 11, § 10—" The fund, called the Common School Fund, and all the lands and proceeds thereof, dividends, stocks, and other property of every description whatever, heretofore by law appropriated by the General Assembly of the State for the use of Common Schools, and all such as shall hereafter be appropriated, and the interest thereof, shall be inviolably appropriated to the support and encouragement of Common Schools throughout the State, and for the equal benefit of the people thereof; and no law shall be made authorizing said fund, or any part thereof, to be diverted to any other use than the support and encouragement of Common Schools; and it shall be the duty of the General Assembly to appoint a Board of Commissioners for such term of time as they may think proper, who shall have the general superintendence of said fund, and who shall make a report of the condition of the same, from time to time, under such rules, regulations, and restrictions as may be required by law."

V. This Board, consisting of the Treasurer, Comptroller of the Treasury, and an executive officer called the Superintendent of Public Iustruction, was created by an act passed at the session of 1835-6, and was made a body politic and corporate, with pertual succession, and the power of holding and possessing property of every kind in trust, for the use of common schools, by the name and style of the "Board of Commissioners of Common Schools for the State of Tennessee." As a preliminary measure to the organization of the schools, it was made the chief business of this Board, and

espectally of the Superintendent, to collect the Common School Fund, and to invest it in the stock of the Planters' Bank.

1845.

VI. By an act passed at the session of 1837 - 8, the "Bank of Tennessee" was established, and "the whole of the Common School Fund, whether vested in the stock of the then existing banks of the State, or in the hands of the Superintendent of Public Instruction, or in the hands of county agents or other persons, except so much as may have been vested in any works of internal improvement, was made a part of the capital of that Bank. And the Superintendent was to pay the fund, as well as the proceeds of certain lands, to the Bank as part of its capital, and was to receive from the bank State stock, or certificates of debt therefor. Of the dividends of the bank, one hundred thousand dollars was annually set apart for Common Schools, and the faith of the State pledged for its annual appropriation to that object, and eighteen thousand dollars to Academies.

VII. The school fund having been thus created, and a large part of it collected and invested under these laws, an act was passed at the same session of 1837 - 8, "to establish a system of common schools in the State," reënacted and amended by an act passed at the session of 1839-40, by which it is made the duty of the superintendent, every year, on the third Monday in July, to apportion the school moneys to the counties, according to the ratio of their white children between the ages of 6 and 16 years, respectively, as compared with the white children of the whole State within those ages, ascertained by the county school commissioners.

The Fund now consists of

1.	Ran	1- 5	ton	1

	Union Bank,								\$48,894 00
	Planters' Bank,								244,500.00
	Farmers and Merc	chant	s' Ba	nk o	f Me	mphis	, .		700.00

BOARD OF INTERNAL IMPROVEMENT.

			Salary.
Thomas Metcalfe,	of Nicholas,	President,	\$1,000
James Davidson,*	of Frankfort,	State Treasurer,	100
Austin P. Cox,*	do.	Secretary,	500
	* Wembers er a	ficio	

The Governor is authorized to make such temporary appointments of Engineers, as may be deemed expedient by the Board.

FINANCES.

The State debt is \$4,064,500, of which \$615,000 is at the rate of 5 per cent., and the balance at 6 per cent. interest. The Commissioners of the Sinking Fund have promptly paid the interest on the debt. The Commissioners of the Sinking Fund are W. Owsley, Governor and Chairman ex officio;

John Tilford, President of the Northern Bank of Kentucky; Virgil McKnight, President of the Bank of Kentucky; Joshua B. Bowles, President of the Bank of Louisville; Ben. Hardin, Secretary and Treasurer.

Banks. There are three principal Banks. (1.) The Bank of Kentucky, at Louisville; capital, \$3,700,000, of which the State owns 7,239 shares, of \$100 each. It has branches at Lexington, Maysville, Danville, Greensburgh, Hopkinsville, and Frankfort. Virgil McKnight, President, and Geo. C. Gwathmey, Cashier. (2.) Northern Bank of Kentucky, at Lexington; capital, \$2,237,000. John Tilford, President; M. T. Scott, Cashier. It has branches at Paris, Richmond, Covington, and Louisville. The State owns 2,540 shares, at \$100 each. The usual dividend is 7 per cent. per annum. (3.) Bank of Louisville; capital, \$1,083,800, branches at Paducah and Flemingsburgh. The State owns 406 shares. The usual dividend is 6 per cent. Value of taxable property, in 1843, \$196,729,033; white males over 21, in 1843, 124,700. Total revenue, \$312,235.86, exclusive of Bank stocks, tolls on rivers and roads, and profits of the Penitentiary. Surplus in the Treasury, Oct. 10, 1843, \$64,614.10

Board of Education.

Ryland T. Dillard, of Lexington, Superintendent of Public Instruction, and Chairman ex officio. Salary, \$750 and expenses. Ben. Hardin, Secretary of State, and Owen G. Cates, Attorney General, members ex officio.

" Average annual profits for four preceding years, \$28,000.

John M. Gallagher, of Springfield, Speaker of the House.
D. A. Robertson, Clerk of the Senate.
C. Borland, Clerk of the House.

JUDICIARY.

Supreme Court.

				Elected.	Salary.
Ebenezer Lane,	of	Sandusky City,	Chief Judge,	1837,	\$1,500
Reuben Wood,	of	Cleveland,	Assoc. Judge,	1840,	1,500
Matthew Burchard,	of	Warren,	do.	1842,	1,500
Nathaniel C. Reed,	of	Cincinnati,	do.	1842,	1,500
Edwin M. Stanton,	of	Steubenville,	Reporter.		

The Judges of the Supreme Court, the President and Associate Judges of the Courts of Common Pleas, and the Judge of the Superior Court of Cincinnati, are elected by the legislature, for seven years. Of the Judges of the Supreme Court, the oldest in commission is Chief Judge. Two of the four Judges form a quorum, who hold a court in each county once every year.

Superior Court of Cincinnati.

David K. Esté, of Cincinnati,

Judge,

Salary, \$1,200

This Court has concurrent jurisdiction, with the Court of Common Pleas of the county of Hamilton, at common law and in chancery.

Courts of Common Pleas.

•		Salary.
of Dayton,	Judge 1st Circuit,	\$1,200

of St. Clairsville,	do. 15th do.	1,200
	of Marion, of Canfield, of Zanesville, of Carrolltown, of Chillicothe, of Lebanon, of Mc Connelsville, of Cincinnati, of Batavia, of Mansfield, of Columbus, of Toledo, of Painsville,	of Marion, do. 2d do. of Canfield, do. 3d do. of Zanesville, do. 4th do. of Carrolltown, do. 5th do. of Chillicothe, do. 6th do. of Mc Connelsville, do. 8th do. of Cincinnati, do. 9th do. of Mansfield, do.11th do. of Columbus, do.12th do. of Toledo, do.13th do. of Painsville, do. 14th do.

The several Courts of Common Pleas are held, three times a year, by a President Judge and three Associate Judges, in most of the counties; but in the counties very recently organized, only twice a year. Three of the above-mentioned Judges receive but \$730 per annum, because they were elected after the law of January, 1844, reducing the salaries of public officers, was passed. The Associate Judges receive \$2.50 a day.

FINANCES.

Balance remaining in the Treasury, Nove	ember	15th,	1842,	\$64,361.25
Amount collected and paid by County	Treas	rers,	in the	e
year ending November 15th, 1843, .				199,468.72
Miscellaneous items of revenue,	. =			64,440.31
Total receipts,				\$328,270.28
Expenditure during the year,				233,462.36
Balance in Treasury, November 15, 1843,				94,807.92

The following are some of the chief items of expenditure:

State officers, .	\$7,600.00	Lunatic Asylum,	\$19,000.00
Judges and Reporter,	25,800.00	Institution for the Blind,	10,300.00
Ohio Legislature,	43,072.00	Board of Public Works,	3,600.00
Deaf and Dumb Asylum,	9,814.73	State Printer,	18,491.18

Amount of taxable property, and of taxes assessed during the year 1843.

No. of acres of land,	22,625,808	State and Canal Tax,	\$934,899.19
Value, including houses,	\$\$4,440,180	County and School Tax,	606,358.38
Value of town lots and building	s, 21,056,202	Road Tax,	190,979.30
No. of horses,	368,457	Township and Poor Tax,	185,428.88
Estimated value,	\$14,738,240	Corporation and Bridge Tax,	194,257.59
No. of cattle,	700,654	Physicians' and Lawyers' Tax,	6,276.92
Estimated value,	\$5,613,799	School-house Tax,	17,037.62
Capital and money at interest,	7,120,998	Delinquencies,	226,604.93
No. of pleasure carriages,	11,997		
Estimated value,	\$694,375	Total Taxes,	2,361,842.81
Total am't of taxable property,	\$133,663,794		

The whole amount of the State debt is \$18,668,321.61. Of this, however, \$1,406,267.46 are owned by the State itself, being a part of the permanent school fund. \$14,345,212.50 bear interest at 6 per cent., \$1,500,000 at 7 per cent., and \$550,000 at 5 per cent. The annual interest on this debt is regularly paid, being provided for by the proceeds of the public works, and by a permanent tax imposed by law.

COMMON SCHOOLS.

School Funds accruing during the year 1843:

Five per cent. interest on surplus revenue,	\$100,314.50
Tax, &c., for common school purposes,	99,814.32
Interest on special funds for common schools,	28,387.98
Interest on proceeds of 16th section in every township,	56,133.92
Total	\$284 521 01

The law requires minute and specific returns of the condition of the schools each year; but there are no means of enforcing this law, and it is quite generally neglected. The few returns received in 1843 are so incomplete as to be worthless. The Secretary of State remarks, that "not a few of the township superintendents lack the capacity to make a report with the form before them."

INTERNAL IMPROVEMENTS.

Names of Works.	Length in miles.	Cost.	Revenue in 1843.	Expenditure in 1843.*

II. Internal Improvement Debt.—The State has received, or acknowledges due, on her five million loan debt, including interest from July 2d, 1841, to July 1st, 1845, funded or proposed to be funded, the sum of \$2,987,000, or nearly \$3,000,000; the annual interest of which, at 6 per cent., will be about \$180,000. The annual receipts on the Central and Southern Railroads, on which the State relies for the payment of the above interest, are estimated, when the former shall be completed to Kalamazoo, at from \$350,000 to \$400,000, one half of which or more, when the roads are fully stocked with locomotives and cars, will be net profits, amounting to \$175,000 or \$200,000.

III. University Stock. The interest on this stock, \$100,000 at 6 per cent, or \$6,000 per annum, is met regularly from the income of the University Fund, which now averages about \$8,000 a year.

IV. Loans to Railroad Companies. The only other stocks of this State, not enumerated above, were issued in pursuance of two loans to Railroad Companies, for which the State is contingently liable; one of \$100,000 to the Detroit and Pontiac Railroad Company, and one of \$20,000 to the Palmyra and Jackson Railroad Company. For the principal of the latter loan, and \$6,300 of back interest, the State sold the road in June, 1844, and bid it in at \$22,000. Fifteen miles of it, from Palmyra to Clinton, had been finished for two years or more, except ironing, and had been used some on the wooden superstructure. It is supposed, that that part of the road lying north of the southern railroad of the State will be ironed by the State, and converted into a branch of that road. On the loan of \$100,000 to the Detroit and Pontiac Railroad Company, it is expected that the State will receive pay before the close of the year 1846; if not, the lien which the State has on the road is deemed ample security.

INTERNAL IMPROVEMENTS.

Board of Commissioners.

O. C. Comstock, Jr. of Marshall, Acting Commissioner, salary, \$1,000.

The Secretary of State and State Treasurer are ex officio members.

The Central Railroad, which was in operation during 1842 and 1843, from Detroit to Jackson, 80 miles, has been extended to Marshall, 112 miles from Detroit. Under the appropriation of 150,000 acres of State lands, for continuing the road beyond Marshall to the village of Kalamazoo, a distance of 32 miles further towards Lake Michigan, the grading has been mostly completed, and a large portion of the timber for the superstructure got out. An additional appropriation of 64,000 acres of land was made by the Legislature of 1844, which, it was estimated, would be sufficient to get that part of the road ready for iron by the summer or fall of 1845; and there was also appropriated \$75,000 of the unpledged proceeds of the road for the purchase of the necessary iron. The Southern Railroad, which has been in operation from Monroe to Adrian, 36 miles, since 1841, was completed to Hillsdale, 68 miles from Monroe, in October, 1843. The proceeds of the Central and Southern Railroads, for the fiscal year ending November 30, 1843, and for the first seven months of that year, and of the year ending Nov. 30, 1844, have been as follows: -

	Fiscal year 1943.	First 7 mos. 1843.	First 7 mos. 1844.
Central Railroad,	\$149,986.51	\$50,817.16	\$98,547.87
Southern Railroad,	24,040.50	4,192.95	32,108.26
	\$174.027.01	\$55.010.11	\$130,656,13

As the Central Railroad will extend to Marshall, 32 miles further than last year, for the last four or five months of the year ending Nov. 30, 1844, the proceeds of that road for 1844 are estimated at about \$225,000; and the proceeds of the Southern Railroad for the year at \$75,000, or upwards; or for both roads at \$300,000.

The Erie and Kalamazoo Railroad is constructed by a private company, and is in operation from Toledo to Adrian, 30 miles. The Detroit and Pontiac Railroad, also constructed by a private company, is in operation from the former to the latter place, 25 miles. No statements of the proceeds of either of those roads are published. The former has never paid any dividend to its stockholders; and a large portion of its former business is being drawn off by the State Southern Railroad to Monroe. The road from Detroit to Pontiac is doing a respectable and increasing business.

Colleges.—The only public and permanently organized literary institution in the State, which may be considered as fairly in operation, is the "University of Michigan," which was opened for the reception of students in the fall of 1842, since which time, the number of students has been gradually increasing. Last collegiate year, there were three classes,

a freshman, sophomore, and junior, consisting of about 60 students. Of the five professors appointed by the Board of Regents, and constituting the present Faculty, only two, the Professor of Ancient Languages, and the Professor of Mathematics, have been in actual service, and in receipt of salaries. During the last year, a tutor was added, to enable these gentlemen to perform, ad interim, the duties to some extent of the Professor of Moral and Mental Philosophy, and of a Professor of Natural Philosophy. It is expected, that the Professor of Moral Philosophy will enter upon the duties of his chair at the beginning of the next academic year. The University has a very valuable cabinet of natural history, (see Almanac, 1844,) and a well-selected library of about 4,000 volumes. There are now four preparatory schools, beside the one at Ann Arbor, the seat of the University, in operation, supported in part by the Board of Regents, as branches of the University; namely, at Kalamazoo, White Pigeon, Tecumseh, and Romeo, having in all, under their charge, at the last reports, about 150 students. In Detroit, as well as at some other points in the State, there are some well conducted and useful grammar or high schools, where the elements of a liberal English education are taught. In some of them are taught, also, some of the ancient and principal modern languages.

Charters have been granted for some three or four literary institutions, to be organized on private foundations, or connected more or less with some one of the leading Christian denominations. The "Wesleyan Seminary," at Albion, in Calhoun county, has its buildings partly up, and is getting under way with very fair prospects and very respectable means for an infant institution; the funds for its endowment having been mostly contributed by members of the Methodist persuasion. A charter for an institution to be called "Marshall College" was obtained by the Rev. John P. Cleveland, formerly a Presbyterian clergyman in Detroit, and latterly at Marshall, but who is now settled at Cincinnati, Ohio; and it is not supposed that the institution will soon, if ever, be organized, as originally contemplated. The Baptists have a "Literary Institute" chartered, which was at one time partially under way at Kalamazoo, but which is probably superseded at present by the branch of the University at that place. The Catholics have a charter for an institution called "St. Philip's College," located near Detroit, but which has not made much progress yet towards being opened as a collegiate institution.

STATE LAND OFFICE.

This office was opened in April, 1843, and has the general charge and disposition of the school, university, internal improvement, and other lands, belonging to the State. Part of the 500,000 acres granted by Congress to this State for purposes of internal improvement were advertised for sale, and brought into market about the middle of July, 1843;

and during the 4½ months to Dec. 1, 1843, there was sold of these and other internal improvement lands, to the amount of \$61,941.31, all of which, except a few dollars, was paid in internal improvement warrants. An additional quantity of these half million acres of internal improvement lands, as also of some other State lands, were brought into market in June, 1844, and are selling off rapidly for State warrants.

Payments of principal or interest due on school or university lands can be made either at the land office or at the State treasury. About 25 per cent. only of the principal on sales of school or university lands is required to be paid, except at the option of the purchaser; the unpaid balance bearing an interest of 7 per cent. per annum. A part of what has been paid in on account of the principal of those funds remains in the State treasury; but the greater portion has been loaned out to different counties or individuals, on bonds and mortgages, or other securities.

STATE PRISON.—The State Penitentiary, situated at Jackson, is constructed on the Auburn plan. The number of prisoners October 31, 1842, was 87; received during the year ending October 31, 1843, 43; discharged during the year, 36; number remaining October 31, 1843, 94. The earnings of the convicts for the year 1843, are estimated by the agent at \$10,346.36; but the convicts being mostly employed in extending the prison wall, and rebuilding a prison shop burnt in August, 1843, the sum of \$8,000 was drawn from the State treasury for their support.

COMMON SCHOOLS.— Amount of school moneys apportioned from the State treasury amongst the several school-districts, for the last three years, being the net income of the school fund during that period.

Year	Scholars.	Rate per scholar.	Amount apportioned.
1842	48,428	32 cents.	\$15,496.96
1843	52,141	37 "	19,292.17
1844	66.818	42 "	28,063.56

Number of districts that reported last year, 1,743. Average number of months school was kept, about four. Amount raised in the several districts for school purposes, \$44,705.90, in addition to which, and to the \$28,000 derived from the school fund, there will be levied and collected in each of the counties, a tax of half a mill on the dollar, which will yield, throughout the State, about \$14,000; making in all about \$87,000 raised for school purposes, or fully one half more than the whole tax assessed for the support of the State government. Michigan ranks next to five of the six New England States, as to having the least comparative number of adults within her limits, unable to read and write. Great exertions are made, and great interest is felt, throughout the State generally, for the maintenance of good common schools; and it is believed, that both as to means for educating the rising generation, and as to the success of her school system, she is but little, if at all, behind the most forward of the eastern States.

XXIV. INDIANA.

GOVERNMENT.

			Salary.
JAMES WHITCOMB,	of Vigo,	Governor, (term of	office
	ex	pires in December,	1846,) \$1,500
Jesse D. Bright,	of Jefferson,	Lieut. Governor,	Pay, \$3 a day.
William Sheets,	of Indianapolis,	Secretary of State,	800
Royal Mayhew,	do.	Treasurer of State,	1,000
H. J. Harris,	do.	Auditor of Public A	ccounts, 1,000
James Morrison,	do.	President of the State	Bank, 1,300
James M. Ray,	of Indianapolis,	Cashier of the State	Bank, 1,100
Michael G. Bright,	State Agent,	\$1,000 and trave	lling expenses.
T. J. Reynolds,	of Indianapolis,	Quartermaster Gen	eral, 100
Joseph R. Pratt,	of Jeffersonville,	Keeper of the Penite	ntiary, Profits.
T. B. Kinder,	of Indianapolis,	State Librarian,	300

JUDICIARY.

Supreme Court.

			Salary.
Isaac Blackford,	of Indianapolis,	Chief Judge,	1,500
Charles Dewey,	of Charleston,	Judge,	1,500
Jeremiah Sullivan,	of Madison,	do.	1,500
Henry P. Coburn,	of Indianapolis,	Clerk,	Fees.

The judges are appointed by the Governor and Senate for 7 years, and the senior in commission is the Chief Judge. This court holds its sessions at Indianapolis, in May and November. It has appellate jurisdiction only, except in capital cases, and cases in chancery in which the President of the Circuit Court may be interested.

Circuit Courts.

Circ. President Judges.		Prosecuting Attorneys	
1st, Isaac Naylor,	of Crawfordsville.	Joseph E. McDonale	d. `
2d, J. H. Thompson,	of Salem.	William A. Porter,	of Corydon.
3d, Miles C. Eggleston,	of Madison.	John Dumont,	of Vevay.
4th, Elisha Embree,	of Princeton.	James Lockhart,	of Mount Vernon.
5th, William J. Peaslee,	of Indianapolis.	A. A. Hamilton,	of Columbus.
6th, J. T. Elliott,	of Newcastle.	Jacob B. Julian,	of Centreville.
7th, John Law,	of Vincennes.	John P. Usher,	of Terre Haute.
8th, John W. Wright,	of Logansport.	Spier S. Tipton,	of Logansport.
9th, E. M. Chamberlain,	of Elkhart.	Vacant.	
10th, David McDonald,	of Washington.	William G. Quick,	of Martinsville.
11th, David Kilgore,	of Yorktown.	John M. Wallace,	of Andersontown,
12th, James W. Borden,	of Ft. Wayne.	W. H. Coombs,	of Ft. Wayne.

The President Judges and the Prosecuting Attorneys are elected by the legislature,—the judges for 7 years, and the attorneys for 2 years; and the Associate Judges and Clerks of the Courts are elected by the people for 7 years. The President Judges receive each a salary of \$800 and the Judge of the 5th Circuit is allowed \$300 in addition, optional with the County Commissioners of his Circuit; the Attorneys have each a salary of \$150 and perquisites. The Judges hold two terms in each county annually. There are two Associate Judges in each county, who receive \$2 a day during the session.

INTERNAL IMPROVEMENTS.

Indianapolis and Madison Railroad.—The distance between Indianapolis and Madison is about 80 miles. The railroad is nearly completed to Columbus, about 40 miles, half way between the two first-named points.

The Wabash and Eric Canal begins at the town of Toledo, on the Maumee bay, at the western extremity of lake Eric, passes up the valley of the Maumee river a distance of 75 miles in the State of Ohio, and thence through the State of Indiana, a further distance of 145 miles to Lafayette, making the whole length now opened, 220 miles. The canal is in rapid progress from Lafayette to Terre Haute, 90 miles, two thirds of the work being completed. From Terre Haute to Evansville, about 140 miles, some 45 miles are nearly finished, and \$225,000 have been expended on the remainder. The whole canal will be 450 miles long. It is of large dimensions, and has been built at a great cost. The lower portion of this canal, for a distance of 60 miles, is 6 feet deep, and 60 feet wide.

FINANCES.

The revenue paid in for the year ending October 31st, 1843, was \$213,716.66. The amount of the common school fund, derived from bank dividends, was \$59,243.44. The number of acres of land assessed in 1843, was 14,674,599. The value of all property taxed, was \$103,709,853. The number of polls taxed was 121,919. The internal improvements of the State consist of one railroad, three turnpike roads, and five canals. The amount of the State debt was \$13,899.000.00; of which sum, \$1,527,000.00 accrued from bank stock, and the balance for internal improvements. The expenses of government in 1843, were \$90,897; for 1844, they are estimated at \$100,000. The income is estimated at \$240,000, mostly paid in State Treasury Notes.

XXV. ILLINOIS.

GOVERNMENT.

	Salary.
THOMAS FORD, of Springfield, Governor, (term ends 1st Mon-	
day in December, 1846,)	\$2,000
John Moore, of McLean Co., Lieutenant Governor, \$6 a day	
during the session, and \$4 for every 20 miles of travel.	
Thompson Campbell, of Galena, Secretary, (including clerk hire,)	1,500
William L. D. Ewing, of Hillsborough, Auditor, (do.)	1,850
Milton Carpenter, of Hamilton Co., Treasurer, (do.)	1,000
Walters & Weber, Public Printers.	
The Governor is, ex officio, Fund Commissioner.	
Norman H. Purple, of Peoria, Bank Commissioner.	

Joel Manning, of Lockport, Secretary of the Commissioner.

Each member of the legislature receives \$4 a day during the session, and \$4 for every 20 miles of travel. The Lieutenant Governor is Speaker of the Senate. Samuel Hackelton, of Fulton Co., Speaker of the House.

Jacob Fry, of Lockport, Acting Commissioner on the Canal.

JUDICIARY.

Supreme Court.

* **		or 1 T			

* Holding office by Executive appointment.

The judges are elected by the legislature, and hold their offices during good behavior. Five constitute a quorum. The judges all perform circuit duties, the State being divided into nine circuits, or preside in the Circuit Courts. There are nine State's attorneys, who are elected by the legislature bienially. Salary, \$350 and fees.

The only other courts now in the State are those held by probate justices and justices of the peace. The former have jurisdiction in actions of debt or assumpsit by or against administrators, &c., where the amount in controversy does not exceed \$1,000, and the general powers of probate courts. The latter have jurisdiction in actions of debt or assumpsit, not exceeding in amount \$100; and exclusive jurisdiction in cases of assaults and battery. In trespass to personal property and trover, where the damages claimed do not exceed \$20, justices of the peace have also jurisdiction. In all suits for debts, where the damages claimed exceed \$20, the Circuit Courts have jurisdiction, and they are Superior Courts of general jurisdiction, both civil and criminal.

The Governor and Justices of the Supreme Court constitute a Council of Revision, which acts upon all laws, approving or disapproving them.

ILLINOIS CANAL. - The report of Gov. Davis and Capt. Swift on the Illinois Canal, which has excited a strong interest, has been published. Some of the principal facts exhibited by the report are, 1st, The amount of liabilities of the canal is \$5,239,792, and the amount of promissory notes, &c., applicable to the extinguishment of those liabilities, \$393,034, leaving a balance of \$4,846,756. 2. The expense of completing the canal will depend upon the arrangements made for the supply of water; viz. \$1,600,000 in case one plan be pursued; \$1,680,000 in another case; \$1,800,000 if both the Fox and Calumet rivers are embraced, together with the sources relied upon under the first plan. 3. The property proposed to be pledged is a satisfactory security for the proposed loan of \$1,600,000, and will reimburse the same with interest. 4. The works may be completed in three years. 5. A subscription of a million of stock has been make in the United States, but whether reliable or not, the commissioners are unable to state. Considerable attention is given to the question whether a preference can be given under the act of 1843, to the subscribers to the new loan of \$1,600,000. Chancellor Kent has given the opinion that such a preference can be legally given.

XXVI. MISSOURI.

GOVERNMENT.

JOHN C. EDWARDS, Governor, Nov. 1848, \$2,000

289

A Circuit Court for each county is held twice in each year. The jurisdiction of the Circuit Court extends to all matters of tort and contracts over 90 dollars, where the demand is liquidated, and over 50 dollars, where the agreement is parol. It has exclusive criminal jurisdiction, and superintending control over the County Courts and Justices of the Peace, subject to the correction of the Supreme Court. The Circuit Court is held in each county. The Judges of the Supreme and Circuit Courts are nominated by the Governor, and confirmed by the Senate; and they hold their office during good behavior, though not beyond 65 years of age.

Court of Common Pleas of St. Louis.

John M. Krum, of St. Louis, Judge, Salary, \$2,000

Criminal Court of St. Louis.

A. W. Manning, of St. Louis, Judge, Salary, 1,000

This is a local tribunal, established for exercising criminal jurisdiction only in the county of St. Louis. An appeal lies to the Supreme Court. The Judge is appointed by the concurrent vote of the two Houses of the General Assembly; and he holds his office during good behavior.

County Courts. — The jurisdiction of the County Courts is limited to matters of probate and local county affairs, as roads, &c. A County Court sits in each county, and is composed of three justices, who are elected by the people, and hold their offices for four years. An appeal lies to the Circuit Court.

FINANCES.

La Fayette Kellogg	, of Madison,	Clerk,		Fees.
Thomas P. Burrett,		Reporter.		

District Courts. — The Territory is divided into three judicial districts, in each of which a district court is held twice a year, for each county within the district, by a Judge of the Supreme Court, assigned to the district, who appoints his own clerk, and has original jurisdiction of all real and personal actions arising under the constitution and laws of the United States and of the Territory, and appellate jurisdiction from Judges of Probate and Justices of the Peace.

1st Dist., Iowa, Grant, and Crawford, Mr. Justice Dunn.
2d do. Green, Rock, Walworth, Jefferson, and Dane, Mr. Justice Irvin.
3d do. Brown, Milwaukie, and Racine, Mr. Justice Miller.

The Supreme Court appoints its own clerk, and holds its session at Madison, on the third Monday of July; it has appellate jurisdiction of all cases from the District Courts, and original jurisdiction of all cases of mandamus, quo warranto, prohibition, error, &c. Its decisions are reported by an attorney appointed by the Court, and published with the laws every year. An appeal lies to the U. S. Supreme Court.

XXIX. IOWA TERRITORY.

GOVERNMENT

. GOVERNMENT.	Salary
JOHN CHAMBERS, of Iowa City, Governor and Superintendent of	
Indian Affairs, (term from July 15th, 1844, to July, 1848,)	\$2,500
Samuel J. Burr, of Iowa City, Secretary,	1,200
William L. Gilbert, do. Auditor,	100
Morgan Reno, do. Treasurer and Librarian,	210
John M. Coleman, do. Territorial Agent & Sup't of Capite	ol, 1,000
Edwin Guthrie, of Fort Madison, Warden of the Penitentiary,	500

This country was erected into a territorial government by an act of Congress, of June, 1838, to take effect on the 4th of July following. The legislative power is vested in the Governor and a Legislative Assembly, which meets annually on the 1st Monday of December, at Iowa City, the seat of government; and it consists of 13 members of the Council, elected for two years, and of a House of Representatives consisting of 26 members, elected annually. Pay of the members, \$3 a day, and \$3 for every 20 miles' travel.

On the 5th of April, 1843, the people voted, by a majority of 2,400, to form a State Constitution. A convention for this purpose will meet in October, the delegates to it being chosen in August.

By a census taken in 1844, it appears that the population of this territory is now 82.254.

JUDICIARY.

	0.ODIGIAN	.1.0	Salary.
Charles Mason,	of Burlington,	Chief Justice,	\$1,800
Joseph Williams,	of Bloomington,	Associate Justice,	1,800
Thomas S. Wilson,	of Du Buque,	do.	1,800
John G. Deshler,	of Bloomington,	Attorney,	Fees and 200
Isaac Leffler,	of Burlington,	Marshal,	Fees and 200
Wm. J. A. Bradford,	of Davenport,	Reporter,	300
George S. Hampton,	of Iowa City,	Clerk,	Fees.

L. D. Stockton,	of Burlington,	Attorney, 1st District,	Fees.
James P. Carlton,	of Iowa City,	do. $2d$ $do.$	Fees.
James Crawford,	of Du Buque,	do. 3d do.	Fees.

The Judges are appointed for four years, and the term of the present Judges expires July 4th, 1846. The Territory is divided into three judicial districts, and the Judges perform circuit duties. The Supreme Court, composed of all the Judges, meets annually, in July, at Iowa City.

XXX. DISTRICT OF COLUMBIA.

The District of Columbia is under the immediate government of Congress. The city of Washington became the seat of the government of the United States, in 1800; and it is the residence of the President, and the other chief executive officers of the national government.

PARLIAMENT.

The Parliament of Great Britain consists of a House of Lords and a House of Commons.

The House of Lords consists of Lords Temporal, who are Peers of the realm, and whose honors, immunities, and privileges are hereditary; and Lords Spiritual, consisting of Archbishops and Bishops.

The House of Lords is composed of all the five orders of nobility of England, viz: dukes, marquises, earls, viscounts, and barons, who have attained the age of 21 years, and labor under no disqualification; of 16 representative peers from Scotland; 28 representative peers from Ireland; 2 English archbishops and 24 bishops, and 4 representative Irish bishops. The number of each, in 1844, was as follows:

Dukes, (3 Royal Dukes,)	23	Peers of Scotland, (elected 1841,) 16
Marquises,	20	Peers of Ireland, (elected for life,) 28
Earls,	115	English Archbishops and Bishops, 26
Viscounts,	21	Irish Archbishops and Bishops, 4
Barons,	206	Total, 459

House of Commons.

Elected July, 1841. - Rt. Hon. Charles S. Lefevre, Speaker.

The House of Commons consists of knights, citizens, and burgesses, respectively chosen by counties, cities, and boroughs, apportioned as follows:

England and	Wales, for	Counties, Universities, Cities and boroughs,					${159 \atop 4}$	500
Scotland,	for ·	Counties, Cities and boroughs,	•		•	•	${30 \atop 23}$	53
Ireland,	for	Counties, University, Cities and boroughs,		·			$\binom{64}{2}$	105
	Total,							658

The Union of Ireland was carried into effect January 1st, 1801: and the Parliament which sat the same month, and which included the members from Ireland, is styled the 1st Imperial Parliament; and the Parliament which assembled January 29, 1833, is styled the 11th Imperial, or 1st Reformed Parliament. The following table exhibits the succession of Parliaments since the union with Ireland:

FRANCE.

MINISTRY. - October 29, 1840.

Marshal Soult, Duke of Dalmatia,	Pres. of the Council and Min. of War.
M. Guizot,	Minister of Foreign Affairs.
M. Martin (du Nord,)	Minister of Justice and Public Worship.
Admiral Duperrè,	Minister of Marine and the Colonies.
Count Duchatel,	Minister of the Interior.
M. Cunin Gridaine,	Minister of Commerce and Agriculture.
M. Teste,	Minister of Public Works.
M. Villemain, (Peer,)	Minister of Public Instruction.

POPULATION. — The following is a statistical and official table of the population of France since the year 1700:

Minister of Finance.

M. Lacave Laplague,

I - I		 	_	 	and the jump					
1700,	•				19,669,329	1820,				30,461,875
1762,					21,769,163	1826,				31,858,937
1784,					24,800,000	1831,				32,569,223
1789,					25,065,883	1836,				33,540,910
1802,					27,349,003	1842,				34,194,875
1806.					20 107 425	,				

The population of Paris, according to the census of 1841, amounts to 912,330; and, if the troops of the garrison and strangers are added, to 1,035,000.

AMERICAN OBITUARY.

1843.

Aug. 10. — In New Brunswick, N. J., Robert Adrain, L.L. D., aged 68, a native of Ireland, whence he came with Emmet and others. He was much distinguished as a man of science, and was made Professor of Mathematics successively at Rutgers' College, N. J., and Columbia College, N. Y.

Oct. 26. — In Boston, Ms., Hon. Alden Bradford, aged 78. He had been Secretary of the commonwealth, and had written several valuable works of biography and history, among which was a "History of Massachusetts." He was ever ready to lend all his influence to any measure of reform and philanthropy, which promised to improve the welfare of his fellow-men. He was born in Duxbury, Ms., a lineal descendant of William Bradford, the second governor of Plymouth colony, and graduated at Harvard College, in 1786. He afterwards became a tutor in that institution, and having completed his studies for the ministry, was settled as a pastor at Wiscasset, Me. He remained there eight years, when he was obliged to leave on account of a failure of his health. He held the office of Secretary of State in Massachusetts from 1812 to 1824, and his public life was irreproachable.

Dec. 24. — In Providence, R. I., Gen. Edward Carrington, aged 68. He was a man of high character, distinguished for his enterprise and liberality. His name has been honorable among the eminent merchants of Providence, and his character in private life irreproachable.

Sept. 28. — At sea, on board the bark Duc d'Orleans, S. L. V. Clevenger, an American sculptor, of high reputation.

Oct. 23.— In Northboro', Ms., Hon. Joseph Davis, for many years a member of the State senate, aged 69.

Dec. 22.—At Pittsford, Vt., Calvin Drury, aged 78, for forty years one of the deacons of the Congregational church in that place.

Nov. 22.— At his residence, in Centreville, Md., Hon. Richard Tilghman Earle, in the 77th year of his age, deeply deplored by his children, relatives, and friends. He was an eminent lawyer of the old school, and commenced practice in the year 1787, and continued therein to June, 1810, when he was appointed Chief Judge of the second judicial district, and in virtue thereof Judge of the Court of Appeals. In these high stations he acquitted himself with great ability, and to the entire satisfaction of the public. In June, 1834, his bodily strength gave way, and be-

lieving he could no longer discharge his duties with the same fidelity which he had previously done, he resigned his seat on the bench, and sought repose in retirement with his family.

His active business habits, contracted in early life, never forsook him until within a few weeks of his death, and are worthy to be imitated by the young who are in pursuit of knowledge and fame. His untiring efforts made him what he was, a sound lawyer, and an able judge. He reverenced and respected the Christian religion, of which he was a sincere believer, experiencing its consolations before, and more especially in his last illness. He retained his faculties almost to the last moment of his existence, was perfectly resigned to the will of his heavenly Father, and expired without a pang or struggle, amidst the lamentations and tears of his afflicted and fond family, who will long mourn the great loss they have sustained.

Oct. 18.— At Bridgeton, N. J., Ebenezer Elmer, aged 91. An officer of the revolutionary army, and the last survivor of the Jersey line, for several years a Representative of the State in the Congress of the United States, and President of the Society of the Cincinnati for New Jersey.

Nov. 23.— In Fauquier Co., Va., Thomas Fitzhugh, aged 81. He was a highly respected citizen, and had been for many years presiding judge of the county court.

Nov. 9.— In Andover, Ms., George Gay, Esq., aged 53. He graduated at Harvard College in 1810, and soon after his admission to the bar, removed from Dedham, his native town, to Boston, where he continued in the practice of his profession till his decease. He was a man of good sense, sound judgment, and a kind and amiable disposition.

Dec. 14.— In Washington, D. C., Charles W. Goldsborough, chief of the Bureau of Provisions and Clothing of the Navy Department, and author of a Naval History of the United States. He was one of the oldest and most respected inhabitants of the city.

Dec. 7. — In Cleveland, Ohio, Hon. Ralph Granger, aged about 50. He was a native of Suffield, Conn., and graduated at Yale College, in 1810. He was several times a member of the Ohio State Senate.

Aug. 16. — In Newark, N. J., William Halsey, aged 73, one of the oldest members of the bar in New Jersey, and at one time Judge of the Common Pleas for Essex county, and Mayor of Newark. He was an active and enterprising man, and had contributed much to the improvement of Newark, where he had resided more than half a century.

Nov. 20. — In Philadelphia, Penn., Ferdinand Rudolph Hassler, aged 74, late Director of the United States Coast Survey. Mr. Hassler was a native of Geneva, and came to this country just before the war of 1812, being introduced by Mr. Gallatin. His high attainments as a mathematician and a man of science were universally recognised, and the duties of the important office, which he held for so many years, were discharged by him with great fidelity and skill.

Sept. 10. — At Jackson, Miss., Col. Andrew Hays, aged about 60; an eminent lawyer, formerly of Tennessee, much respected for his talents and private virtues.

Nov. 10. — In New Haven, Ct., Robinson S. Hinman, Esq. aged 42. He had been Clerk of the Senate of the State, and of the Superior and County Courts, a General of Brigade in the military corps, and at the time of his death was Judge of the Probate Court for the District of New Haven.

Dec. 24.—In Boston, Ms., William Jennison, Esq., aged 86, a graduate of Harvard College in 1774, and formerly a teacher of youth in New Brunswick, Pennsylvania, and Louisiana.

Nov. 27. — At Sault St. Marie, Mrs. Susan Johnston, widow of the late John Johnston, Esq., of Antrim county, Ireland, aged 67. She was a daughter of Wabojeeg, chief of the Chippewa nation. Her grandfather was present on the plains of Abraham, in 1758, as one of the allies of Montcalm.

Oct. 22.— Near Selma, Ala., Col. Thomas Kenan, in the 73d year of his age. The deceased was a native of North Carolina, and son of a worthy revolutionary patriot. He was for a number of years, and as long as he would consent to serve in that capacity, a member of Congress from Alabama.

Oct. 3. — In St. Genevieve, Mo., Hon. Lewis F. Linn, Senator of the United States from Missouri, aged 49. He was born near Louisville, Ky., where he spent the early part of his life, and studied medicine under Dr. Galt. He removed to St. Genevieve, Mo., for the practice of his profession, in 1815, and soon became eminent. He was appointed to the U. S. Senate in 1833, and remained a member of that body till the time of his death. The subject in which he took the deepest interest, and to which he devoted himself with untiring assiduity, was the occupation and settlement of the Oregon territory. Though not distinguished as a debater, he was highly respected by his political associates, and was much beloved in private life.

Dec. 26.— In Stratford, Ct., Rev. James Harvey Linsley. He was a native of Brandford, Conn., and graduated at Yale College, in 1817. He officiated several years as a Baptist clergyman, and afterwards, in consequence of ill health, turned his attention to subjects of Natural History. Communications from him in this department of science are published in the American Journal of Science.

Nov. 3.— At Clermont, N. Y., Hon. Edward P. Livingston, aged 63. He inherited a large estate in Columbia county, N. Y., where he resided from his youth, his seat being one of the finest on the banks of the Hudson. He had been much in public life, having been a member of the State Senate for many years. In 1830, he was chosen Lieutenant-Governor of the State. He was an estimable man, of cultivated mind and accomplished manners.

Sept. 14. - At Louisville, Ky., Dr. Andrew Macrery, aged about 73. He

was born in Delaware, Dec. 27, 1775, and removed to the neighborhood of Natchez, Miss., in 1803. He was a deacon in the Presbyterian church. Few men have lived more respected and beloved, or died more regretted.

Dec. 17. — In Morristown, N. Y., Jacob Mann, aged 67. He was probably the oldest editor of a newspaper in the State, having established "The Genius of Liberty," in 1798. He continued to be an editor for more than thirty-five years.

Oct. 24.—In New York, N. Y., Col. Thomas R. Mercein, aged 61. He was at one time a member of the Legislature, and was distinguished for activity and usefulness as a citizen.

Oct. 15.— Near Savannah, Ga., Col. John Millen, member elect of the House of Representatives of the present Congress, in the 39th year of his age. He was a young lawyer of great promise, and had the confidence of the people so early as to be sent to the State Legislature in 1828, where he so established his character, that, when it was necessary to make extraordinary exertions to obtain privileges for the Central Railroad, in 1834, which it was feared would be refused by the Legislature, he was solicited to be one of the Chatham delegation; and his efforts contributed much to the success of that enterprise. On the first Monday of October, 1843, Col. Millen was elected a member of Congress.

Oct. 3. — In Belchertown, Ms., Mrs. Asa Morse, in the 100th year of her age. She was born in Walpole, in May, 1744. She was the mother of seven children, six of whom are living. She had sixty-two grandchildren, forty-one of whom are living; one hundred and forty-four great-grandchildren, one hundred and thirteen of whom are living; ten great-grandchildren, nine of whom are living.

Dec. 8.— In Plattskill, N. Y., Rev. Daniel Ostrander, an aged and respectable clergyman of the Methodist Episcopal Church, who had recently completed the 50th year of his labors in the ministry.

Oct. 19.— Near St. Martinsville, La., John Palfrey, Esq., in the 77th year of his age. The deceased was a native of Boston, Mass.; was a member of one of the first American mercantile houses established in New Orleans; has been one of the most respectable planters of Attakapas since 1811, and a member of the Legislature in 1819 and '20. Mr. Palfrey was the youngest son of Col. William Palfrey, who was paymaster-general of the American army for several years, and aid-de-camp of General Washington during the revolutionary war.

June 3.—In Montrose, Susquehanna county, Pa., Hon. Almon H. Read, a Representative in Congress from Pennsylvania, aged 53. He was a native of Vermont, and graduated at Williamstown College, Mass. In 1814, he removed to Montrose, Pa., where he became a respectable member of the Bar. In 1827, he was elected to the Legislature, and five years afterwards was made a member of the Senate. In 1840, he was appointed Treasurer of the State, and was subsequently chosen to fill a vacancy as member of Congress.

Nov. 30. — In Rappahannock county, Va., Maj. John Roberts, aged 85. He served in the revolutionary army, in which he attained the rank of Major, and negotiated the exchange for the prisoners obtained by the convention at Saratoga, in 1777. Afterwards, he was a member of the Legislature of Virginia for thirteen successive years, and had great influence in its deliberations.

Dec. 10.— In Bennington, Vt., Gen. David Robinson, aged 90. He was born in Hardwick, Ms., November 11th, (Old Style,) 1754. He was the son of Samuel Robinson, a captain in the old French war, and came to Bennington with his father in October, 1761, to a log-hut built for the reception of the family in the centre of the Centre Village, and on the same spot of ground where he continued to reside eighty-two years. He married, early in life, a daughter of Captain Stephen Fay, one of the first settlers. He also, early in life, united with the church in that town. He always contributed liberally to public improvements, and public institutions, civil and religious. Temperate in his habits and active in business, he long retained the vigor of a firm constitution, formed in early life by the hardships and privations common to pioneer settlements.

Dec. 14.—In Cabarras county, N. C., Rev. John Robinson, D. D., of the Presbyterian denomination. He was about eighty years of age, and for more than half a century, was one of the most distinguished and useful ministers of the Gospel in the State.

Oct. 28. — In Sussex county, Del., Hon. Thomas Robinson, late member of Congress from Delaware.

Oct.—At Rodney, Miss., Dr. John H. Savage, of yellow fever. He was a distinguished physician, and held the office of Professor of Chemistry at Oakland College. He was much respected in private life.

Oct. 31. — In Newbern, N. C., Hon. Charles Shepard, formerly a Representative in Congress.

Dec. 4.—In Racine county, Wisconsin Territory, Rev. David Austin Sherman, aged 63. He was a native of New Haven, Conn., and graduated at Yale College in 1802. For six years he was a tutor in Yale College, and several years President of a college in East Tennessee. At the time of his death, he was a Missionary in the Wisconsin Territory.

Sept. 24. — Near Washington, Franklin county, Mo, Hon. David Sterigere, a native of Pennsylvania. On emigrating to Missouri, he settled as an attorney in Franklin county. He was, for several years, a member of the General Assembly, and died universally respected. He was Judge of the 9th judicial circuit of the State of Missouri.

Oct. 31.— At Kingwood, Hunterdon county, N. J., Mrs. Zerviah Stewart, aged 103 years, 7 months, 19 days, widow of David Stewart. By her first husband, George Opdycke, she had eleven children. Her descendants are as follows: eighty-four grandchildren, one hundred and eighty great-grandchildren, and thirty-nine great-grandchildren; making altogether three hundred and fourteen.

Aug. 27.—At the Sulphur Springs, Va., Hon. Lewis Summers, aged 65, for twenty-four years one of the Judges of the General Court of Virginia. He was a member of the convention that revised the constitution of the State, and in that body, and on the bench, his services were of great importance, and were highly appreciated.

Dec. 26.—In Chesterfield, Ms., Maj. John Taylor, formerly of Northampton, aged 81. He graduated at Harvard College in the class of 1786,

and was for several years a member of the Legislature.

Dec. 6. — In Philadelphia, Penn., Col. John M. Taylor, aged 92. He was Commissary-General of the American army under Montgomery at the siege of Quebec, in 1775, and he remained in the service, performing his duties with honor to himself, and advantage to the country, till 1779. The latter years of his career were spent in private life, where he was much beloved and respected.

Dec. 18.— In Poughkeepsie, N. Y., Hon. Smith Thompson, one of the Justices of the Supreme Court of the United States, aged 76. He studied law with Chancellor Kent, and the first public office which he held was that of district attorney in the old middle district of New York. In 1801, he was appointed to the Supreme bench in his native State, and in 1814 he became Chief Justice. This station he held till President Monroe called him into the cabinet, in 1818, as Secretary of the Navy. This office he filled with great ability; but a judicial rather than a political post was his true position, and a vacancy occurring in 1823, he was appointed Associate Justice of the Supreme Court of the United States. He held this post till his death; and it is enough to say, that his legal acumen, his learning, and his integrity, added lustre to that dignified station, and were worthy of the fame of his colleagues, Marshall, Washington, and Story. His private life was as pure and exemplary as his public career, and his memory will long be cherished by a large circle of friends.

Sept. — In London, England, James Trecothick, Esq., late of Addington Place, near Croydon Surry, aged 90 years, a native of Boston, and a graduate of Harvard College, of the class of 1773. Mr. Trecothick was the only son of the late Jas. Ivers, Esq. of this city; but he left America before the Revolution. He took by will the ample estates of his uncle, Barlow Trecothick, a distinguished merchant and Member of Parliament for London, and, on his accession to this property, assumed the family name and arms of the testator.

Nov. 10. — In New York, N. Y., Col. John Trumbull, of New Haven, Ct., aged 87. He was born at Lebanon, Ct., June 9th, 1756. His father, Jonathan Trumbull, was Governor of Connecticut during the whole war of the Revolution. At an early age, John Trumbull entered the revolutionary army, and after serving with his regiment in the field, became a member of Gen. Washington's military family. After the Revolution, he went to Europe to perfect himself in his favorite art of painting, having it always at heart to perpetuate on canvass some of the great scenes and

great men of the Revolution. Four of his historical paintings, the Declaration of Independence, the Surrender at Saratoga, the Surrender of Cornwallis, and the Resignation of Gen. Washington at Annapolis, are preserved in the Rotunda of the Capitol at Washington, and although they are not marked by the highest qualities of genius, they do honor to his reputation as an artist. While in England, he became, by the choice of Wm. Pinckney and Christopher Gore, the fifth Commissioner under the Jay Treaty, for the settlement of American claims upon England; and holding, as he did, the determining vote on all contested cases, he was so fortunate as to acquire the entire respect and confidence of both parties by the strict impartiality and justice of his decisions. As a soldier, an artist, a diplomatist, and a gentleman, he was honored and beloved through several generations.

Sept. 22. - In Framingham, Ms., Rev. Henry Ware, Jr., D. D., aged 49, lately Parkman Professor of Pulpit Eloquence and the Pastoral Care in the Divinity School attached to Harvard University. Dr. Ware was born in Hingham, Ms., in 1793, and graduated at Harvard College, in 1812. He was engaged for a time as an instructor in Phillips Academy, Exeter, N. H., but was chiefly occupied in the work of preparation for the Christian ministry, the profession which had been his choice from his youth up. He completed his theological studies in 1816, and on the first day of the following year was ordained as pastor of the Second Church in Boston. After thirteen years' labor in this place, he was dismissed, at his own request, and went to travel in Europe for a year, with a view to the improvement of his health. On his return, he accepted the professorship in Harvard University, which he held till the summer of 1842, when the decline of his health obliged him to resign it, and retire into the country. His publications were numerous, mostly on subjects of practical religion, and they had a wide circulation, which was merited by the simple, tasteful, and eloquent spirit in which they were composed. Few persons have been more successful in winning the affection and respect of all who knew him, either as a pastor, an instructor, or a man. To a very large circle, it seemed as if the skies had grown darker after the death of Henry Ware. He belonged to that Christian sect, of which Buckminster and Channing were the distinguished ornaments, and his memory is naturally allied with theirs, as their equal in purity and beauty of character, in intellectual taste and fertility, in eloquence of speech, and in zeal and devotion in the cause of their common Lord. His parishioners and pupils, as well as his more intimate friends and relatives, were fondly attached to him; on any emergency, they sought his counsel, and his words of wisdom were uttered with a gentleness and humility, that never failed of their perfect effect. His death can hardly be regretted, for the latter part of his life was one long disease, and in his published works, and the sweet recollections of him that remain in the minds of many, there is an enduring monument to his memory.

Sept. 29.—At the Bay of St. Louis, Miss., Richard W. Webber, Esq., aged about 45, a lawyer of distinction, and formerly a member of the Legislature. He was a man of fine talents, and of strict integrity.

Aug.—In Richfield, N. Y., Rev. John Williams, a great-grandson of the celebrated Roger Williams, aged 100 years and 7 months. He was ordained as a Baptist minister when he was 25 years old, and was well known in Foster, R. I., where he resided a long time, as elder John Williams. He was familiar with the private history of his famous ancestor, and gave many interesting anecdotes of his life and times. He was respected as a man of strong understanding, of unaffected piety, and as a substantial and good citizen. He has left a numerous offspring, including many descendants to the fifth generation.

1844.

May. — In New York, N. Y., Frederick S. Agate, aged 37. He was a historical painter of considerable reputation, and his productions entitled him to a high rank among American artists of the present day.

Feb. 6. — Near Lexington, Va., Andrew Alexander, Esq., aged 75, one of the oldest and most respected citizens of Rockbridge county. He was well known in his native State, as a member of the Legislature, and an active laborer in works of public improvement.

Aug. 19.— Near Carthage, Tenn., in the 67th year of his age, Col. Robert Allen. He was bred a merchant, and first settled in Carthage soon after that town was established, nearly forty years ago, where he continued to live engaged in trade, and as clerk of the county court, for a great number of years. He served as a volunteer, and commanded a regiment under General Jackson, with great credit and honor, in the South, during the late war. He was subsequently elected and reclected to Congress from the Smith and Wilson district, until he chose to retire.

May 29.— In Newport, R. I., William Moore Allston, brother of the distinguished artist, aged 62.

April 14.—In Newton, Sussex county, N. J., Thomas O. Anderson, formerly a lieutenant in the U. S. Navy, aged 60. He was one of the company under Decatur, who captured and burned the frigate Philadelphia in the harbor of Tripoli.

June 17.—In Stockbridge, Ms., Luke Ashburner, aged 71. He was born in India, on the Malabar coast, of an affluent and respectable English family, and was sent to be educated in England. He returned to India, and settled at Bombay, where he remained till 1817, having inherited a large fortune there. The health of his family then induced him to leave, and, coming to this country, he settled at Stockbridge, where he resided till his death. His mind was richly cultivated, his manners agreeable, and his character commanded great respect.

April 21.— In Philadelphia, Pa., Hon. Henry Baldwin, one of the Judges of the Supreme Court of the United States, aged 65. He was a native of New Haven, Ct., and graduated at Yale College, in 1797. For several sessions, he was an active member of the House of Representatives; in Congress, from the western part of Pennsylvania. "A long professional career of distinguished eminence and ability secured to the deceased the respect and esteem of his professional brethren, and the confidence of a large circle of clients and friends. His political life was no less remarkable than his professional career and ability; and the untiring fidelity of his labors on the bench of the highest judicial tribunal of the land won for him the applause of the whole nation."

Jan. 5.— In Groton, Ct., Hon. Noyes Barber, aged 63, for fourteen years, from 1821 to 1835, a Representative in Congress from Connecticut, and much respected by all who knew him. He was intelligent and indefatigable as a member of Congress, and, without pretending to any merit in oratory, he was most useful to his constituents, and highly esteemed by his fellow-representatives. As a private citizen, he was greatly beloved.

May 10.—In Baltimore, Md., David Barnum, Esq., aged 74, the well known and respected proprietor of Barnum's Hotel.

June 20. — In Lincolnton, N. C., Gen. Paul Barringer, of Cabarras county, aged 65, long distinguished as a useful and patriotic citizen of North Carolina, and for many years a member in both branches of her Legislature.

Feb. 10. - At Fredericksburg, Va., Carter Beverley, Esq., aged 72.

Feb. 27. - At Andalusia, near Philadelphia, Penn., Nicholas Biddle, formerly President of the Bank of the United States, aged 58. "Mr. Biddle was a native of Philadelphia, born on the 8th of Jan., 1786. His father, Charles Biddle, was a distinguished whig of the Revolution. He commenced his education at the Pennsylvania University, and graduated at Princeton. At the age of nineteen, he officiated as Secretary to General Armstrong, in his mission to France, and accompanied him in a tour of Europe. He remained three years abroad, part of the time attached to Mr. Monroe's mission to St. James's. On his return, he devoted himself to the study of law, and to literary pursuits, to which he was fondly attached. The productions of his pen were always distinguished for beauty of style and force of argument. He edited for a time the Port Folio. In 1810, he was elected to the State Legislature, where he aided efficiently in instituting the school system of that State. In 1814, he was elected to the State Senate. In 1819, Mr. Monroe appointed him one of the directors of the Bank of the United States; and in 1823, on the resignation of Mr. Cheves, the president of that institution, Mr. Biddle was elected as his successor; and in that capacity, which he filled for nearly twenty years, he figured conspicuously in the history of this country. The time

to form a true and abiding estimate of the eventful incidents in which he was most active has not yet arrived. That he was unfortunate is all that can now be pronounced with confidence."

Jan. 12.—In Boston, Ms., William Bigelow, aged 70. He graduated at Harvard College in 1794, and was for some time instructor of the Boston Public Latin School. In the latter part of his life, he was a corrector of the press in Cambridge. His wit and talent for ready and humorous versification will long be remembered by his friends and contemporaries.

April 28.— In New Haven, Ct., Abraham Bishop, Esq., in his 82d year. He was a native of New Haven, and graduated at Yale College in 1778. Through a large part of his life he was an active politician, and for more than twenty years Collector of the port of New Haven.

Jan. 5. — In Boston, Ms., Rev. Lucius Bolles, D. D., aged 64, formerly pastor of the first Baptist Church in Salem, but for many years senior Secretary of the American Baptist Board of Foreign Missions.

April 24. — In Washington, D. C., Hon. Peter E. Bossier, a Representative in Congress from Louisiana. He was of French descent, his family being one of the first that settled in the colony. He had served for ten years in the Senate of the State, before being chosen to Congress, and in every station had secured the respect and esteem of his countrymen.

Jan. 30. — At Jackson, Miss., Hon. John D. Boyd, Senator from Attala county, aged 44.

April 30. — In Huron county, Ohio, Gen. Henry R. Brinkerhoff, aged 56, a member of Congress from Ohio. He was a native of Adams county, Pa., and emigrated at an early period to Cayuga county, N. Y. During the last war, he served in command of a company of volunteers, and distinguished himself particularly at the battle of Queenstown Heights. In 1837, he emigrated to Ohio, where he soon gained the respectand esteem of his fellow-citizens, and was elected by them to Congress, in 1843.

April 75.—In Boston, Ms., Charles Bulfinch, Esq., aged S1. He graduated at Harvard College in 1781, and subsequently travelled in Europe, where he gratified his strong taste for architectural studies. On his return, he devoted himself to architecture as a profession, and drew the plans for the erection of the State House at Boston, and of the Capitol of the United States, at Washington. He was much esteemed as an artist and a man.

July 17.—At his residence at the Cherokee Mission, in the Cherokee nation West, Jesse Bushyhead, Chief Justice of the Supreme Court of the Cherokees. The subject of this notice was a person of great distinction among his tribe. He was in his acquirements a self-made man; he obtained in his youth a very limited English education, which he improved so as to become a good English speaker, as well as an able orator in the Cherokee. He was a correct interpreter and translator, and at his demise was much engaged in translating English into Cherokee.

He occupied many public stations, which he discharged with fidelity, and for the good of his people.

Jan. — In Tarboro, N. C., Maj. James W. Clark, in the 65th year of his age. He was born in Bertie county, educated at Princeton College, married and settled in Edgecomb, where he had resided about forty years. He served several years in the Legislature of his State in both branches, both from Bertie and Edgecomb counties, and represented that district in Congress in the years 1815 and 1816.

Aug. 8.—In New York, N. Y., John G. Coster, well known as a successful and honorable merchant, aged 82. Mr. Coster was born in East Friesland, Holland, in August, 1762. In his youth, in his own country, he was intended for the medical profession, and studied physic and surgery some two years with his brother, long an eminent surgeon in the British army. Changing his views, he embarked for America about fifty years ago, and commenced his active career of business as a merchant in the city of New York. In this occupation he was eminently fortunate, and he secured the esteem of his fellow-citizens by his enlarged views, his integrity, and great private worth.

Feb. 11.—At Albany, N. Y., Hon. Esek Cowen, aged 56, a Judge of the Superior Court of New York, much respected for his abilities, his knowledge of the law, and his amiable character.

June 25 .- In Evansville, Ind., Major Jervis Cutler, aged 76. The deceased was the second son of the Rev. Manasseh Cutler, who for fiftytwo years was Pastor of the Congregationalist Church of Hamilton, Ms., the negotiator in 1787 with the Congress of the old confederation for the famous purchase of a million and a half of acres for the Ohio Company, by means of which was effected the first settlement of that great State, and from 1800 to 1804, the Representative in Congress from the Lynn district, in Massachusetts. If the father deserves the credit of paving the way for the settlement of this then savage wilderness, the son is entitled to be considered the pioneer of the settlement itself. In 1788, at the early age of nineteen, he was one of the little band of forty-eight, who emigrated from Massachusetts under Gen. Rufus Putnam, and pitched their tents at Marietta, in the very centre of the battle grounds of the Indians and Kentuckians of that day; and he has often been heard to say, that he was the first man who ever cut down a tree to make a clearing for a habitation in what is now the fourth State in the Union. Of that little band of hardy pioneers, he was probably the last survivor. The deceased was an officer of the Ohio Militia, and of the regular army, but the scene of his services happened to be at no time that of actual conflict. He lived a long, useful, and eventful life, proverbial with every one who knew him for his sterling integrity and kind-heartedness, and he died lamented by all.

June 3.— On board the U. S. frigate Savannah, in Callao bay, Com. Alexander J. Dallas, aged about 55. Commodore Dallas entered the Navy

as midshipman, on the 22d day of November, 1805, and had, of course, been in the naval service, in which he enjoyed an enviable reputation, nearly thirty-nine years. He was the son of Alex. J. Dallas, who so distinguished himself at the head of the Treasury Department at the most critical period of the history of this country, and was the brother of Mr. Dallas, whose name is now before the people as a candidate for the Vice-Presidency.

June 20.—In Cumberland, R. I., Hon. J. S. Dexter, aged 90. He was born in Cumberland, in 1754, and was engaged in the study of law, when the revolutionary war broke out. He immediately joined the army, with the rank of lieutenant, and served throughout the war. He retired in 1785, with the rank of major, having served for two years as assistant adjutant-general. Washington appointed him supervisor of the revenue for Rhode Island, and after this office was abolished, he was elected chief. Judge of the Common Pleas, which office he held for seven years. In 1830, he retired from Providence to his native place, to close a life full of years and honors in retirement and peace.

Jan. 15.— At Jacksonville, Ill., Gen. Joseph Duncan, formerly Governor of the State. He served in the army with much credit during the late war with Great Britain, and was appointed afterwards to several offices of distinction and trust, in which he acquired great reputation.

Aug. 25.—In Jefferson county, Mo., Hon. Daniel Dunklin, formerly Governor of Missouri, aged 54. He had long been distinguished in the politics of the State, and had secured the respect and esteem of a great body of its inhabitants.

April 2.—At Philadelphia, Pa., Peter S. Duponceau, Esq., President of the American Philosophical Society, aged 84. He was a native of France, and came to this country as the aid-de-camp of Baron Steuben, in 1778. He served in the American army during the war, and then established himself as a lawyer in Philadelphia, where he soon obtained distinguished success. His publications were numerous, and his profound researches in the sciences of Jurisprudence and General Philology, and especially in the aboriginal languages of America, are well known to the learned, both in Europe and America.

March 6. — In Prince George's county, Md., Hon. Gabriel Duvall, aged 93, formerly Judge of the Supreme Court of the United States. He was of Huguenot descent, and served as clerk to the first Legislature of Maryland, before the Declaration of Independence. He was chosen a member of Congress in 1794, was made Comptroller of the Treasury in 1802, and was appointed a Judge of the Supreme Court in 1811, which office he held for more than twenty years. He was distinguished for impartiality as a Judge, and for integrity and usefulness as a citizen.

June 13.— At New Haven, Timothy Dwight, Esq., aged 66. Mr. Dwight was the oldest son of the late President Dwight, whose name he bore, and whom he strikingly resembled, both in personal appearance and in

character. He was a native of Stratford, Ct., but had been a resident of New Haven for more than forty years. He first entered into business in New York, but removed to New Haven when about twenty-five years of age, and has ever since been one of the most prominent merchants in that city, having retired from business only a year ago. He was a man of rare integrity.

Feb. 16. — At St. Louis, Mo., Hon. Philip H. Engle, late Judge of the Circuit Court of St. Louis.

May 27.— In East Brookfield, Ms., Deacon Levi Farwell, of Cambridge, steward of Harvard College, aged 60.

Jan. 3. — In New York, N. Y., Col. John Fellowes, aged 84, a native of Sheffield, Ms., and a graduate of Yale College, in 1783. His political principles were those of Jefferson, his religious, those of Tom Paine, with whom he was very intimate in the latter part of that celebrated infidel's life. The tastes of Col. Fellowes were literary and antiquarian. He had published a work on the authorship of Junius, another on Freemasonry, and another on some passages in the life of Gen Putnam.

Feb. 21.—In Sussex co., N. J., Hon. Samuel Fowler, aged 65. He was a distinguished member of the medical profession, and had been a Representative in Congress for two terms, from 1833 to 1837.

March 1. — At Washington, D. C., Hon. Henry Frick, aged 48, a Representative in Congress from Pennsylvania. He was born in Northumberland, was educated as a printer, became an editor of a paper, served for three sessions in the State Legislature, and was finally chosen to Congress. He lived respected and esteemed, an honest and honorable man.

Aug. 15.—At Rosewood, near Black Rock, Ark., Hon. William S. Fulton, Senator of the United States from the State of Arkansas. Mr. Fulton has been a Senator from Arkansas from the date of its admission to the Union. He was a native of Maryland, but during the late war took up his residence in Tennessee, and was Private Secretary to Gen. Jackson. He was afterwards appointed by Gen. Jackson Secretary of the Territory of Arkansas, and subsequently Governor, which office he held until the Territory was admitted into the Union as a State.

July 23.—In New York, N. Y., Gabriel Furman, Esq., aged 88, a citizen of high character and moral worth.

Feb. 28.— By the accident on board the steamer Princeton, David Gardiner, Esq., aged about 55. He was a resident of New York, and was highly esteemed by a large circle of friends and acquaintances. He had been a member of the State Senate, and had held other important public trusts.

Feb. 12.—In Adams county, Miss., Col. Henry A. Garrett, aged about 38, a lawyer by profession, à man of good intellect and kind feelings, and much beloved within the circle of his acquaintance.

Jan. 23. - In Raleigh, N. C., William Gaston, Associate Justice of the

Supreme Court of North Carolina, one of the most eminent and respectable men in the State.

Feb. 19.— Near Stanton, Va., a slave, named Gilbert, aged 112 years. He was a servant to Col. Washington at the time of Braddock's defeat, and was afterwards present in the same capacity at the surrender of Cornwallis.

Feb. 28.— By the accident on board the U. S. steamer Princeton, Hon. Thomas W. Gilmer, of Charlottesville, Va., Secretary of the Navy for the United States. He was a Representative from Virginia in the 27th Congress, and had held many other public trusts, which he discharged with great ability. He was respected in public, and beloved in private life.

March 3.— In Lost Creek Valley, Pa., Hon. Amos Gustine, formerly a member of Congress from Pennsylvania.

April 13. — At Newton, N. J., Job S. Halsted, aged 71. He was a member of the bar of New Jersey for nearly fifty years; of eminent private worth, and distinguished as a patriot and a Christian.

May 25.— In Washington, D. C., Joseph W. Hand, Esq., aged 52, chief clerk of the Patent Office. He was a native of Madison, Ct., and graduated at Yale College in 1813. He always had the confidence of those associated with him for his capacity and integrity.

Jan. 14.— In Berlin, Ct, Mrs. Ruth Hart, aged 101. Her husband, Gen. Selah Hart, was an officer in the army of the Revolution, and for many years represented his town in the General Assembly.

April 1.— In West Bridgewater, Ms., Maj. Daniel Hartwell, aged 89. He enlisted in the army of the Revolution in the spring of 1775, and served two years, being present in most of the important battles which were fought during that period. After the war, he was for a long time major in the Massachusetts militia, and he enjoyed a pension till the time of his death.

Jan. 3.—In Cambridge, Ms., Levi Hedge, L.L. D., aged 78, formerly, and for many years, Alford Professor of Moral Philosophy in Harvard College. He was a diligent and faithful instructor, and was much respected by his pupils, and beloved in private life. Dr. Hedge was the author of a small treatise on Logic, and the editor of an approved abridgment of Dr. Brown's Lectures on the Philosophy of Mind.

Feb. 14.—In New Orleans, La., Albert Hoa, Esq., a member of the Senate of Louisiana, aged 38. He was a prominent lawyer in the city, had been in the councils of the State for some years, where he had served with much credit to himself, and to the great advantage of his constituents.

May 22. — In Bangor, Me., Park Holland, Esq., aged 91, an officer of the Revolution, and a pioneer in the settlement of Eastern Maine.

March 31. — In Saybrook, Ct., Rev. Frederick William Hotchkiss, in the 82d year of his age. He was a native of New Haven, and graduated at

Yale College, in 1778. In resisting the attack of the British on New Haven, in 1779, he acted as aid to the commanding officer. At this time, he lost his father and two uncles. For more than sixty years, he was pastor of the Congregational church in Saybrook, and was very highly esteemed by the community in which he resided.

Jan. 20. — In Newcastle, Me., Hon. Edward Kavanagh, aged 48, late Governor of the State, and for four years a Representative in Congress.

March 29.— At Norfolk, Va., Com. E. Pendleton Kennedy, of the United States Navy, aged 65. At the time of his death, he was commander of the line of battle-ship Pennsylvania.

Feb. 28.— By the accident on board the U. S. steamer Princeton, Com. Beverley Kennon, chief of the Bureau of Construction, Repairs, and Equipment in the Navy Department. He had long been attached to the naval service of the United States, in which he had attained a distinguished reputation.

Feb. 21 — At Easton, Md., John Leeds Kerr, Esq., late Senator of the United States, aged 64. He had long been distinguished at the bar of the eastern shore of Maryland, and was eminent in public life.

Aug. 29. — In Concord, Mass., Hon. John Keyes, aged 57. He was born in Westford, 1787; was graduated at Dartmouth College in 1809; studied law, and was admitted to the Middlesex bar in 1812. He opened an office in Concord, and continued there in the practice of his profession until the time of his death. He was a delegate to the convention for amending the constitution, in 1820. In 1822 – 23, he was a representative in the General Court from Concord. From 1823 to 1830, he was a member of the Senate. Subsequently, he was in the House of Representatives for many years, and for a period presided over that body as Speaker. In addition to these, he held various other offices of trust and responsibility, of a less public character. He discharged the duties of all the trusts which he assumed with ability and success.

Jan. 26.—In Utica, N. Y., Hon. Joseph Kirkland, aged 73, one of the oldest and most respectable inhabitants of the city, of which he was the first Mayor. He was born in Lisbon, formerly a part of Norwich, Ct., and graduated at Yale College, in 1790. For nearly fifty years, he had occupied a prominent position in Oneida county. He was often chosen a member of the State Legislature, and was once elected a Representative in Congress.

June 10.— In Washington, Pa., Hon. Isaac Leet, aged 42, formerly a Representative in Congress. He was for four years a member of the State Senate, and had held other public offices, acquitting himself in every case with fidelity and honor.

April 7.— In New York, N. Y., Gen. Morgan Lewis, aged 89. He was the son of Francis Lewis, one of the signers of the Declaration of Independence, and was born in New York, in 1754. He graduated at Princeton College in 1773, joined the American army in 1775, was made a colo-

nel and chief of the staff of Gen. Gates, was present at the surrender of Burgoyne, accompanied Gen. Clinton in the expedition up the Mohawk, and served throughout the war with great credit. In 1791, he was made attorney-general of New York, was appointed chief justice in 1801, was elected Governor in 1804, and became a member of the State senate in 1810. He took an active part in the late war as quartermaster-general of the army. "He was a gallant soldier, an accomplished statesman, a kind parent, a benevolent man, and a good citizen."

Feb. 11.—At Baltimore, Md., Hon. Richard B. Magruder, associate judge of the 6th judicial district of Maryland, aged 57. He was an able jurist, and a highly respected man. His professional accomplishments, strict integrity, and assiduity in the performance of his public duties, were well known to all the Baltimore bar.

Feb. 28.— By the accident on board the steamer Princeton, Virgil Maxcy, Esq., of Maryland. He was born in Massachusetts, graduated at Brown University, in Providence, R. I., of which institution his brother was the President, and studied law in Litchfield, Ct. He removed to Maryland while yet young, and completed the study of the law with Robert G. Harper, with whom he was afterwards associated in its practice. Soon acquiring distinction and the confidence of his fellow-citizens, he was repeatedly elected a member of the Legislature. President Jackson appointed him Solicitor of the Treasury, and soon afterwards he was made charge d'affaires to Belgium, in which station he continued for five years. Returning to his native State, he was for several years actively engaged in law and politics, and secured the respect and esteem of all who knew him. He was a ripe scholar, a pure statesman, and a good and honorable man.

May 17.—In New Brunswick, N. J., George P. Molleson, Esq., aged 37, Attorney-General of the State. He was graduated at Nassau Hall, and in 1827 was admitted to the bar, where he soon gained a high standing. He was several times elected to the Legislature, and was at last appointed Attorney-General, which office he sustained with great ability.

April 3.— At Columbus, Ohio, Gen. Heman A. Moore, aged 34, a Representative in Congress from that district. He was a native of Vermont, studied law at Rochester, N. Y., and began the practice of it at Columbus, Ohio, where he soon obtained distinction. "Whilst he enjoyed the unlimited confidence of his political friends, he always retained the respect and esteem of his political opponents."

Jan. 10.— In Butternuts, Otsego county, N. Y., Gen. Jacob Morris, aged 88. He was the second son of Gen. Lewis Morris, one of the signers of the Declaration of Independence, and was born at Morrisania, Dec. 28th, 1755. *He entered the American army at an early period in the war, and became aid-de-camp to Gen. Lee, with whom he was present at the battles of Fort Moultrie and Monmouth. He became a settler on the Morris

Patent in 1787, and resided there till his death. He was repeatedly elected to the Assembly from Otsego county, and as Senator from the old Western District. For many years before his death he had lived in repose, an ornament to the society in which he mingled, liberal in his deportment and the use of his ample means, and the patriarch of a numerous and respectable family.

Aug. 11.—At Reading, Pa., Hon. Henry A. Muhlenberg, aged 62, the Democratic candidate for Governor of the State of Pennsylvania. He was a distinguished and popular politician, was a member of Congress from 1829 to 1838, and for some years was minister from this country to Austria.

Feb. 3. — In Boston, Ms., Israel Munson, Esq., aged 78. He was anative of New Haven, and graduated at Yale College, in 1787. For a short time, he practised as a physician in Branford, Ct., but soon left the medical profession for mercantile life. At the time of his death, he was one of the oldest and most respectable merchants in Boston. He was a liberal benefactor of several literary and charitable institutions.

May 16. — At East Windsor, Ct., Rev. Asahel Nettleton, D. D., Professor in the theological seminary at that place, aged 60. He was a native of Killingworth, Ct., and graduated at Yale College in 1809. He was the author and compiler of several publications, the most important of which, in regard to its immense circulation, is the "Village Hymns."

Jan. 18.— In Philadelphia, Pa., the Rev. Gilbert Wesley Neveling, a native of Westphalia, in the 94th year of his age. He was Pastor of the German Reformed church at Amville, and preached throughout the Revolution to the battalions in the cause of freedom, in New Jersey.

April 28.—In Amherst, Ms., Rev. Isaac Orr, aged 51, the inventor of the air-tight stove. He graduated at Yale College, in 1818, having distinguished himself as a scholar, particularly in Mathematics and Natural Philosophy. He was afterwards a teacher for some years in the Asylum for the Deaf and Dumb in Hartford, Ct, and he labored for some time in the service of the American Colonization Society. He was a man of great ingenuity, and of great purity and integrity of character.

Jan. 5.—In Salem, Ms., Joseph Peabody, Esq., a distinguished and wealthy merchant, respected and beloved by all who knew him.

Feb. 9.— In Nelson county, Va., Micajah Pendleton, aged 86, a soldier of the Revolution, and for fifty years a zealous member of the Methodist church. It is believed, that he was the leader in the Temperance Reformation in Virginia, if not in the Union. Before the year 1800, it is known that he signed a temperance pledge, and carried it about, soliciting and obtaining signatures. His own pledge he kept faithfully till his death, extending it to wine and cider, which he considered as alcoholic drinks, differing from whisky only in strength.

June 21. - In New York, N. Y., John Pintard, Esq., aged 85, an emi-

nent and respectable merchant, and a Vice-President of the American Bible Society.

Feb. 19.—At Burlington, Vt., John Pomeroy, M. D., aged 78. When quite young, he served in the revolutionary army, and afterwards studied medicine. He established himself in Burlington, in 1792, and was the most distinguished physician and surgeon in that part of the State for more than 40 years.

Jan. 13.— In Attakapas, La., Hon. Alexander Porter, Senator of the United States, aged 58. He was born in Ireland, and his father having fallen a victim there to the political disturbances of 1798, he emigrated to this country, and settled in Nashville, Tenn. He at first engaged in commerce, but afterwards studied law, and removed to Louisiana about 1809, where he soon acquired distinction. He assisted in forming the constitution of the State, and became a Judge of the Supreme Court, and afterwards a Senator in Congress. Endowed with great natural abilities, thoroughly acquainted with the science of law, having a cultivated taste and popular manners, he was for a long time one of the most eminent and highly respected public men of the State.

March 20.—At Niagara Falls, N. Y., Gen. Peter B. Porter, aged 71. He was born in Salisbury, Ct., and graduated at Yale College in 1791. His name is connected with most of the important events in the history of western New York; and as an officer in the army during the last war with Great Britain, he rendered important services to his country. He was for some time Secretary of War of the United States.

April 11. - At sea, on a voyage to the Azores, Rev. Edward G. Prescott, rector of the Episcopal church in Salem, N. J., aged 38.

Feb. 9.—In Jefferson City, Mo., Thomas Reynolds, Governor of Missouri, aged 51. He was a native of Kentucky, and emigrated to Illinois, where his abilities soon promoted him to the office of Judge of the Supreme Court of that State. Thence he emigrated to Missouri, in 1828, and filled with distinguished honor the several offices of Legislator, Judge, and Governor. He died by his own hand, assigning as a reason the violence of his political enemies.

Jan. 20.— At Nashville, Tenn., Maj. Henry M. Rutledge, only son of Edward Rutledge, a signer of the Declaration of Independence, and afterwards Governor of South Carolina, aged 68. He was born in 1775, was made Secretary to Gen. C. C. Pinckney, Ambassador to France, in 1797; commissioned Major in the U. S. army in 1799; served several years in the Legislature of his native State, and removed in 1816 to Tennessee, where he has held many responsible stations. He was greatly esteemed as a gentleman of integrity and benevolence.

April 5.— At Philadelphia, Pa., Professor John Sanderson, of the Philadelphia High School, aged 57. He wrote the "Biography of the Signers of the Declaration of Independence," a work in several volumes, and of

considerable repute, and several volumes of a book entitled "The American in Paris."

March 1. — In Roxbury, Ms., Hon. Ebenezer Seaver, aged 81. He was a Representative in Congress forty years ago, and continued a member of that body for ten years.

March 12.—At sea, on board the U. S. frigate Columbia, which he commanded, Capt. Edward R. Shubrick, aged about 50. He entered the naval service in 1809, and served during the whole of the late war with England under Commodore Rodgers. He obtained the rank of Captain in February, 1837. He was appointed to the command of the Columbia, to act with the squadron on the coast of Brazil, in May, 1842. The climate of Brazil proved unfavorable to a complaint of the liver, under which he had long suffered, and the exposure incident to the service, united with the disease, at last caused his death. He was thus taken away, in the midst of his career, from a profession which he was well calculated to adorn, and for which he always professed an enthusiastic attachment. He was brave and faithful in the performance of his duties, and diligent, upright, and honorable in every transaction of life.

June 4. In Salem, Ms., Capt. Jesse Smith, aged 88. He was present in the battle of Bunker Hill, and was afterwards drafted into Washington's Guards, among whom he served in the battles of Brandywine, Trenton, Germantown, and Monmouth.

June 20. — In Boston, Ms., Mr. Samuel Sprague, aged 90, a soldier of the Revolution, father of the poet, Mr. Charles Sprague.

June 26.—At Annapolis, Md., Hon. John Stephen, for twenty years one of the Judges of the Court of Appeals of Maryland. He was formerly a member of the Executive Council, and was often chosen to the Legislature, till 1824, when he was appointed Judge. He was a learned and able jurist. In private life he was greatly respected, and he obtained a high reputation as a judge.

April 10. — At Watertown, N. Y., Hon. Micah Sterling, aged 63. He was born at Lyme, Ct., and graduated at Yale College, in 1804. He had been for some years a member of the Senate in the State Legislature, and was

for a time Representative to Congress.

Aug. 15.—At Saratoga Springs, N. Y., William L. Stone, Esq., for twenty-four years editor of the New York Commercial Advertiser, aged 52. He was highly respected in private life, and was temperate, judicious, and candid in his conduct of a public press. Besides his labors as an editor, he published several historical works of considerable merit. Among these was a memoir of Brant, the celebrated Indian chief, a life of Red Jacket, the well-known Indian orator, and a volume on the history of Wyoming. For some years he had been superintendent of common schools in the city of New York, and his services in the cause of education entitled him to the gratitude of the community.

March, - In Kaskaskia, Ill., John Stufflebean, a revolutionary soldier,

aged 109. He was one of the first settlers of Bourbon county, Ky. His faculties remained unimpaired to the last.

March 30. — In Norwalk, Ohio, Hen. Lewis Eurr Sturges, aged 82. He was a native of Fairfield, Ct., and graduated at Yale College in 1782. From 1805 to 1817, he was a Representative in Congress from Connecticut.

March 28. — At New Brunswick, N. J., Capt. Abraham S. Ten Eyck, of the United States Navy, aged 58.

Jan. 2. — In Somerset county, N. J., Sarah Ten Eyck, aged 101 years and 9 days.

June 14. — In New Haven, Ct., Hon. Nathaniel Terry, aged 76. He was a native of Enfield, Ct., and graduated at Yale College, in 1786. He was a Representative from Connecticut in the 15th Congress, and held various offices in his native State. His residence was in Hartford, but he died in . New Haven, while on a visit to his son.

May 24.— In Plymouth, Ms., Dr. James Thacher, a surgeon in the revolutionary army, aged 90. He was present at many of the principal battles of the Revolution, and terminated his services at Yorktown. He was the author of several approved medical works, but his publications most known were the "Military Journal," and the "History of Plymouth." He was a zealous antiquarian, and a warm friend of the Pilgrim Society of Plymouth. "The excellence of his private character secured for him the respect and esteem of a wide circle of friends, and as a citizen he was public spirited and disinterested."

Aug. 10. — In Natchez, Miss., James Tooley, Jr., aged 28, a miniature painter of much promise, and greatly beloved by his friends.

June 13. — In New Haven, Ct., Ithiel Town, aged 60. He was a native of Thompson, Ct., and was extensively known as an architect.

Feb. 28. — In Charlotte, Vt., Stephen Turrill, aged 101. He served under Gen. Abercrombie in the campaign of 1758, and during nearly the whole period of the revolutionary war.

Feb. 28.—By the accident on board the U. S. steamer Princeton, Hon. Abel Parker Upshur, Secretary of State of the United States, aged 53. He was the son of Littleton Upshur, and was born in Northampton county, Va., on the 17th of June, 1790. He received his classical education at Yale and Princeton Colleges, and studied law under the instruction of his friend, the late Hon. William Wirt, at Richmond, where he practised his profession from the year 1810 till 1824, when he removed to Vancluse, his patrimonial residence, in Northampton county, Va. In the courts of that county, and of Accomac, he continued the practice of his profession until the 15th of December, 1826, when he was appointed by the Legislature to fill the vacancy on the bench of the General Court, caused by the death of his maternal uncle, the late Judge George Parker. He had previously represented his native county in the State Legislature. On the 5th of October, 1820, he was elected a member of the General Convention

of Virginia. He published a pamphlet containing a review of Judge Story's work on the Constitution of the United States, and contributed many articles to the newspapers on the topics of the day. On the reorganization of the judicial system of Virginia, under the new Constitution, he was reappointed, April 18, 1831, to a seat on the bench of the General Court, and was assigned to the third judicial circuit. This office he continued to fill until the 13th of September, 1841, when he was appointed by President Tyler, Secretary of the Navy. On the 24th of July, 1843, he was transferred, under the same administration, to the office of Secretary of State, which station he held at the time of his death.

April 23. - At Vicksburg, Miss., Maj. B. Vick, aged 83, a native of Vir-

ginia, who removed to Mississippi in 1807.

June 8.— At Geneseo, N. Y., Hon. James Wadsworth, aged 76, a distinguished and wealthy citizen of the western part of New York. He was a native of Durham, Ct., and graduated at Yale College, in 1787. In company with his brother, he purchased a large tract of land on the Genesee River, about the close of the last century. The rise in value of this property made him very rich, and he made a generous use of his large fortune in promoting the diffusion of knowledge and encouraging science. He established and endowed the first Normal school in the State, and assisted in perfecting the system of common school libraries. He was in every respect the architect of his own fortune and fame, and the reputation and influence which he enjoyed were fairly earned, and wisely and generously used.

Jan. 22.— In Boston, Ms., William Whitaker, Esq., aged 56, a member of the Massachusetts Senate from the Franklin district, a man of high char-

acter and honorable feelings.

July 10.— At Elizabethtown, N. J., Hon. Isaac H. Williamson, aged 67. He was Governor and Chancellor of the State from 1817 to 1829. After 1829, he retired from public life, except in 1844, when he was called to preside over the convention that revised the constitution of New Jersey. He was an able jurist, an excellent public officer, and as a citizen, highly respected and beloved.

July 22 .- In Washington, D. C., Tully R. Wise, Esq., first Auditor of

the Treasury, aged 47.

May 11.— In Miami, Ohio, Dr. Stephen Wood, aged 82. He was the last survivor of the band of pioneers who were associated with John Cleves Symmes in the settlement of North Bend, in 1789, and at the period of his death had resided longer in the State, probably, than any individual living.

CHRONICLE OF EVENTS.

1843.

July 31.—The Sandwich Islands, a surrender of which to the British crown had been effected a few months before by the violent proceedings of Lord G. Paulet, were ceded back to their native Prince by Rear Admiral Thomas.

Aug. 26.— The U. S. steam frigate Missouri, Captain John T. Newton, while lying at anchor in the Bay of Gibraltar, took fire, and was entirely destroyed, the officers and crew being saved.

Sept. 15.— A revolution took place in Greece, the troops at Athens revolting, and, under the command of Col. Calergis, assisted by the people, compelling King Otho to dismiss his ministers, and accept a constitutional form of government.

Sept. 15.—A hurricane did great injury to the towns of Port Leon and St. Marks in Florida, nearly every building in them being prostrated, and, in the former, 14 lives were lost.

Sept. 19.— A dreadful accident occurred on board the steamboat Clipper, at Bayou Sara, Louisiana, from the bursting of her boiler, by which about 20 persons were killed, and many others seriously wounded.

Oct. 14.—A check was put on the progress of "Irish Agitation" by the arrest of Mr. Daniel O'Connell and his son, on a charge of "conspiracy and other misdemeanors." They were held to bail in the sum of £2,000.

Oct. 24.—A very destructive fire occurred at Canton, China, by which more than 1,400 houses were burnt, including the Danish Factory, Turner's Factory, and part of the French Factory.

Nov. 9. — A French squadron, under the command of Admiral Du Petit Thouars, took possession by force of the Society Islands, deposing the native sovereign, Queen Pomare. The transaction was afterwards disavowed by the French government, and the sovereignty restored to the native princess.

Dec. 24.— A fearful crime was committed on Staten Island, N. Y., the house of Capt. Houseman being broken open and pillaged, his wife and infant child murdered, and the house set on fire.

Dec. 31. — Amasa Sprague, Esq., a very respectable merchant of Crans-

ton, R. I., was murdered on his own farm, in the day time, by some per-

1844.

Jan. 4.— The steamboat Shepherdess, in ascending the Mississippi, a little below St. Louis, struck a snag and was lost, twenty or thirty of the passengers being drowned.

Jan. 14.— A convention was ratified between the authorities of Yucatan and Mexico, by which peace was declared, and the former country again annexed to the latter.

Jan. 25.— A disgraceful affray took place in the hall of the House of Representatives, at Washington. Mr. Weller, a member from Ohio, attacked Mr. Shriver, a correspondent of one of the newspapers, and gave him a severe beating.

Feb. 3. — Continued cold weather, throughout the northern part of the United States, closed up most of the harbors with ice, and obstructed the passage of the mails for more than a week. Long Island Sound was frozen over a few miles above New York, and at Boston, a canal, seven miles long, was cut through the ice, to allow the English steamer to go out to sea.

Feb. 12. — After a protracted trial at Dublin, Daniel O'Connell, and the other persons indicted for conspiracy with him, were found guilty.

Feb. 16.— A duel was fought near Washington, D. C., between Mr-Julian May and Mr. Joseph Cochrane, with rifles, and at the first fire, the latter was shot though the head, and survived but a few hours.

Feb. 21. — The poor-house at Nantucket took fire in the night, and ten of the inmates perished in the flames.

Feb. 28.—A terrible accident occurred on board the U.S. steamer Princeton, Capt. Stockton, during an excursion on the Potomac, a large party of distinguished persons being on board. One of the very large guns, made of wrought iron, under the superintendence of Capt. Stockton, on being fired the third time, burst, and the explosion instantly killed Mr. Upshur, Secretary of State, Mr. Gilmer, Secretary of the Navy, Com. Kennon, chief of one of one of the naval bureaus, Virgil Maxcy, Esq., recently Chargé d'Affaires to the Hague, Hon. David Gardiner, of New York, and two or three domestics, besides wounding ten or twelve of the crew. The President of the United States, the other members of the Cabinet, and many ladies were on board, all of whom fortunately escaped without injury.

March 1.— The steamers De Soto and Buckeye ran against each other on the Mississippi river, and the latter almost immediately sunk, by which accident more than 60 persons were drowned.

March 3. - A destructive fire occurred at Manchester, England, by

which a large block of warehouses was destroyed, and a loss incurred of over £100,000.

March 30.— The General Assembly of Rhode Island made a formal protest against the right of Congress to interfere with the domestic affairs of that State, by inquiring into the manner in which the present government of it was established.

March 31.— A frightful accident occurred at Felantix, in the Balearic Islands. A crowd of people were assembled in an old cemetery to hear a sermon, when an old wall adjoining the place of assembly, suddenly fell down, and killed nearly four hundred persons.

April 12.—A treaty of annexation between the United States and Texas was signed by President Tyler, and it was announced that it would soon be sent for confirmation to the Senate of the United States.

April 23.— A personal encounter took place in the House of Representatives of the United States, between two of the members, Mr. White, of Kentucky, and Mr. Rathbun, of New York; rough words passed, which were followed with blows. Another person, named Moore, not a member, attempting to interfere, and being repulsed, fired a pistol at the member who thrust him back, and the ball seriously wounded one of the officers of the House.

April 29.—The tax bill, which had passed in both branches of the Pennsylvania legislature, received the signature of the Governor, and became a law. Its effect is to raise money enough to pay the interest on the public debt, and restore the credit of the State.

May 1.—A convention of the Whig party assembled at Baltimore, and nominated Henry Clay for President, and Theodore Frelinghuysen for Vice President of the United States. It was supposed that 50,000 persons were present on the occasion.

May 4.— A serious accident occurred on the Philadelphia and Baltimore Railroad, near Havre de Grace. Two trains proceeding in opposite directions came in contact, and three or four persons were killed, and about a dozen wounded.

May 6-8. — Fearful riots took place in Philadelphia, and continued for three days, growing out of a quarrel between the Native American party and the Irish residents of the city. Thirty dwelling houses, a seminary, and three churches were burned, fire-arms were used, and fourteen persons were killed, and about forty wounded. The disturbances were at last put down by the military.

May 17. — A schooner was upset in Chesapeake Bay, and two men and five women were drowned, only the master, Wm. Flowers, and his brother, escaping with their lives.

May 18. — Great freshets took place on the Arkansas and Red rivers, by which some lives were lost, and much property destroyed.

May 18 .- A great fire took place in New Orleans, La., by which about

200 buildings were burnt, and property to the amount of a quarter of a million of dollars destroyed.

May 27-29.— A convention of the Democratic party was held at Baltimore, Md., when James K. Polk of Tennessee, was nominated for President of the United States, and George M. Dallas of Pennsylvania, for Vice President.

May 30. — Daniel O'Connell was sentenced at Dublin to 12 months imprisonment, a fine of £2,000, and to give security in the sum of £5,000 for his good behavior for seven years. The persons convicted with him were sentenced to 9 months imprisonment, and a fine of £50 each.

June 8.— The treaty for the annexation of Texas to the United States was rejected by the U. S. Senate, by a vote of 35 to 16.

June 11.— The Eastern Harbor Bill, which had been passed by both Houses of Congress, was returned with President Tyler's objections, and being sustained only by a vote of 103 to 84, not two thirds, was lost.

June 17. — Congress adjourned, after a session of six months and a half, having passed 66 public laws, 102 private acts, and 20 joint resolutions.

June 18. — Great floods about this time in the Missouri and Mississippi rivers, making them overflow their banks and do great damage.

June 25.—A destructive fire broke out in Groton street, Boston, by which about 20 buildings were burned, and property to the amount of \$100,000 destroyed.

June 27.—Joe Smith, the Mormon prophet, and his brother Hiram, who had been arrested by Gov. Ford, and were in jail at Carthage, Ill., were murdered by a mob of a hundred persons in disguise, who broke into the prison.

July 7.— A renewal of the disgraceful riots at Philadelphia, attended with great excitement and loss of life. A battle was fought between the mob and the military, musketry and artillery being used on both sides, and forty or fifty persons were killed or wounded. A military force of 5,000 men was assembled under the orders of the Governor, and the disturbances were at last quelled.

July 25.— Mehemet Ali abdicated the sovereign power of Egypt, in favor of his son, Prince Ibrahim, and left the country on a pilgrimage to Mecca. He changed his mind, however, and returned to Cairo and to the government, after an absence of only four days.

July 26. — An attempt was made to assassinate the King of Prussia by a man named Tscheck, supposed to be insane, who fired two pistol shots into the royal carriage, neither of which took effect.

July 27.—A destructive fire at Brooklyn, N. Y., by which twenty-six houses were burned, and property to the amount of \$100,000 destroyed.

Aug. 6. — Another Prince was born to the royal family of England, being the second son and the fourth child of the present Queen, and her consort Prince Albert.

Aug. 6 — Tangier, in Morocco, was bombarded by a French squadron, under the command of the Prince de Joinville, and the fortifications of the town completely destroyed.

Aug. 15. — Mogadore, a town on the seacoast of Morocco, was bombarded by the French squadron under the Prince de Joinville, the fortifications ruined, and the town itself set on fire. A few days before, a battle was fought at Oued Islay, between the Moors and the French under Gen Bugeaud, in which the former were entirely defeated, with the loss of 800 men.

Aug. 24. — Great outrages committed in Rensselaer county, New York, by a body of the tenantry, who refused to pay their rents, and maltreated the officers of justice who were sent to compel them.

Sept. 4. — The decision of the House of Lords was given on the case of O'Connell and his associates, reversing the judgment of the Court, and setting the prisoners at liberty.

Sept. 10. — Peace was concluded between France and Morocco, in which all the demands of the former power were granted.

Sept. 19.— A great mass convention of the Whig party was held at Boston, Daniel Webster presiding, when it was estimated that about 25,000 persons from other towns were present.

CORRECTIONS AND ADDITIONS.

Page 92. — William Collins, of Portsmouth, Va., is appointed First Auditor of the Treasury.

Page 94. — Royal R. Hinman is appointed Collector of New Haven, in place of James Donaghe.

Page 95. — Benjamin F. Browne is appointed Postmaster of Salem, Ms., in place of C. Foote.

Page 102. — William L. Yancey is elected a Representative to Congress to fill the vacancy in the 3d district of Alabama.

Page 106. — Thomas D. Moseley is appointed Attorney of the United States for the Middle District of Tennessee in the place of John M. Lea.

Page 107. — Robert C. Ewing is appointed Marshal of the United States for the District of Missouri in place of William C. Anderson; John R. Hayes, in place of C. W. Cutter, Clerk of the Court at Portsmouth, N. H.

Page 108.—Places and times of holding the District Court of the United States for Delaware: Newcastle—3d Tuesday in June, and 2d Tuesday in December;—Dover—the Tuesday next following the 3d Monday of March, and the Tuesday next following the 4th Monday of September.

Page 110. — John A. Bryan, of Ohio, is appointed *Chargé d'Affaires* to Peru in place of James C. Pickett; Andrew J. Donelson, *Chargé d'Affaires* to Texas, in place of Tilghman A. Howard.

Pages 110-113.—The following persons have been appointed U. S. Consuls: Robert L. McIntosh, for Lufowchou, in China; Alexander Tod, for Alexandria, in Egypt; Joel W. White, in place of James Hagarty, for Liverpool, in England; John B. Williams, for the Auckland Islands in the Pacific Ocean, in lieu of his appointment for the Bay of Islands, in New Zealand; Isidore Guillet, commercial agent for the island of St. Thomas; Robert Walsh, for the city of Paris, in place of Lorenzo Draper; Gabriel G. Fleurot, for the island of Martinique; Eneas McFaul, Jr., for Laguna de Terminos, in Mexico, in place of Leonard R. Almy; Franklin Lippincott, for Cien Fuegos, in Cuba; Isaac Stone, for San Juan de los Remedios, in Cuba; Duff Green, for Galveston, in Texas, in place of A. M. Green.

Page 115.— Clement Smith is vice-consul of Brazil for the District of Columbia, in place of Christopher Neale.

Page 116.— C. H. F. Moring is consul of Hamburg for the port of Boston; Albert Schumacher, of Baltimore, consul of Hamburg for the United States.

PUBLISHED ANNUALLY.

NO. 2.

Whately's Logic. Elements of Logic. Comprising the Substance of the Article in the Encyclopædia Metropolitana; with Additions, &c. By Richard Whately, D. D., Archbishop of Dublin. 12mo pp. 360.

'In an age marked for the fertility of its novel theories and doetrines, in 'In an age marked for the tertility of its novel theories and doetrines, in science as well as religion, the subject treated of in this volume would seem to recommend itself to every person who desires to reason foreibly or correctly. This elementary treatise holds a very high rank among the educational works of the day, having been introduced into many of the best managed and popular seminaries of learning, both in England and the United States. It is got up in the usually correct and beautiful style of most Boston books.'—Merchant's Magazine.

Questions for Examination in Whately's Elements of Logic. Prepared by a Teacher.

Whately's Rhetoric. Elements of Rhetoric. Comprising the Substance of the Article in the Encyclopædia Metropolitana; with Additions, &c. By Richard Whately, D. D., Archbishop of Dublin. 12mo. pp. 360.

'Both have been well received, and that which we are now to speak of [the Rhetorie] is adopted as a text-book in our higher seminaries.'—American Monthly Review.

Questions for Examination in Whately's Elements of Rhetoric. Prepared by a Teacher.

Whately's Lessons on Reasoning. Easy Lessons on Reasoning, in Seventeen Lessons, by Richard Whately, D. D., Archbishop of Dublin. 1 vol. 12mo. pp. 164.

In offering to the consideration of teachers and others the stereotype editions of the above works, the publishers would say, that both works have been earefully revised by a practical teacher. The questions were made by one who has long felt the need of a text-book with questions for examination, and it is believed that these will meet the desired object in all respects.

PEIRCE'S COURSE

OF

PURE MATHEMATICS.

A Course of Instruction in Pure Mathematics, for the Use of Students. By Benjamin Peirce, A. M., Perkins Professor of Mathematics and Astronomy in Harvard University.

1. An Elementary Treatise on Plane and Solid Geometry. 1 vol. 12mo., with plates. 2d edition.

'The book is throughout simple, though neat and concise; and, as far as we can see, leaves nothing to be desired in this branch of mathematics. The doctrine of parallel lines as presented by Mr. Pcirce is concise, intelligible, and in our judgment entirely satisfactory. But this is not the only improvement. Every page shows the same power of condensing, and the same neatness and elegance, for which the two works on Trigonomotry, by the same author, are so remarkable.'—North American Review.

2. An Elementary Treatise on Algebra. To which are added Exponential Equations and Logarithms. 3d edition. 12mo.

The editor of the Christian Examiner, after speaking of the Algebra, concludes by saying: 'We can say nothing better for the book than that he (Prof. P.) prepared it, and that it fully sustains the reputation for science which he has already won. Those who are interested in the subject, will find many new things in this treatise deserving their attention; particularly the polynomial theorem of Arbogast.'

3. An Elementary Treatise on Plane and Spherical Trigonometry, with their Applications to Navigation, Surveying, Heights and Distances, and Spherical Astronomy, and particularly adapted to explaining the Construction of Bowditch's Navigator, and the Nautical Almanac. 3d edition, 12mo, with plates.

'The work, of which we give the title above, (Plane and Spherical Trigonometry,) is part of a course of elementary mathematics, which he (Prof. P.) has given notice that he intends to publish. They show, throughout, the marks of an original thinker. But in this work there is a unity and homogeneousness, which shows that it is not mere compilation, but that it has passed through and been reproduced by the author's own mind. The analysis is conducted throughout in the most finished and elegant manner. Both these works are remarkable for brevity and simplicity (qualities which instructers will know how to prize); and we believe they will be found fully equal, if not superior, to any works now in use, for the purpose for which they were designed.'—North American Review.

'As a text-book for such a course of instruction as is usually taught in our Colleges, it (the Plane Trigonometry) seems to be superior to any before published on that subject; and if the projected course of elementary treatises be carried out in the same spirit and style, there is no doubt they will be highly useful to both teachers and pupils.'—Mathematical Miscellary.

This work is used in the Naval Schools, as a text-book, and in many of our Universities.

PEIRCE'S COURSE

NATURAL PHILOSOPHY.

Designed for the Use of High Schools and Colleges. Compiled by Benjamin Peirce, A. M., Perkins Professor of Mathematics and Astronomy in Harvard Uni-To be comprised in five vols. 8vo.

Volume II of this Course is now published, and has been adopted as a text-book in the University at Cambridge; and contains

An Elementary Treatise on Sound.

'Our limits do not allow us to give a minute review of this excellent work, which is distinguished no less by the exactness and method of its science than the simplicity and perspicuity of its language. Those, who can comprehend any scientific investigation of this kind, cannot fail to understand the views here given of a subject which is certainly embarrassed with many difficulties, and, in certain particulars, (to use the language applied by Prof. Peirce to one portion of the science,) "altogether intractable."

'At the beginning of the work is a very comprehensive list of writers upon Sound in general, as well as musical and other sounds, from the age of Aristotle to the present day, which has been prepared with vast labor and industry, and is, we believe, the most complete catalogue of the kind extant in any language. This labor alone is of incalculable value to those persons who are desirous of pursuing the subject, to whom we take great pleasure in recommending a work so simple and intelligible, and, at the same time, so thoroughly scientific.'- Scientific and Literary Journal.

'It is seldom that a book comes from the press which is designed to meet a more urgent want of the community than this second volume of a Course of Natural Philosophy. At a time when so many books, good and bad, are written, on every variety of subjects, and with particular adaptation to the widely different classes of readers - and especially when the overflowing supply of manuals used seems to leave nothing to be wanted in the work of instruction — it is a little singular that there is occasion for the remark that this volume fills a gap which no one before appears to have noticed, or, at any rate, to have endeavored to close. In elementary treatises prepared exclusively for the use of common schools, acoustics have been considered, in a simple manner, among the other branches of Natural Philosophy. But no work whatever has appeared designed for the higher places of instruction, and presenting a full and accurate analysis of the principles of sound. There is some occasion, then, for congratulation that we have a really new book, and one which cannot be laid aside; and since it is probably destined to be introduced into all our colleges, as it has already been into one, we are glad to know that it has been executed in such a manner as will leave little demand for another.

'Professor Peirce lays no claim to originality in this work. He tells us that he made Sir John Herschell's Treatise on Sound, written for the Ency clopædia Metropolitana, the basis of his own book. In remodelling that work, he has consulted all the works on Sound of any consequence, as well as embodied the very important discoveries recently made by Faraday; in a word, he has wrought a pleasing and symmetrical whole out of all the loose and scattered materials which relate to the subject. The labor of such a task is immense, and it is no small praise to say that it has been done accurately, and leaves nothing more to be desired.

'There is one subject connected with acoustics which is extremely difficult, and in which we think Professor Peirce has been remarkably suc-cessful; the organs of the human voice. There have been very contradictory theories in regard to the peculiar service of each part of this complex structure. In Mr. Peirce's book it is shown how they might be reconciled. -North American Review.

PEIRCE'S ELEMENTARY TREATISE

ON

CURVES, FUNCTIONS, AND FORCES.

- 1. Analytic Geometry and Differential Calculus. 12mo. Illustrated by 167 figures.
- 2. Integral Calculus and Analytical Mechanics.
 In Press.
- Application of Analytical Mechanics to Physics and Astronomy. In Press.
- Williams's Algebra. An Elementary Treatise on Algebra, in Theory and Practice, with Attempts to simplify some of the more difficult Parts of that Science. To which is added an Appendix, on the Application of Algebra to Geometry. By John D. Williams. 12mo. pp. 605.
- Stewart's Philosophy. Elements of the Philosophy of the Human Mind. By Dugald Stewart. New edition.

The present edition of this work was reprinted from the last English edition, and, unlike the previous, the notes are incorporated as foot-notes, and the Addenda has been placed in the various pages where it belongs, the whole making one volume of 627 pages, on a clear type. The merits of this work as a text-book are well and favorably known, and is now used in Harvard, Yale, and other colleges.

Mason on Government. An Elementary Treatise on the Structure and Operations of the National and State Governments of the United States. Designed for the Use of Schools and Academies, and for general readers. By Charles Mason, A. M., Counsellor at Law. 1 vol., 12mo.

'It is an extremely useful work, prepared with care and accuracy, written in a terse, neat, and scholarlike style, and containing a great amount of valuable information upon the various functions and departments of the National and State Governments, and the several relations of the citizens to them both.'—Boston Courier.

'It should be introduced at once into our common schools, and be studied by every inhabitant of the country, who wishes to know the practical working of the institutions under which he lives, and the nature and limitations of the rights, which, as a subject of a free government, he is invited to exercise.'—North American Review.

'I do not hesitate to pronounce it an exceedingly useful, valuable, and accurate treatise on the subject, and admirably adapted for our common schools and academies by its clearness, its excellent arrangement, and its detailed views of many of our institutions.'—Hon. Judge Story.

Elements of Geometry. Introduction to Geometry and the Science of Form. Translated from the most approved Prussian Text-Books. 1 vol. 12mo. plates.

This volume has been prepared under the eye of a practical teacher, and is designed to meet an actual want. It is introduced into very many of our High Schools and Academies, Normal School at Lexington, and is also required for examination for entrance into Harvard College.

NOTICES OF THE WORK.

'I have carefully examined the manuscript of "An Introduction to Geometry," and think it admirably adapted to supply an important want in education. It is not a mere geometrical logic, but a natural and simple introduction to the Science of Form. By a beautiful and original series of inductive processes, it avoids tedious demonstrations, developes the taste for observation, which is so strong in the quick mind of youth, and leads the pupil to a real and practical knowledge of the truths of Geometry with a rapidity which would not have been anticipated. From these considerations, and from observing the strange neglect into which this science has fallen in our schools, I have strongly urged the publication of this excellent treatise, and think that its study should be insisted upon, as a valuable preliminary to a good education, either at college or in business.

BENJAMIN PEIRCE, Perkins Professor of Astronomy

and Mathematics in Harvard University.

'Cambridge, April 21, 1843.'

'Most opportunely for our own wishes, and, we hope, for the uses of many of our readers, there has been placed in our hands, this morning, a school-book, of the above title, comprising about 150 pages 12mo, with diagrams. On a hasty examination, we are free to say, that hardly any school-book has ever so nearly met our ideal of what was needed. The compiler has hit the nail on the head, and fulfilled, we believe, that great public

duty, of meeting most happily an actual public want.

'We value the book, because it aims not merely to give demonstrations —to discipline the mind, as it is called, by barc logic, without practical facts, but, on the contrary, aims directly at the knowledge of facts and things, and the useful and entertaining employment of them. This is the way to discipline the mind—to feed it, with good food.'—Portland Adver-

The editor of the North American Review, says: 'The tendency of the youthful mind to observe and study forms is developed by this book. **
Geometry is taken up as a science, not only severe, but comprehensive, when the pupil is too young to appreciate its scope and importance, and he must commence his hard task with definitions. It is a high merit of this "Introduction," that it teaches these definitions in a familiar way, long before they are promised as the scaling in the state of the scale of t long before they are required as the preliminary steps to abstract study. It also supplies such a rudimentary knowledge of the principles of Geometry, and their application, as lessens, if it does not remove, the difficulties attending the first efforts in theoretical reasoning. The object of the "Introduction" which it is eminently suited to attain, is to "help children to arrange what nature teaches."

'It is decidedly the best work of the kind we have ever seen, and, more than any other with which we are acquainted, will win the interest of the beginner to this science. Geometry is greatly neglected as a branch of education, owing, in some measure, doubtless, to the unintelligibility of text-books to the young. The "Introduction" is very clear in its explanations, and its exercises combine pleasure with instruction.'— Salem Obs.

Geometrical Blocks, to illustrate the above, in neat cases; containing the sphere, cone, &c.

Goldsbury's Grammar. A Concise and Comprehensive Manual of English Grammar: containing, in addition to the first Principles and Rules briefly stated and explained, a Systematic Order of Parsing, a number of Examples for Drilling Exercises, and a few in False Syntax: particularly adapted to the Use of Common Schools and Academies. By John Goldsbury, A. M., Teacher of the High School, Cambridge, Mass. 8th edition. 12mo.

The following, among other testimonials in favor of the 'Common School Grammar,' were received by the compiler while it was in manuscript; from Professors Noyes and Felton, of Harvard University, Reverends A. B. Muzzey, J. W. Parker, E. G. Brooks, J. D. Green, and Dr. A. Hooker. It has already been introduced into the public schools in Cambridge, and in several other towns.

'Dear Sir, Cambridge, September 4, 1841.

'I have given your Grammar as careful an examination as my leisure will permit; and am of opinion, that, for clearness, brevity, happy arrangement, abundance of instructive illustrations, and exclusion of uscless or unimportant matter in a treatise for the young, your book deserves a very high rank among the manuals which are in use. If it should displace some of them, the public will be a gainer in several respects.

'Yours, respectfully,

G. R. NOYES.

Dear Sir, Cambridge, September 27, 1841.
'I have read your "Manual of English Grammar" with attention. It 'Dear Sir, 'I have read your "Manual of English Grammar" with attention. It seems to me to have the qualities of simplicity, brevity, and clearness to a remarkable degree. All that is essential to an exact knowledge of the English language, and of the practice of the most correct writers, it appears to me you have brought within a very narrow compass. As a practical grammar of the English language, it cannot fail to be useful, both to teachers and scholars. The outline of the principles of Rhetoric, at the end, is concise and intelligible. It contains directions in the art of composition, which will prove valuable, not only to young scholars, but to many practised writers.

C. C. FELTON. 'Respectfully yours,

'Cambridge, September, 1841.

'This certifies, that I have examined the Grammar prepared by Mr. John Goldsbury, and find it deserving of high commendation for its methodical arrangement and clearness of illustration, and for its union of comprehensiveness and brevity. It is free from extraneous matter, and, at the same time, so simple in its plan and details, that it can hardly fail to interest young pupils in a branch of study usually regarded as dry and irksome. I hope it may soon reach that place in our schools to which its merits fully entitle it.

'A. B. MUZZEY.'

'Dear Sir, Cambridge, October, 1841. 'I have examined your Manual of Grammar with as much care as my leisure would permit. In several important particulars it possesses peculiar merit. It is simple and concise. The definitions, with which it furnishes the learner, are clear, definite, and present the true idea to his mind as no other manual with which I am acquainted does. With the simple elements for beginners it combines many important principles and suggestions to those who esteem themselves proficients in the science. I earnestly hope you will give it to the public hope you will give it to the public.

'Very truly yours,

J. W. PARKER.

A Sequel to the Common School Grammar. A

Sequel to the Common School Grammar; containing, in addition to other Materials and Illustrations, Notes and Critical Remarks on the Philosophy of the English Language; and explaining some of its most difficult idiomatic Phrases. Designed for the Use of the First Class in Common Schools. By John Goldsbury, A. M., Teacher of the High School, Cambridge, Mass. 12mo.

NOTICES OF THE SEQUEL TO THE 'COMMON SCHOOL GRAMMAR.'

'The want of a good system of teaching English grammar has long been sensibly felt. Neither Murray's Abridgment, nor the substitution of an abridged Latin Grammar, has been found to supply the deficiency. The want of success in teaching has not arisen from the dryness of the subject, but the abstractness or imperfection of text-books. Our author's "Common School Grammar" is an excellent work, and has been, we believe, properly appreciated. The work before us is a continuation of that work, and contains judicious and clear remarks on the Philosophy of the English language, on Style, Rhetoric, Idiomatic Phrases, Vulgarisms, general and local, with rules and copious illustrations, under the various heads of Syntax, Versification, &c. Though designed for schools, there are few persons who will not find it valuable and useful both for study and reference.'

'We have not given this work a very critical examination; but, taken as a whole, we like the work well. The compiler is a practical man—he is no dealer in fancy stocks. He knows what is needed in teaching grammar; and this little work contains the results of his long experience.'

'This is an excellent work, the nature of which is fully explained by its long title. We doubt not it will be generally introduced in our public schools.'

'For simplicity of arrangement, propriety of language, and clearness of style it is unrivalled.'

'We think Mr. G. has well fulfilled his design, and his grammar is commended to the notice of teachers.'

'The Sequel to the Common School Grammar. This work is a far more valuable and important one than even its predecessor—and as the indispensable information it contains is universally expected, and the work can be taken up after any of the Grammars in general use, we trust soon to see it a common text-book in all our English schools. The author has condensed into the small compass of one hundred pages the most important principles of rhetoric, and accompanied and explained them by giving an English dress to those forms of writing which we have derived from the Greek and Latin languages, and to understand which fully, it has been heretofore necessary to study thoroughly the classic idioms. The spirit of these rules has long obtained in the construction of our language, but Mr. Goldsbury has for the first time given them an English form. The work should be encouraged.'

The editor of the Christian Review, (Prof. Sears,) in speaking of these two works, (the Grammar and Sequel,) says: 'The titles of these two books are a faithful description of their contents. They fully come up to that which they promise. Murray's grammar is taken for the basis, but the author is by no means confined to one master. He exhibits resources and talents of his own. No work on the subject has pleased us more. The first is wholly elementary. The second introduces the advanced scholar to an acquaintance with some of the most interesting facts relating to his native tongue.'

These two works are extensively used throughout New England, and meet with general approbation.

WORCESTER'S SPELLING-BOOK.

The American Primary Spelling-Book. By S.

T. Worcester, 6th edition, 12mo.

Extract from the preface: 'It is intended to be used in teaching children the rudiments of reading and spelling, by a series of lessons addressed to the understanding as well as to the eye and memory.'

RECOMMENDATIONS.

'I have examined the American Primary Spelling-Book, and think it superior to any other spelling-book in use. It has been introduced into this school, and will be used in preference to any other.
'BENJ. BOWERMAN, Prudential Committee.

'Adams, Aug. 25, 1834.'

'I hereby certify, that I have partially examined the American Primary Spelling-Book, and think it well adapted to the end designed by its author, as a first book for children. I do not hesitate, therefore, to recommend its introduction into our common schools as an excellent work for beginners.

'SAMUEL W. SHAW, Rector, St. Luke's Church.

'Lanesboro', July 18, 1834.'

- 'This is to certify, that I do heartily approve of the above recommendation of the American Primary Spelling-Book, and shall use my influence to have it introduced into our common schools. Arrangements are already have it introduced into our common school where I live.

 "W. G. JOHNSON,
 - 'Pastor of Baptist Church, and Examining and Prudential Committee.'
- 'Having examined the school-book, mentioned in the certificates above, I concur in the opinion they express in its behalf, and would cordially recommend its use.

'HENRY B. HOLKER, Pastor Cong. Church.'

- 'From the examination I have been able to give the American Primary Spelling-Book, I feel much pleased with its character. It will be introduced into the school of which I am Prudential Committee, and I hope into all the others in town. ENOCH NURSÉ, Committee.'
- 'I have examined the American Primary Spelling-Book, and think it an excellent work for the purpose for which it is intended. Arrangements are made for its introduction into the school in Ward No. 6, and I doubt not it will prove highly useful.

'AUSTIN FLINT, Prudential Committee.

'Dalton, July 30, 1834.'

- 'This may certify, that I have examined the American Primary Spelling-Book, and believe it to be a useful work, and am making arrangements for its introduction into the school in Ward No. 1.

 'G. D. WESTON, Prudential Committee.
 - 'Dalton, July 31, 1834.'
- 'I have partially examined the American Primary Spelling-Book, and concur in the recommendation of the examining committee (referring to a letter of approbation from the examining committee). Arrangements are made for its introduction and use in the school of which I am Prudential Committee.

 RUSSEL TINKER.

'Hinsdale, Aug. 6, 1834.'

⁴The arrangement of the Primary Spelling Book is excellent. Many of the spelling lessons are accompanied with definitions, and classified as nouns, abstract nouns, adjectives, verbs, and words alike in sound but different in spelling and meaning, which we regard as an important im provement.'- Salem Observer.

BUCKINGHAM'S

DEVOTIONAL EXERCISES.

Devotional Exercises for Schools and Families. By J. T. Buckingham. 2d edition, with large additions. 18mo.

'Each lesson of this book consists of three principal parts—the first is a selection of short sentences from the book of Proverbs, the second is a brief selection from the book of Psalms, and the third is selected chiefly from the Gospels, relating to the founder of the Christian religion. The Lord's prayer is then to be recited by all the pupils. We are glad to perceive that the author has thought proper to introduce in this second edition appropriate hymns to be sung by the school at the close of each exercise."-Mercantile Journal.

' Mayhew School, Boston, March 30th, 1843.

'JOSEPH T. BUCKINGHAM, Esq.

Dear Sir:—Some time since you did me the honor to send me a copy of your Devotional Exercises for Common Schools." I have examined the work, and am much pleased with it. The plan of it is admirable, and the selections are very proper. I shall use my exertions to have it used in our With sentiments of respect, &c., 'WILLIAM D. SWAN.' City schools.

' New York, August 30, 1843.

'Dear Sir:-I have examined the "Devotional Exercises for Common Schools," and I regard it as a great help to the teacher in his profession. In the course of my experience and acquaintance, I know the exercise of opening and closing school is rendered embarrassing to the Instructer and uninteresting to many pupils. With the assistance of this little manual the devotions are agreeable to all; and what before was deemed a task is now a pleasure. I have already introduced it into my own school and give it my sincerest approbation. E. H. JENNY, A. M., ' Principal of the New York Institute, East Broadway.'

' Brewer Village, October 26, 1843.

'JOSEPH T. BUCKINGHAM, Esq.

'Sir,—I have introduced your valuable little school-book, "Devotional Exercises," to the notice of the School Committee of Brewer, and it is now on the list of books used in our town state of in the name of our schools, for so excellent a compilation.

Very respectfully, yours, &c.,

'R. K. CUSHING.' on the list of books used in our town schools. I cannot thank you too much,

'It is by far the best thing of the kind that has been attempted, and the only one against which no sectarian objections can be urged. Every word of it is taken from the Bible, and yet it embodies all the variety, in the form of precept and prayer, essential to the devotional exercises of a school.

'The arrangement is happy, the selections brief, entertaining, impressive; and the whole well calculated, we think, to attain the object intended—to impress the mind of the young with that first great lesson, "The fear of the Lord is the beginning of wisdom." '—Philadelphia North American.

'We regard this work as one of great value, and we shall feel ourselves most happy if we can be instrumental in procuring its introduction into our common schools.'-New York Commercial.

Commendatory letters, for this work, have been received from many of the teachers in our own schools and others.

PICTORIAL NATURAL HISTORY.

A Pictorial Natural History; embracing a View of the Mineral, Vegetable, and Animal Kingdoms. For the Use of Schools. By Samuel G. Goodrich, Author of Peter Parley's Tales. 12mo. With Four Hundred Cuts.

EXTRACT FROM THE PREFACE.

'In attempting to bring within the reach of our seminaries so interesting a study, I have endeavored to enliven the work by presenting the most striking points in the history of each subject of description; and while I have introduced a scientific arrangement, and technical words, I have taken care that these shall be duly explained and simplified, so as to be no hindrance or discouragement in the progress of the student. It will be easily seen that a pupil may master the work in a few months; and as the table of contents shows that a vast number of objects are noticed, it may be inferred how large an amount of instruction can be acquired in that brief period.'

NOTICES OF THE WORK.

'The subjects treated of in the book are illustrated by at least one thou sand cuts, and it is in itself a complete Pictorial Museum. The style in which the work is written has all the fascination of Peter Parley's pen, and is more attractive than fiction.'-Providence Journal.

'It is enlivened by descriptions of the most striking and interesting points in the history of each object, and the scientific and technical words employed are simplified and explained. As an introduction to this branch of study, and an incentive to the perusal of more extensive and elaborate works, it will be of great service to those for whom it is intended.—Boston Advertiser.

'Many of the latest discoveries in nature's vast cabinet are brought before us in a familiar and comprehensible manner. It will be useful not only to schools, but in families also.'—Olive Branch, N. Y.

'New York, October 12, 1843.

'The "Introduction to Geometry," I regard as a very meritorious work. This abstruse science is much simplified, and stripped of that repulsive obscurity that is commonly mingled with mathematical demonstrations, and made altogether more inviting and tangible to the young student. mean to test its merits in my school.

'JAMES LAWSON, 'Classical and English School, 101 Grand St.'

'New York, Sept. 20th, 1843."
'Dear Sir:—I have examined the Pictorial History of "Peter Parley"
and find it well adapted to the capacities of the young. We have long needed a work of the kind in our common and even in our select schools. It ought to be introduced into every school in the land as a class book, and is well worthy a place in the private library of every family in the nation.

'I can but hope, that a work so eminently calculated to disseminate correct knowledge on such an interesting subject will be widely circulated and properly appreciated. I shall introduce it into my school immediately.

'Yours truly,
'JOSHUA BUTTS, Principal
'Yours King St

of the Young Ladies and Gentlemen's Seminary, No. 112, King St.' Notices commendatory of the work have been received from E. H. Jenny, A. M., Principal of the N. Y. Institute, from Messrs. Barry and Lockwood of the Collegiate Institute, from the Principal of the Classical and English School, and many other Teachers in New York.

The work is used in many of our own schools, and in Salem.

TO PROFESSORS, TEACHERS, AND OTHERS

INTERESTED IN

CLASSICAL EDUCATION.

The Publishers of the Classical Works announced in the annexed Catalogue, would ask the attention of Professors, and those interested in Teaching, to the following extract from the London Examiner, edited by Mr. Taylor. In writing of the Boston editions of the Classics, by Felton, Wheeler,

Woolsey, and others, he says:

'It must be distinctly understood that the object of these several editions is to furnish students with readable editions of the Greek Classics, editions that shall form a happy medium between the text without comment, which is so often unwisely put in the hands of the learner, and those ponderous annotations, which can only serve to perplex him. Hence, the notes are explanatory and illustrative rather than critical, and their conciseness cannot be too much praised. Their texts are those of the highest European scholars; they are all fully yet briefly illustrated by English notes; and all are preceded by such introductions as render them complete in themselves, and furnish the student with that amount of historical and other information which enables him to pursue his journey in a region not altogether strange. ALL ARE EXCEEDINGLY WELL PRINTED IN A GOOD CLEAR TYPE, and are volumes as well fitted for the library of a private gentleman as for the school-room or the university.'

As the most of these works are stereotyped and consequently do not get 'out of print,' and are not 'out of the market,' they can always be had, if applied for directly to the publishers,

JAMES MUNROE & CO.,

Boston.

*** Instructors and others will be furnished with copies of our publications for examination with a view to their introduction.

Introduction to the Study of the Greek Classic Poets. Designed principally for the Use of Young Persons at School and College. By Henry Nelson Coleridge, Esq., A. M., late Fellow of King's College, Cambridge. Containing, 1. General Introduction. 2.

Homer. 12mo.

'The subject of the Homeric poetry, to which the greater part of the volume is devoted, is admirably discussed. There is ample learning without pedantry or ostentation; and good sense, good taste, and scholarlike elegance of style. The various theories on the origin of the Homeric poems are stated with clearness and distinctness. The manifold beauties of the Iliad and Odyssey, are developed with critical sagacity, and with a warmth of sensibility which never becomes overstrained or extravagant.'—North American Review.

If It is intended to continue these Introductions through the whole body of Greek Classic Poetry.

WOOLSEY'S GREEK TRAGEDIES.

The Alcestis of Euripides, with Notes, for the Use of Colleges in the United States. By T. D. Woolsey, Professor of Greek in Yale College. 12mo. 3d edition.

The Antigone of Sophocles, with Notes, &c. 12mo.

'The form in which Mr. Woolsey has given these works to the public is neat and convenient; and they are printed with Mr. Folsom's well-known accuracy. The text of the Alcestis, selected by Mr. Woolsey, is that of William Dindorf, contained in the Poetæ Scenici Græci, published at Leipzig and London in 1830. This text has received the approbation of Hermann, from whose judgment in such matters there lies no appeal. A well-written preface contains a clear statement of the subject-matter of the play, with a critique on the several characters brought out in the development of the plot. A brief, but comprehensive view of the poetical genius of Euripides, in which his beauties are pointed out and his faults touched upon with a discriminating hand, gives additional interest to the volume. The body of notes at the end are remarkable for a union of deep learning, acute judgment, and fine taste.

judgment, and fine taste.

'The preface and commentary to the Antigone are even more creditable to Mr. Woolsey's shility that those to the Alcestis. The sketch of the poem, in the preface, is written with clearness and brevity. The difficulties in this play, that call for a commentator's explanation, are far more numerous than in the Alcestis. In Mr. Woolsey's commentaries on these numberless knotty passages, he puts them together in a more intelligible form, and shows a sharper perception of delicate shades of meaning, than we have ever met with in the explanations of any other edition whatever.

'We conclude this notice by again expressing our satisfaction at the appearance of these works. They are not only honorable to the taste and talent of Mr. Woolsey, but will bring reputation to the classical scholarship of our country. Among all the books of this kind, prepared either at home or in England, for students and private readers, we are not acquainted with any which are equal to these in variety of merit. Trollope's Pentalogia does not bear the slightest comparison with them, in the copiousness, elegance, or value of the commentary. We are glad to learn that Professor Woolsey is at work on two more tragedies, the Prometheus Bound and the Electra. When these shall have been published, the lovers of classical literature will be provided with a series of the master-pieces of the Attic drama, illustrated by the blended lights of grammatical, philological, and historical learning, under the guidance of a discriminating judgment, and a ready sympathy with all that is beautiful in poctical inspiration and sublime in moral sentiment.'—North American Review.

The Prometheus of Aeschylus, with Notes, &c. 12mo.

The Electra of Sophocles, with Notes, &c. 12mo.

'Professor Woolsey has now completed his proposed course of Greek Tragedies. We hope the reception of these admirable works among the teachers and scholars of our country will induce Mr. Woolsey to follow up the career he has so brilliantly entered upon. It is an uncommon thing in any country, for a mind of nice poetical sensibilities to be engaged in critical labors, or to have the necessary patience in the acquisition of exact knowledge, to qualify it for such a task; but so fortunate a conjunction between profound and accurate learning and delicate taste, when it does take place, brings out something which men will not willingly let die.'—North American Review.

'This Course has been introduced into Harvard, Yale, Dartmouth, Bowdoin, and many other Colleges.

14

JUST PUBLISHED.

Wheeler's Herodotus. Herodotus, from the text of Schweighaeuser; with English Notes. Edited by C. S. Wheeler, A. M., Tutor in Greek in Harvard University. Stereotype edition. In 2 vols., thick 12mo., with a Map.

EXTRACTS FROM THE PREFACE.

'Schweighaenser's text was, after some deliberation, selected for reprinting, as on the whole the best. But such commendations of Gaisford, Bekker, Bohr, and others, as approved themselves to the judgment of the editor, have been introduced; and many of Long's valuable suggestions as to the punctuation adopted. The greatest care has been taken to prevent any typographical errors. The accompanying Life of Herodotus is taken from K. O. Muller's History of Greek Literature; the Map from Bochr's edition.

'In the preparation of the Notes such constructions have been selected for comment, as the editor, from some years experience in the recitation-room, has found to present the greatest difficulty to the student. His plan has been to prepare a USEFUL body of Notes.'

NOTICES OF THE WORK.

'The Clarenden Press could hardly send forth a better specimen of Greek than the Herodotus of Mr. Wheeler. -London Examiner.

'The publishers of these volumes of the father of history deserve great credit for the beauty of execution which appears in them; and the labors of the editor will call forth that tribute of praise which is his due, for the care manifested in presenting to scholars so beautiful and correct an edition of the great work of Herodotus.

'The Notes we think highly valuable, and generally just such as are

needed in a text-book for Colleges.'-American Eclectic.

A Professor at one of our Universities, writes: 'I have made a special examination of different parts of the work, and I hasten to communicate to you my judgment of its merits. It is eight years or more since I introduced Herodotus, in the German edition of Tauchnitz, into my classes, and I have had some experience of the difficulties students have to contend with in an edition without Notes. The American editor has supplied this want with great credit to himself. Sufficient aid, it seems to me, is rendered to the pupil, while the notes invite him to thorough habits of study. So far as I have examined the work I have been struck with the accuracy of the as I have examined the work, I have been struck with the accuracy of the press, which merits the highest praise. Both the editor on his part and the publishers on theirs, deserve well of their country in issuing so fine an edition of one of the most charming authors of antiquity.'

Plato's Gorgias. The Gorgias of Plato, chiefly according to Stallbaum's Text. With Notes by Theodore D. Woolsey, Prof. of Greek in Yale College. 1 vol. 12mo.

A Professor at Bowdoin College, writes: 'The Gorgias I have read with great satisfaction, and am much gratified with this first effort to present one of Plato's Dialogues to American Students in an attractive form. The beauty of the type and the thorough work of the editor leave nothing to desire. The reputation of Prof. Woolsey is too well established, to render it necessary for me to say more. I will only add, that good taste and judgment, sound scholarship and accurate discrimination, characterize this in connection with his previous labors. In the Introduction and the Notes, students will find all that is necessary to enable them to enter into the intricacies of this fine specimen of the Socratic method.

This work has been adopted as a text-book in some of our Universities, and is extensively used in Private Classes.

The Iliad of Homer, from the Text of Wolf. With English Notes. Edited by C. C. Felton, A. M., College Professor of Greek in Harvard University. 12mo.

'The Notes are brief and appropriate, always in good taste, and wholly free from pedantry.

The execution of the work is, in all respects, entitled to the lightest praise. Its typography is rich and beautiful; and, so far as we have examined, we have found it executed with great accuracy. We have no hesitation in saying that this edition of the Iliad is as ereditable to the American Press as to the taste and learning of its editor.'-North

'We have examined this volume with great satisfaction. The beauty of the print, and the extreme accuracy which prevails throughout, are highly creditable both to the editor and to the accomplished scholar who is at the head of the University Press. The book would adorn any library.'—American Quarterly Review.

'We very much question whether, with all our preëminence above the Americans in the elegances of life, we could produce a school-book that should, by its beauty, vie in any degree with the Homer of Professor Felton.'-London Examiner, 1843.

The same Work, 8vo., with Flaxman's Plates, in Press.

The Greek Reader. By Frederic Jacobs. With an enlarged and complete Lexicon. From the twelfth German edition. 12mo. Edited by Pickering.

EXTRACTS FROM THE PREFACE.

'It is proper to state, in the first place, that this edition contains the whole of the former text, with considerable additional matter, consisting of prose and poetry. To the poetical part, have been added some of the most beautiful and entirely unexceptionable odes of Anacreon, and extracts from Bion and Mosehus.

'The text and Lexicon have been carefully compared, to ascertain what omissions, either of words or appropriate meanings, existed in the latter, to supply such deficiencies, and to insert the words which occur in the additional extracts above mentioned. The number of these additions to the

Lexicon amounts to more than a thousand.'

'The Greek Reader, having been compiled by one of the leading scholars of the age, is prepared throughout in a pure and masterly manner; proceeds methodically from the simplest combination of words to the common attic style; and is so composed, that while the rules of grammar are illustrated in easy succession, an outline is given of mythology, ancient geography, and Grecian history. It is used in almost all the good schools in Germany, and has there gained a decided expression of public opinion in its favor, as the best of the many similar works, which have been produced by the scholars of that prolific country.

'In regard to the American edition, the chief question concerns its ac-

curacy; and this quality it possesses in an eminent degree. As the Notes and Lexicon are in English, it affords the means of learning Greek without the embarrassing intervention of another foreign tongue.'—N. A. Review.

'I have examined the copy of the last edition of the "Greek Reader," which you sent me, and have carefully compared it with the New York edition. I find yours decidedly superior. It is on better paper, and better printed; the typographical execution being, in all respects, nearly faultless. But the greatest improvement is in the Lexicon. This is now scarcely susceptible of further improvement. In fact, it is one of the neatest Greek school-books that has been issued from the American press.

'Respectfully yours,
OLIVER CARLTON, Master Public Latin School.'

JUST PUBLISHED.

Greek and Roman Metres. The Metres of the Greeks and Romans. A Manual for Schools and Private Study. Translated from the German of Edward Munk. By Charles Beck and C. C. Felton, Professors in Harvard University. 1 vol. 12mo. pp. 349.

FROM THE PREFACE.

'The Treatise of Dr. Munk has been most favorably received wherever it is known. The work here presented in English, it is believed, will be found to contain a very accurate and thorough account of the metrical systems of the Greeks and Romans, and as complete an elucidation of all the details of those systems, as can now be given. The introduction condenses into a few pages the facts in the historical development of the ancient metres which are elsewhere scattered over many volumes. The theory of metre is not dwelt upon at too great length, but is handled with a due regard to the amount of knowledge actually existing. The subject, it is believed, is laid out and discussed with scientific precision, the divisions are clear and obvious, and the proportions just. Every point is sufficiently illustrated by examples, taken mostly from the purest Greek and Latin writers. For the convenience of reference an Index has been added by the Trunslators.

Demosthenes de Corona. The Oration of Demosthenes on the Crown, with Notes, by J. T. Champlin, Professor of Greek in Waterville College, Maine. 1 vol. 12mo. pp. 206.

FROM THE PREFACE.

'The points upon which most attention has been bestowed, and in which the merits of the edition (if it has any) will be found principally to eonsist, are the following:

'1. An attempt has been made to furnish, in the Notes, all necessary

historical and archeological information.

'2. A good deal of attention has been bestowed upon the explanation of words, sentences, and grammatical constructions.

'3. Another point upon which no inconsiderable attention has been be-

stowed, is the development of the course of thought pursued by the Orator.'
The Text adopted in this edition is that of Bekker, as revised and corrected in some few instances by Dindorf.

OPINIONS OF THE PRESS.

'This new edition of the Oration on the Crown, with a rich body of Notes, must be a welcome present to the classical teacher. That such a work was needed, will be denied by no one who has attempted to use the shallow and inaccurate edition of Negris.'—Christian Review.

'We approve the plan of this edition, and think the execution of it faithful and able. The work is a valuable addition to the series of classical books published in the United States.'—North American Review.

'The object of its preparation is excellent, and carried out with distinguished skill. We are much mistaken, if any thing with the same design will appear for a long time that can in justice supplant it. The Notes are just what Notes should be. They are not a pony, but a guide. But the crowning excellence of Prof. C.'s performance we regard to be the happy manner in which he has developed the course of thought pursued by the Orator.'—Southern Literary Messenger.

The above work has been adopted as a text-book at Wesleyan University, Middletown, Harvard, Waterville, and many other Colleges.

JAMES MUNROE AND COMPANY'S PUBLICATIONS.

GREEK TEXT-BOOKS,

вч

ALPHEUS CROSBY,

PROFESSOR OF THE GREEK LANGUAGE AND LITERATURE IN

A Grammar of the Greek Language. A Practical Grammar of the Attic and Common Dialects, with the Elements of General Grammar. 1 vol. 12mo. pp. 510.

In this work an attempt has been made to meet the wants both of the beginner and of the more advanced student. The volume is complete with the addition of the Syntax, which is just published.

Tables Illustrative of Greek Inflection. 12mo. pp. 69.

In this volume, the Tables contained in the Grammar are reprinted for the convenience and economy of beginners in learning the Greek paradigms. It is believed, that those who may not adopt the Grammar will still find important advantages in the use of the Tables.

The same Work in large quarto, for the convenience of more advanced Students, in consulting and comparing the Greek paradigms.

One page of the quarto contains six pages of the duodecimo edition. So that, in the former, a single opening presents to the eye all the tables of declension; another, the whole regular conjugation of the verb, including its terminations, paradigm, and translation; a third, all the tables of the verbs in μt , &c.

A Syntax of the Greek Language, with the Elements of General Syntax. 12mo. pp. 260.

This treatise forms the fourth and concluding Book of the Grammar before mentioned. It is sold separately to those who may have the preceding part of the volume.

The Anabasis of Xenophon, 12mo. pp. 282.

EXTRACT FROM THE PREFACE.

'In this edition of the Anabasis, it is simply my aim to furnish a text founded upon the latest and best recensions. I have chiefly followed the text of Ludwig Dindorf, but not without a comparison of the various readings of the different manuscripts and editions, and an entire revision of the punctuation and general style of printing.'

IN PREPARATION, BY THE SAME AUTHOR.

A Grammar of Dialectic Greek.

Homer's Odyssey, with Notes.

A Companion to Xenophon's Anabasis, designed to contain a Map, a Life of the Author, a Vocabulary, Notes, and Exercises in translating from English into Greek.

BOWEN'S VIRGIL.

Virgil; with English Notes, prepared for the Use of Classical Schools and Colleges. By Francis Bowen, A. M. 1 vol. 8vo. 600 pp.

EXTRACTS FROM THE PREFACE.

'The Notes are designedly made very copious. They are intended to afford so much aid, that a pupil of ordinary capacity and diligence, who has studied the usual elementary books in Latin, will be enabled to read and understand Virgil, even without the aid of an instructor. The copious materials afforded by the commentaries of the old grammarians, and by the rich annotations of Martyn, Ruæus, Heyne, and some later German editors, have been carefully revised, and whatever matter they contain, suited for the comprehension of young persons, I have endeavored to present in English, in the most condensed form.

'The Notes are also designed to point out, in part, the beauties and defeets of Virgil's compositions, and to form the taste and judgment of the pupil, by encouraging him to apply the general principles of criticism with as little hesitation, as if he were reading a modern English poet. Quotations from modern poets have been sparingly introduced, where a passage seemed to invite comparison, in the hope of stimulating the student's curiosity, and

of heightening his relish for poetry.

'The merited reputation of the Latin Grammar by Messrs. Andrews and Stoddard is a sufficient reason for adopting it, as the manual of reference in all the notes relating to etymology and syntax.'

NOTICES OF THE WORK.

'This edition of Virgil is one of the most accurately printed classics that have appeared in the United States. In his performance of the editorial duties, Mr. Bowen has done all that can be expected to instruct and entertain the young pupil, who is too often driven through the works of the great Roman poet, not only without obtaining any just views of his poeti-cal character, or feeling any interest in the masterpieces of the Latin muse, but with a repugnance and disgust for tasks that are beyond his years, and unintelligible for want of the historical and antiquarian learning necessary to their comprehension.

'The text of this edition is a very good one; the type is clear and handsome; the page well proportioned; and the book is, therefore, typographi-

cally, a very attractive one.

'The commentaries in this edition have the substance of ripe and varied scholarship, free from all pedantic display. And the little summaries at the close of each book will serve to clear up and arrange the student's ideas, which are generally vague and uncertain from the piecemeal method in which he has studied the poet.'-North American Review.

'We have read a large portion of Mr. Bowen's Notes, and like them much. They are excellently adapted to make the student not merely understand the meaning of Virgil's words, but to make him feel all those exquisite touches, for which the poetry of the illustrious Roman is so distinguished. - Christian Examiner.

'This is a work of very great merit, and without disparaging the other good editions of Virgil which are before the public, we have no hesitation in good editions of virgit which are before the public, we have in destauton in giving the palm to this. The editor is a ripe and sound scholar, of correct judgment and fastidious taste; independent in his views, and forming his own conclusions, without undue bias from great names. To his edition he has devoted a great deal of time, and he has performed his task in a conscientious spirit, which has left nothing unexplained which required elucidation. The great merit of this edition is its fulness. —Boston Courier.

'It is a very valuable addition to the resources of the classical scholar. Mr. Bowen's experience in teaching has been such, that he knows where assistance is wanted by the young reader, and how it ought to be given; his intimate acquaintance with the language gives an assurance that the accuracy of the work may be relied upon.'—Boston Daily Advertiser. Beck's Latin Syntax. Syntax of the Latin Language, chiefly from the German of C. G. Zumpt. By Charles Beck, Professor of Latin in Harvard University. 2d edition. 1 vol. 12mo. pp. 200.

'A new edition of the Latin Syntax being required, the opportunity has been improved for subjecting the whole work to a careful revision, and for making such additions, alterations, and corrections, as were thought to enhance the usefulness of the book.'

This work has been adopted as a text-book into Harvard, University of

Virginia, and Union College.

Beck's Brutus. Cicero de Claribus Oratoribus Liber qui dicitur Brutus. Edited by Charles Beck. 18mo.

Adams's Latin Grammar, Abridged. Designed for the Use of Beginners. A new edition, corrected and improved. 18mo. pp. 170.

FROM THE PREFACE.

'What is wanted to put into the hands of our younger pupils is a grammar short and intelligible, without notes or explanations, in a clear, distinct type, and containing little except what is to be committed to memory and learned with the greatest accuracy. It will also be useful to those young ladies who take a few steps in Latin as a preparation for one of the modern languages. In all cases, a thorough knowledge of it will form a good preparation for the use of a larger and more philosophical grammar.'

'This abridgment contains all those parts of Adams's Grammar which are usually marked by the instructor to be committed to memory by the beginner. By this practice the latter is taught that some parts of the Grammar are unimportant; and looks forward with dread to the fatal "second time going-over," when examples and exceptions are to come upon him in all their terrors. This cvil is avoided by using, in beginning, a suitable abridgment. That before us is well selected, and clearly and correctly printed.'-American Monthly Repository.

Latin Phrase Book, consisting of Colloquial Phrases and Dialogues; intended to facilitate the Study of the Latin Language. To which is added a List of Geographical and Proper Names, systematically arranged. By a Teacher. 18mo. pp. 126.

FROM THE PREFACE.

'The exercises throughout have been arranged, as nearly as possible, in such a manner as to keep pace with the continued progress of the student - commencing with a nomenclature of various objects with which we are most familiar, and which on this account serve to interest young persons, and induce them the more readily to commit to memory the corresponding Latin names of those objects. These names are then combined in easy sentences, (many of which are selected from authors usually read in schools,) in order to render those sentences familiar to the ear, and, at the same time, to impress the leading word in them more strongly on the mind.'

Grotius de Veritate Religionis Christianæ. Cum Notulis Joannis Clerici. Accesserunt ejusdem de eligenda inter Christianos dissentientes Sententia, et contra Indifferentiam Religionum Libri duo. 12mo.

COURSE OF STUDY

IN THE

GERMAN LANGUAGE.

Noehden's German Grammar. 12mo.

German Reader for Beginners. Compiled by Bernard Rölker, Instructor in Harvard University. 12mo. pp. 324.

FROM THE PREFACE.

'The object in compiling this new German Reader was, to give to those who begin the study of the German language such selections from German literature as might prove easy enough for their first attempts at translating, and at the same time of sufficient interest in themselves.'

The selection in this volume is made principally from the works of Gothe, Uhland, Schiller, Schlegel, Hoffman, and others.

'ROLKER'S GREMAN READER.—We were pleased yesterday to see this work announced, and have been highly gratified by an examination of the work itself. Every teacher, and many students of the German language, must feel a relief, in finding a new volume of selections adapted to their use, since in the course of a few years the constant reperusal of former ones, however well made, becomes so wearisome as to lessen the effect of their endeavors. Mr. R. has avoided a common error in works of this kind, by making his selections in part from authors not in the hands of most students, and not confining himself in the main to Gothe and Schiller, whose "complete works" are to be found in almost every library. He has in most cases given the whole of the piece offered, and not prepared such a mass of shreds and fragments as many elementary reading books contain. These pieces are arranged according to their respective difficulties to the beginner; and explanatory notes are added with a skill that equals the taste in the selection of the contents. The experience which Mr. R. has had as an instructor in German at Harvard University, has made him highly competent to the task; and his talents, acquirements, and fidelity, are a sure guaranty to the friends that he has made in this his adopted city, that whatever he undertakes will be well done.'—Boston Daily Advertiser.

New German Dictionary. A new English German and German English Dictionary; containing all the Words in general use, designating the various Parts of Speech in both Languages, with the Genders and Plurals of the German Nouns. Compiled from the Dictionaries of Lloyd, Noehden, Flugel, and Spoischil. In 2 vols. 8vo.

Luther's German Version of the Gospel of St. John, with an Interlinear English Translation, for the Use of Students. By Charles Follen, Professor of the German Language and Literature in Harvard University. 12mo. pp. 172.

'This Interlinear Translation of the Gospel of St. John is intended to assist those who wish to study the German language, in the beginning of their course.'—Preface.

COURSE OF STUDY

IN THE

SPANISH AND FRENCH LANGUAGES.

Cartilla ó Silabario y Método Práctio de enseñar á leer. (Spanish Alphabet and Spelling-book.) 15th ed.

Rudiments of the Spanish Language, with Dialogues. 1 small vol. 18mo.

Josse's Spanish Grammar, amended, improved, and enlarged. 11th edition. 1 vol. large 12mo.

Colmena Española, or Spanish Extracts, with copious English Notes at the bottom of every page. 5th ed. 18mo.

Bernardo del Carpio, an historical, chivalrous, and original modern Spanish Novel, an easy and interesting book for Beginners. 1 vol. 18mo.

Cartas Marruecas, or Description of Spanish Manners, Customs, Institutions, &c., with necessary English Notes, followed by a Selection of Poems, by Don José Cadalso. 1 vol. 12mo.

Iriarte's Fables. Literary Fables of Don Tomas de Iriarte, with English Notes. 3d edition. 18mo.

El Sí de las Niñas, a Dramatic Chef-d'œuvre of Don Leandro F. de Moratin, with English Notes, for the first time in this 3d edition; both these works of Iriarte and Moratin, in 1 vol. large 18mo.

Don Quijote. El Ingenioso Hidalgo Don Quijote de la Mancha, compuesto por Miguel de Cervantes Saavedra. Nueva edicion clásica, ilustrada con notas históricas, gramaticales y críticas, por la Academia Española, y sus Individuos de número Pellicer, Arrieta y Clemencin. Retrato de Cervantes, diez ilustraciones de las principales aventuras de Don Quijote, y un Mapa geográfico que representa los parages por donde anduvo; planchas de cobre. 3a. edicion americana mejorada, en 2 tomos, grande 12mo.

Lope de Vega. Seleccion de Obras Maestras Dramáticas con notas al fin del volúmen, conteniendo La Estrella de Sevilla, por Fr. Lope Felix de la Vega Carpio; El Príncipe Constante, y el Mágico Prodigioso; por Don Pedro Calderon de la Barca; 3a. edicion mejorada. 1 vol. 12mo.

99

- Fables de La Fontaine, with copious Notes at the bottom of every page, and a Portrait of the Author on steel. 1 vol. large 18mo. 2d edition.
- Poppleton's Dialogues. Nouveaux Eléments de la conversation, en Anglais et en Français, par le Professeur G. Poppleton; followed by a Manuel d'idiotimes in English and in French, by Madame de Genlis. Both works in 1 vol. 12mo. 4th edition.
- Parisian Phraseology, or Choix de phrases diverses, English and French. By Louis F. de Porquet. 12mo.
- The turning English Idioms into French at Sight, with a Lexicon at the end of the Work. 1 vol. 12mo. designed as a SEQUEL to the Exercises of any French Grammar.
- Key to the said English Idioms, or a faithful translation of them in French. 1 vol. 12mo.

All the preceding works in Spanish and French, revised and corrected by F. Sales, A. M., are handsomely got up, and neatly bound.

COURSE OF STUDY

ITALIAN LANGUAGE.

An Easy Grammar of the Italian Language, for the Use of Colleges and Schools. By F. M. J. Surault. 12mo. pp. 284.

It is believed that the student will find here all that he wants, and nothing more; and that he will not be obliged to exercise any discretion as to what should be selected and what rejected; a discretion which, of course, no learner is qualified to exercise. The rules in the Syntax are few and short, but are made clear by copious examples; and the treatise on Italian versification, though brief and elementary, it is believed will be found complete.

- Bachi's Italian Fables. Raccolta di Favole Morali; or, A Collection of Italian Fables in Prose and Verse, selected from the Works of the best Italian Fabulists, with Interlinear Translations and Explanation of Idioms. 12mo. pp. 168.
- Bachi's Italian Phrases. Conversazione Italiana; or, a Collection of Phrases and Familiar Dialogues in Italian and English. 12mo. pp. 240.
- Bachi's Rudiments of the Italian Language; or, Easy Lessons in Spelling and Reading, with an Abridgment of the Grammar. pp. 144.
- Barbauld's Hymns for Children, being a Sequel to the "Easy Lessons" in the above Rudiments. pp. 116.

23

COURSE OF STUDY

IN THE

FRENCH LANGUAGE.

- Longfellow's French Grammar. Elements of French Grammar: by Lhomond. Translated from the French, with Notes and Exercises. By H. W. Longfellow, Professor of Modern Languages in Harvard College. 12mo. 8th edition.
- Surault's French Exercises. New French Exercises, adapted to all French Grammars, but more particularly to that of the Author. 2d ed. 12mo. pp. 120.
- Surault's French Fables, with a Key, and a Treatise on Pronunciation, for those who begin to read the French Language. 12mo. pp. 272.
- Longfellow's Manual de Proverbes Dramatiques. 3d edition, 12mo. pp. 332.

The Proverbes Dramatiques is a collection of small comedies, illustrating familiar proverbs. The colloquial style is more difficult than that of plain narrative; but after going through the first text-book of the course, the mind of the pupil is prepared to undertake a more difficult task.

- Surault's French Questions on Sir Walter Scott's Tales of a Grandfather, for the Use of Learners who are beginning to speak the French Language. 12mo.
- Bellenger's Conversational Phrases and Dialogues, in French and English. Compiled chiefly from the 18th and last Paris edition of Bellenger's Conversational Phrases, with many additions and corrections. Edited by Pickering. 18mo.

FROM THE PREFACE.

'Bellenger's Conversational Phrases, which was published not long ago in Paris, is now extensively used in France, where it has already passed through eighteen editions. It is intended particularly for the use of schools; and is consequently elementary in its character. The subjects of the lessons are judiciously arranged under appropriate heads, and in a systematic order, well adapted to the gradual progress made by the younger as well as the more advanced student.'

La Henriade. Poème, par Voltaire. Stereotype edition, revised and corrected, with Annotations. 18mo. pp. 170.

Paul and Virginia. With Notes. 18mo. In Press.
